Politics is about everyone. Even if you are not a politician, you cannot even vote or participate in elections. From what time do you have to arrive at school every day? What is a crime? What can we do to avoid war? Which countries should we cooperate with... These are all politics! We need to think about and discuss politics frequently in order to know more about the world, for example: How was the United States born? How did ancient Rome and China manage society? Why are elections and voting important? When did capitalism and communism appear?

Go through the lessons in this book with your child and watch their self esteem grow! This book allows our youth to move at their own pace, in the privacy of their own home! All of the lessons provided are thoroughly explained, yet easy to understand. This way, children will feel confident

in their ability to comprehend what is being taught! This book is a great tutorial for children that are falling behind, as well as an excellent refresher course after a long summer! 1001 things YOUR child should know before high school!

1,001 Celestial Wonders is a guide to the night sky's brightest and most fascinating objects. Each target is accessible to amateur astronomers using medium-sized telescopes from a dark site. In fact, many are so bright they remain visible under moderate light pollution, as from the outskirts of a city or the suburbs of a town. The book provides a chronological target list, making it easy to use. No matter what night you choose, this book will show you many of the most memorable objects to observe, whether you are using a small telescope or even binoculars, or an instrument of larger aperture. This is far more than just a list of interesting objects. It is structured so that objects of various observing difficulty are included, which will help readers become better observers, both encouraging beginners and challenging long-time amateur astronomers. This book is designed to be easy-to-use at the telescope, and observers will appreciate each object's standardized layout and the book's chronological organization. Finally, many amateur astronomers function best when presented with a list! Even the Meade Autostar® controller features a 'best tonight' list (although the list is far less comprehensive and detailed than the catalog provided in this book), a feature that has proved extremely popular. 1,001 Celestial Wonders offers a life-list of objects any observer would be proud to complete.
