Chronicled here for the first time, Harley-Davidson's exclusive CVO models are pure eye candy.

The story of the author's motorcycle ride around the perimeter of the United States to discuss the issue of coastal erosion and wetlands preservation.

This illustrated guide is packed with interesting facts and follows the history of the famous Harley-Davidson company and the development of its famous bikes, which have earned a special place in the hearts of enthusiasts everywhere. The story dates from 1903 when Bill Harley and the Davidson brothers, with no thought of fame or fortune, decided to build a motorcycle that really worked. So successful was it, that it led to the gradual formation of a company that has survived through good times and bad. Through good times and bad, losing and winning back police contracts, as well as weathering various other vicissitudes, the company has achieved lasting success. In the end, Harley-Davidson came to the ultimate decision of giving its customers what they really wanted, not by providing year-on-year innovations, but by remaining true to the Founders' original concept. The result, as everyone knows, are bikes of mythic status, imbued with a mysterious quality of their own and generating a passion in enthusiasts amounting almost to a love affair. The name has come to personify America and is up there alongside Coca-Cola, Ford and McDonald's. The bikes are described in detail, not only in mechanical terms, but also with glorious photographs, and will be of interest to everyone who loves motorbikes: even aficionados of Japanese and European bikes, who have never even ridden a Harley-Davidson, will be able to recognize the unique marriage of style and nostalgia and the fact that there are no other bikes quite like them.

In *Biker Chicz of North America*, Edward Winterhalder and Wil De Clercq have compiled in-depth profiles of twenty-two fascinating women who ride Harley-Davidson motorcycles. Each chapter features an individual whose life story is compelling, intriguing, fascinating, and inspirational. While each woman featured in this book is unique and extraordinary in her own right, there are, not surprisingly, certain attributes they all have in common. In addition to being avowed motorcycle riders they live to ride and ride to live they are successful, intelligent, freethinking, adventurous, creative, inspiring, and tenacious. They are women who have followed their dreams and dared to live life on their own terms. All are survivors who boldly took on challenges that many of us men or women would find daunting. Some of them came by their success easily, others by triumphing over adversity. Despite their common traits, most are as different as night and day. Some are introverted, others extroverted; some are family oriented, others are loners. They'll be the first to admit, however, that without their Harleys, they would not be who they are today. Their beloved motorcycles are what defines them and what sets them apart from their nonriding sisters.

Tourism has become a significant area of scholarship especially given the industry's product development opportunities on a global scale. However, the emphasis placed on such research has largely been from a supply-side perspective. What needs to be explored is the shift towards the agencies of the tourist or traveler as consumer and consumption as being embodied as a moment of practice in continuous states of touring.
