Artificial intelligence (AI) technologies are one of top investment priorities in these days. They are aimed at finding applications in fields of special value for humans, including education. The fourth industrial revolution will replace not only human hands but also human brains, the time of machines requires new forms of work and new ways of business education, however we must be aware that if there is no control of human-AI interaction, there is a risk of losing sight of this interaction's goal. First, it is important to get people to truly understand AI systems, to intentionally participate in their use, as well as to build their trust, because "the measure of success for AI applications is the value they create for human lives" (Stanford University 2016, 33). Consequently, society needs to adapt to AI applications if it is to extend its benefits and mitigate the inevitable errors and failures. This is why it is highly recommended to create new AI-powered tools for education that are the result of cooperation between AI researchers and humanities' and social sciences' researchers, who can identify cognitive processes and human behaviors. This book is authored by a range of international experts with a diversity of backgrounds and perspectives hopefully bringing us closer to the responses for the questions what we should teach (what the 'right' set of future skills is), how we should teach (the way in which schools should teach and assess them) and where we should teach (what implications does AI have for today's education infrastructure). We must remember as we have already noticed before "...education institutions would need to ensure that that they have an appropriate infrastructure, as well as the safety and credibility of AI-based systems. Ultimately, the law and policies need to adjust to the rapid pace of AI development, because the formal

responsibility for appropriate learning outcomes will in future be divided between a teacher and a machine. Above all, we should ensure that AI respect human and civil rights (Stachowicz-Stanusch, Amann, 2018)".

This title provides a clear overview of its subject, focusing on the practical issues that confront lawyers on a daily basis. Written by an acknowledged expert, the manual provides detailed analysis of recent cases and legislation.

Since the 1970s, romance novels have surpassed all other genres in terms of popularity in the United States, accounting for half of all mass market paperbacks sold and driving the digital publishing revolution. *Romance Fiction and American Culture* brings together scholars from the humanities, social sciences, and publishing to explore American romance fiction from the late eighteenth to the early twenty-first century. Essays on interracial, inspirational, and LGBTQ romance attend to the diversity of the genre, while new areas of inquiry are suggested in contextual and interdisciplinary examinations of romance authorship, readership, and publishing history, of pleasure and respectability in African American romance fiction, and of the dynamic tension between the genre and second wave feminism. As it situates romance fiction among other instances of American love culture, from Civil War diaries to Bob Dylan's *Blood on the Tracks*, *Romance Fiction and American Culture* confirms the complexity and enduring importance of this most contested of genres.

"This volume covers many of the important advances in the geological sciences from 1963 to 2013. These advances include understanding plate tectonics, exploration of the Moon and Mars, development of new computing and analytical technologies, understanding of the role of microbiology in geologic processes, and many others"--Provided by publisher.

Andreas Riener studies the influence of implicit interaction using vibro-tactile actuators as additional sensory channels for car-driver feedback and pressure sensor arrays for implicit information transmission from the driver toward the vehicle. The results of his experiments suggest the use of both vibro-tactile notifications and pressure sensor images to improve vehicle handling performance and to decrease the driver's cognitive workload.

This volume presents the current state of knowledge on the osseous projectile weaponry that was produced by Pleistocene cultures across the globe. Through cross-cultural and temporal comparison of manufacturing methods, design, use methods, and associated technology, chapters in this volume identify and discuss differences and similarities between these Pleistocene cultures. The central research questions addressed in this volume include: (a) how did osseous weaponry technology develop and change through time and can these changes be tied to environmental and/or social influences?; (b) how did different Pleistocene cultures design and adapt their osseous weaponry technology to their environment as well as changes in that environment?; and (c) can we identify cultural interaction between neighboring groups through the analysis of osseous weapons technology — and if so — can we use these items to track the movement of peoples and/or ideas across the landscape? Through addressing these three central research questions, this volume creates an integrated understanding of osseous technology during a vital period in Modern Human cultural development which will be useful for students and advanced researchers alike.

"Ready or not, it's high time to make BIM a part of your practice, or at least your vocabulary, and this book has as much to offer beginners as it does seasoned users of building information modeling software." —Chicago Architect

The first book devoted to the subject of how BIM affects individuals and organizations working within the ever-changing construction industry, *BIM and Integrated Design* discusses the implementation of building information modeling software as a cultural process with a focus on the technology's impact and transformative effect—both potentially disruptive and liberating—on the social, psychological, and practical aspects of the workplace. *BIM and Integrated Design* answers the questions that BIM poses to the firm that adopts it. Through thorough research and a series of case study interviews with industry leaders—and leaders in the making out from behind the monitor—*BIM and Integrated Design* helps you learn:

- Effective learning strategies for fully understanding BIM software and its use
- Key points about integrated design to help you promote the process to owners and your team
- How BIM changes not only the technology, process, and delivery but also the leadership playing field
- How to become a more effective leader no matter where you find yourself in the organization or on the project team
- How the introduction of BIM into the workforce has significant education, recruitment, and training implications

Covering all of the human issues brought about or exacerbated by the advent of BIM into the architecture workplace, profession, and industry, *BIM and Integrated Design* shows how to overcome real and perceived barriers to its use.

stretching into the Atlantic, is a place unto itself with its own language and time-defying towns such as Gauguin's Pont-Aven and the pirate haven of St-Malo. Although the region of Alsace-Lorraine is bordered by the Rhine and often looks and sounds German, its main sights--18th-century Nancy, medieval Strasbourg, and the lovely Route du Vine--remain proudly French. Don't miss Champagne Country, the capital of bubbly, and the four Gothic cathedrals nearby. No trip to France would be complete without a stop in Paris. A quayside vista that takes in the Seine, a passing boat, Notre-Dame, the Eiffel tower, and mansard roofs all in one generous sweep is enough to convince you that this is indeed the most beautiful city on Earth. Note: This ebook edition includes photographs and maps that will appear on black-and-white devices but are optimized for devices that support full-color images.

This book considers the one-factor copula model for credit portfolios that are used for pricing synthetic CDO structures as well as for risk management and measurement applications involving the generation of scenarios for the complete universe of risk factors and the inclusion of CDO structures in a portfolio context. For this objective, it is especially important to have a computationally fast model that can also be used in a scenario simulation framework. The well known Gaussian copula model is extended in various ways in order to improve its drawbacks of correlation smile and time inconsistency. Also the application of the large homogeneous cell assumption, that allows to differentiate between rating classes, makes the model convenient and

powerful for practical applications. The Crash-NIG extension introduces an important regime-switching feature allowing the possibility of a market crash that is characterized by a high-correlation regime.

"In July 2012, the Green Infrastructure Finance Framework Report was published to address the constraints in financing green infrastructure and to develop a new PPP-based approach to accelerate investments in low emission technologies. The approach calls for assessing the "Green Investment Climate" of a given country in order to develop country-specific recommendations for policy and incentive programs as well as other measures which can be introduced in order to further promote green growth in an economy. This report includes one of the first Green Investment Country Profiles completed for the East Asia and Pacific Region as part of bringing the approach closer to operational status. The initial countries include China, Philippines, Vietnam, Malaysia, Indonesia, Singapore and South Korea. The assessment involves not only the green policy and incentives environment, but also the country's overall natural resource endowment of fossil and renewable energy, its industrial development strategy in

addition to general business indicators and other considerations, such as electricity prices, the capacity of the financial sector to mobilize long-term domestic financing, as well as their overall regulatory and legal capacity to implement PPPs. The country profiles provide a general understanding of the attractiveness, prevailing trends, strengths, and other aspects affecting the ability of the country to leverage its green growth potential. "

This edited volume presents new insights and challenges in the field of electric mobility in relation to new mobility and infrastructure concepts as well as to renewable energies. The book covers the socio-economic view on the topic as well as technical aspects and thus offers valuable knowledge for future business models. It primarily addresses practitioners and researchers in the field but may also be of use to graduate students.

Ride once again with the author, Rod Koch, and share his adventures as he struggles to gain another victory in the epic Baja 1000. His first autobiography, *7 Years from Start to Finish*, covered the early years of the Baja races from 1968-1975, up to the moment when the author became a first place winner in that incredible endurance race down and around the Baja California peninsula. When the Green Flag Drops continues those adventures in off-road racing through the 1980s not just in Baja, but back in the U. S. A. with events like the Parker 400, Casinos 350, Mint 400 and the Riverside Off-Road Championships. The author then makes the transition into the intensity of the Pro-Rally race scene, bringing the reader along

with him as he takes on some of the best and fastest off-road and performance rally drivers in North America. The action streaks across the High Sierras from San Francisco to Reno, from Las Vegas to Laughlin, Nevada, from Carson City to Virginia City to Yerington, through the rain, mud, snow, even the heat of the Mojave Desert near Palm Springs and east of Indio, wherever the dirt mountain and desert roads of the performance and Pro-Rally circuit goes. You are there with the author in the co-driver's seat for what may be the ride of your life—if you dare.

Pursuing a multidisciplinary approach, this book demonstrates the best quality care for pregnant women and new mothers who may have complex social needs. This book will benefit all health and social care professionals working in women's health, while also providing a valuable reference guide for maternity departments. The latest Mothers and Babies: Reducing Risk through Audits and Confidential Enquiries across the UK (MBRRACE-UK) demonstrates the consequences that having multiple complexities has and the need to ensure that susceptible groups receive personalised, appropriate care and meeting the needs of all women is urgent and essential. This book brings together a blend of health and social care professionals, experts by experience and the charity third sector. All have expertise in caring for and supporting perinatal women with issues that may affect their health and the type of care they require. Through our collective writing, we provide a paradigm for partnership working and hope to have strengthened voices by highlighting women's experiences and the importance of third sector partnerships, working in tandem with women who are experts by experiences and bringing health professionals together. In combination with recommendations from specialists in the field, we have offered a unique mix of compassion and evidence-based guidance. From

substance abuse, domestic violence and HIV to experiences of Black, Asian and Ethnic Minorities, homelessness, women seeking asylum and women in prison, we have addressed a range of current issues and provided essential information and opportunities to reflect. Each chapter invites the reader to step into the shoes of the perinatal woman. Through our collective writing, we provide a paradigm for partnership working and hope to have strengthened voices by highlighting diverse experiences. We have looked at how using a trauma informed approach can be applied universally to care for all women and learn from charities such as Birth Companions, the 4M project and the Salamander Trust, how different approaches may directly impact women's care in a positive and holistic way. An overarching aim of our book has been to find ways to deliver multi-agency continuity of care, whilst being aware of bias, professional responsibilities and an understanding how we can take a holistic approach - crucial for attaining excellence in 21st century maternity care provision.
