Beauty seems simple; we know it when we see it. But of course our ideas about what is attractive are influenced by a broad range of social and economic factors, and in Beauty and Business leading historians set out to provide this important cultural context. How have retailers shaped popular consciousness about beauty? And how, in turn, have cultural assumptions influenced the commodification of beauty? The contributors here look to particular examples in order to address these questions, turning their attention to topics ranging from the social role of the African American hair salon, and the sexual dynamics of bathing suits and shirtcollars, to the deeper meanings of corsets and what the Avon lady tells us about changing American values. As a whole, these essays force us to reckon with the ways that beauty has been made, bought, and sold in modern America.

In today's globally connected marketplace, a wedding sari in rural north India may become a woman's blouse or cushion cover in a Western boutique. Lucy Norris's anthropological study of the recycling of clothes in Delhi follows garments as they are gifted, worn, handed on, discarded, recycled, and sold once more. Gifts of clothing are used to make and break relationships within middle-class households, but a growing surplus of unwanted clothing now contributes to a global glut of textile waste. When old clothing is, for instance, bartered for new kitchen utensils, it enters a vast waste commodity system in which it may be resold to the poor or remade into new textiles and exported. Norris traces these local and transnational flows through homes and markets as she tells the stories of the people who work in the largely hidden world of fabric recycling.

This book considers the impact of multinational companies in China on the Chinese economy and on indigenous firms in China. It shows how the global business environment has undergone profound changes since the early 1990s, leading to an explosion of merger and acquisitions activity and consequent unprecedented degrees of concentration in many industries at a global level. It discusses the effects of these developments on the Chinese economy – both on multinationals and indigenous firms – analysing company strategies, activities and value chain structures. It shows that, as China's integration into the global economy increases, new, globalised value chain structures are becoming the established norm across the Chinese economy. In particular, it explores the effects of these developments for local Chinese firms, where the strategy of "catch-up" has recently been a primary goal, demonstrating how difficult it is for Chinese firms to achieve "catch-up" when the competitors they are chasing are themselves moving forward and evolving so fast. The book includes detailed case studies of Boeing, Wal-Mart and Coco-Cola, considering their activities both at the global level and within China, and case studies of the sectors in which these forms operate in China. The book's profoundly important conclusions concerning the impact of multinationals on the local economy and on indigenous firms are applicable to other developing economies as well as to China.

Costume design is a crucial, but frequently overlooked, aspect of film that fosters an appreciation of the diverse ways in which film and fashion enrich each other. These influential industries offer

representations of ideas, values, and beliefs that shape and construct cultural identities. In *Fashioning Spanish Cinema*, Jorge Pérez analyses the use of clothing and fashion as costumes within Spanish cinema, paying particular attention to the significance of those costumes in relation to the visual styles and the narratives of the films. The author examines the links between costume analysis and other fields and theoretical frameworks such as fashion studies, the history of dress, celebrity studies, and gender and feminist studies. *Fashioning Spanish Cinema* looks at instances in which costumes are essential to shaping the public image of stars, such as Conchita Montenegro, Sara Montiel, Victoria Abril, and Penélope Cruz. Focusing on examples in which costumes have discursive autonomy, it explores how costumes engage with broader issues of identity and, relatedly, how costumes impact everyday practices and fashion trends beyond cinema. Drawing on case studies from multiple periods, films by contemporary directors and genres, and red-carpet events such as the Oscars and Goya Awards, *Fashioning Spanish Cinema* contributes a pivotal Spanish perspective to expanding interdisciplinary work on the intersections between film and fashion.
