Letter to Parents: After years of helping prepare students to sit their 11+ exams we, at Educate Sterling, realised that much of the fundamental progress made by students is done through sitting past papers at home. Unfortunately, because each school only release one or two specimen papers a year, parents often expressed frustration at not being able to find enough papers for their children to practice on. When evaluating the papers which were available to download from different websites, we found that most were aimed at preparing students for the "average" UK entrance test. These have considerably easier questions than those of many central London schools. Realising this gap in the market, we started to design and write past papers that reflected the format and difficulty of the most challenging 11+ entrance exams. These not only match the syllabuses but also contain the types of "creative maths" questions students will face. There are a number of things to remember when attempting these tests. Firstly, they are hard and are supposed to push even the most academically able students. Therefore, the scores in these tests may be lower than what your child normally receives. As a rough benchmark, anything above 60% is good, 70% is very good and 80% is amazing. As these tests are harder than the norm, it may be sensible to use them at the end of your child's preparation, not the beginning. This will make sure that their confidence is not dampened by a poor test performance. Lastly, if you would like any help preparing for the exam, or advice on choosing the best school for your child, please feel free to get in contact with us using our website - EducateSterling.co.uk. We have helped many families support their child through the challenging process of applying to independent schools in London. Why not get in contact to see if we can help you too? Thank you and we hope you find the tests useful.

The 11+ Super Selective MATHS series has been written especially for children who seek 'more than ordinary' mathematical challenges. Filled with questions designed to stimulate thinking rather than simply elicit learned responses, this series provides the challenge that able pupils seek. Selective UK secondary schools are increasingly developing entrance exams that test potential rather than coached learning. As such we do not offer any particular exam format (e.g. CEM Durham, GL Assessment). Instead children's learning will be brought to life by our questions that demand insight and grasp of the fundamental concepts underlying each problem. Our fully worked answers demonstrate different strategies for solving 11+ mathematical challenges. Attractively designed and with ample space inside for pupils to express their working, this series will lead pupils to discover the fun, beauty and elegance of Mathematics! Each book in the 11+ Super Selective MATHS series - Contains 30 stimulating numerical and mathematical reasoning challenges Provides advanced practice material in mathematical thinking at 11+ Includes fully worked answers & explanations Is suitable for use at the very top of Key
