Explore Some Of The Most Fascinating Mysteries Of All Time Book 1: Unexplained Mysteries Of The World Humanity has come so far and explored so much. As a species, we have more or less conquered the entire Earth and all of its resources. We have built towering structures, intricate systems and settled everywhere -- from the tallest peaks to the deepest valleys. We have now entered what many like to think of as the enlightened, scientific era -- where old superstitions and fears have been abolished, and the mysteries of the past have been solved. Basically, many of us like to think we have figured it all out. However, whether we want to admit it or not, we are still surrounded by plenty of enigmas. Unexplained phenomena, such as confirmed instances of remote viewing or sightings of strange beings like Bigfoot, may sow a seed of doubt in even the surest of individuals. While some sneer at, or shy away from, the thought of investigating the mysterious, there are also those who feel curious, maybe even energized, at the thought of exploring something completely new. As Neil Armstrong once said: "Mystery creates wonder, and wonder is the basis for man's desire to understand". If you are one of those who seek to feel wonder, this book is for you. Herein you will find a varied collection of some of the most

intriguing unexplained mysteries of our time. From the puzzling artifacts of a lost civilization, to psychic visions and shocking UFO landings -- by the end of this book, you will have plenty of captivating questions to ponder and investigate further. Book 2: Bigfoot & The Other Ones Bigfoot, also called Sasquatch, is thought to be a large, hairy, ape-like being that inhabits some of the dense forests and remote mountain ranges of North America. Although solid, scientific evidence of the creature is lacking, stories of sightings and encounters have been steadily accumulating throughout the years. As a result, Bigfoot has been placed in the category of so-called "cryptids" -- creatures that are thought by some to exist on Earth, but have yet to be properly documented by modern science. Others in this category include the mysterious, waterborne, dinosaur-like being popularly-known as "the Loch Ness monster", as well as the goat-eating Chupacabra of South America. Due to the sheer volume of eyewitness accounts involving Bigfoot, most people in the Western hemisphere recognize the general description of this creature. What few may realize, however, is that the Sasquatch is not unique to North America. Or, at least, stories of mysterious, bipedal hominids are not. From the mountainous regions of Nepal to the wild outback of Australia, tales of such beings have existed throughout history. In many cases, the descriptions of these creatures seem to match Bigfoot. So, then,

a few questions naturally arise: Are these all part of a singular, long-lost species of great ape, or are they separate beings with different genetic lineages? How similar are they to each other, where do they live, and is there any evidence of their existence? We will explore the answers to these questions, and many more, in this book.

John's Amazing Mystery: The Unveiling draws back the curtain, lets in the light, and allows the biblical epic of Revelation to become user-friendly. Current events are laid alongside the ancient text, and its numerous parables are translated into living language and recognisable situations. The book accepts that global trauma may point to a present-day Apocalypse, though this is seen as just one alternative in several scenarios. The writer sets the scene by first drawing attention to what Jesus said about His promised return to earth and what we may expect will happen in the Last Days. The book then follows the outline of Revelation through seven astounding visions, each of which is analysed according to a set pattern. The cracking of codes is a feature of the work. Some innovative methods are employed whereby the mysterious becomes visible and believable. The book is set within the context of eternal issues.

There have been many legends and traditions regarding the ten lost tribes of the Northern Kingdom of Israel. This book draws upon extensive discoveries and information published regarding the movement of the People of Israel and Judah from Davidic times to the dawn of the Hellenistic period. The author has tested the biblical records against archaeological evidence, testimony and inscriptions found in Syria, Assyria, Babylon and Persia. In very many cases, the inscriptions excavated in these places coincide almost word for word with the biblical record. The early chapters also investigate evidence of migrations and movement by people to neighbouring countries by reason of seeking sanctuary, trade, marriage or in times of famine. Evidence has been found supporting the theory that many of the Northern Captives joined the tribes of the South who continued to live independently until the destruction of the First Temple. Hence it is not just a matter of investigating the transfer of captives out of Judah and the Northern Kingdom but also additional evidence found in the Bible or documents that bear evidence to Jewish people who lived, traded or served in various capacities in other lands. There is also some clear indication that many of the later captives joined their brethren who had been exiled to other lands earlier. The later chapters mention some traditions and legends that exist among many tribes that to this day trace their origins to the Exiles who belonged to the twelve tribes of

One of the most significant unsolved problems in mathematics is the complete classification of knots. The main purpose of this book is to introduce the reader to the use of computer programming to obtain the table of knots. The author presents this problem as clearly and methodically as possible, starting from the very basics. Mathematical ideas and concepts are extensively discussed, and no advanced background is required.

The first of two volumes builds on the brilliant and original Graphic Canon series in retelling classic works of literature as comics and other visual forms. Organized thematically, Volume 1 opens with "The Act" (think *In Cold Blood* and *A Clockwork Orange*), followed by sections dedicated to "Criminals," "Whodunit," "Judgment" (*Scarlet Letter*, anyone?), and "Punishment." Here you'll find stunning and suspenseful adaptations starring classic PIs Sherlock Holmes, Auguste Dupin, Hercule Poirot, Father Brown, Mike Hammer, and teenage girl-detective Violet Strange. But the mystery, intrigue, and foul play don't end (or begin) there. The artists also bring to life crime stories from the *Arabian Nights*, the Bible, *The Canterbury Tales*, China's Song Dynasty, Shakespeare, James Joyce's *Dubliners*, Patricia Highsmith, Truman Capote, and current writers like Stephen King, Jo Nesbo, and Sara Paretsky. Rick Geary brings his crisp style to

Dostoevsky's *Crime and Punishment*. Teddy Goldenberg gives us a dense, murky treatment of Dashiell Hammett's "The Road Home," often considered the first hardboiled detective story ever published. C. Frakes resurrects the forgotten novella "Talma Gordon," the first mystery written by an African American; and Shawn Cheng renders the first serial-killer story, the so-called fairy tale "Bluebeard" by Charles Perrault. Even the very natures of crime, justice, and punishment are up for grabs. Landis Blair reimagines *The Trial*, as a choose-your-own-adventure story that you cannot win, Ted Rall retells an O. Henry story about a petty criminal who just can't get arrested. From *The Marquis de Sade* to James Cain, Aeschylus to Paula Hawkins, crime and mystery has never been so brilliantly reimagined.
