A chronological survey of the world's most influential books. Many books have become classics, must-reads or overnight publishing sensations, but how many can genuinely claim to have changed the way we see and think? In 100 Books that Changed the World, authors Scott Christianson and Colin Salter bring together an exceptional collection of truly groundbreaking books – from scriptures that founded religions, to scientific treatises that challenged beliefs, to novels that kick-started literary genres.

Christianson defines the term 'forensic' and describes how the different aspects of the science developed from the 1930s to become an important part of investigation. The text starts by discussing evidence collection and goes on to look at the different branches of forensics.

Dunhuang Star Map, Newcomen's steam engine, the Morse Code, Brooks Slave Ship, William Playfair's bar chart, Thomas Edison's light bulb, Nazi propaganda map, sewing patterns, Feynman Diagrams, the DNA double helix, IKEA flat-pack furniture instructions, the World Wide Web schematic, Carl Sagan's Pioneer Plaque.

A fully updated guide to creating dynamic presentations with PowerPoint 2010 PowerPoint dominates the presentation landscape. With the changes in PowerPoint 2010, including the availability of an online version, PowerPoint users need this comprehensive reference to make the most of the program.
