measurement standards. This year we provide a new detailed engineering feature on RICS Ska ratings, and add cost sections for LED lighting, PV panels and solar thermal energy. The book also gives the usual market update of labour rates and daywork rates, material costs and prices for measured works, and all-in-rates and elemental rates in the Approximate Estimating section.

This Code is applicable to the selections and laying design of 500 kV and below 200 kV power cables and control cables used in newly built and expanded electric work.

This book presents scientific interactions between the three interwoven and challenging areas of research and development of future ICT-enabled applications: software, complex systems and intelligent systems. Software intensive systems heavily interact with other systems, sensors, actuators, and devices, as well as other software systems and users. More and more domains involve software intensive systems, e.g. automotive, telecommunication systems, embedded systems in general, industrial automation systems and business applications. Moreover, web services offer a new platform for enabling software intensive systems. Complex systems research focuses on understanding overall systems rather than their components. Such systems are characterized by the changing environments in which they act, and they evolve and adapt through internal and external dynamic interactions. The development of intelligent systems and agents features

the use of ontologies, and their logical foundations provide a fruitful impulse for both software intensive systems and complex systems. Research in the field of intelligent systems, robotics, neuroscience, artificial intelligence, and cognitive sciences is a vital factor in the future development and innovation of software intensive and complex systems.

Spon's Mechanical and Electrical Services Price Book 2003 is still the only annual services engineering price book available anywhere. This annual guide to pricing electrical and mechanical (HEVAC) services installation contains material prices, labour elements and measured works prices for mechanical contracts from pipework to ductwork and heating systems to air conditioning. Electrical contacts are also covered, from power supply through to light switches. The M&E comes with a 'free' CDROM that enables the reader to view the entire book on screen, cut and paste prices into other tender documents, export to other major packages, perform simple calculations, index search, produce estimate and tender documents, adjust rates and data. With the added bonus of the Approximate Estimating sections enabling quick, rule-of-thumb pricing, with detailed data and analysis, the 2003 edition of the Mechanical and Electrical Services Price Book provides the definitive estimating toolkit for the construction, building and surveying industries. New Features for 2003 The approximate estimating section now includes: Wider range of building types for both elemental and all-in m2 rates All-in rates for pipework In the Measured works section: The electrical section is now in line with the
