In its golden age, American radio both entertained and also fostered programs meant to produce self-governing and opinion-forming individuals, promoting openness to change and tolerance of diversity, familiarity with classical music, and knowledge of world affairs. As author David Goodman argues, the ambitions of radio's golden age have strong significance today as evidence that media regulation in the public interest can have significant and often positive effects. A guide to buying a used car or minivan features information on the strengths and weaknesses of each model, a safety summary, recalls, warranties, and service tips.

"Long live the red terror!" This and other political slogans were used by China's communist rulers as leverage for conflict and conflict management during 1949. China's Cultural Revolution movement understandably fueled anger,

fear, and terror among Chinese citizens. Currently, contrary to the positive facade that China, under the control of the Communist Chinese Party (CCP), tries to project regarding human rights, a dark reality reveals a brutal authoritarian state with no concern for religious freedom. What guiding philosophy could best help procure, provide, and protect religious freedom for all in a post-communist, Christianized, democratic China? Bob Fu argues that while various Christianity-oriented theories may appear promising, they fail to provide an adequate pluralistic foundation for protecting the religious freedoms of people of all faiths and none. The predominant theory of political liberalism in the West likewise fails to prove sufficiently inclusive for all faiths and worldviews. As an alternative, the author defends Baorong Duoyuan (inclusive pluralism), his own contextualized theory modeled after principled pluralism. This model, he believes, has the potential to help ensure that religious freedom for all becomes a reality.

Ride once again with the author, Rod Koch, and share his adventures as he struggles to gain another victory in the epic Baja 1000. His first autobiography, *7 Years from Start to Finish*, covered the early years of the Baja races from 1968-1975, up to the moment when the author became a first place winner in that incredible endurance race down and around the Baja California peninsula. When the *Green Flag Drops* continues those adventures in off-road racing through the 1980s not just in Baja, but back in the U. S. A. with events like the Parker 400, Casinos 350, Mint 400 and the Riverside Off-Road Championships. The author then makes the transition into the intensity of the Pro-Rally race scene, bringing the reader along with him as he takes on some of the best and fastest off-road and performance rally drivers in North America. The action streaks across the High Sierras from San Francisco to Reno, from Las Vegas to Laughlin, Nevada, from

Carson City to Virginia City to Yerington, through the rain, mud, snow, even the heat of the Mojave Desert near Palm Springs and east of Indio, wherever the dirt mountain and desert roads of the performance and Pro-Rally circuit goes. You are there with the author in the co-driver's seat for what may be the ride of your life—if you dare.

technologies and social media has opened up new forms of communication. This book covers the broad and involved relationship between the arts and marketing. It frames "arts marketing" in the context of wider, related issues, such as the creative and cultural industries, cultural policy and arts funding, developments in the different art forms and the impact of environmental forces on arts business models and markets. The Routledge Companion to Arts Marketing provides a comprehensive, up-to-date reference guide that incorporates current analyses of arts marketing topics by leaders of academic research in the field. As such, it will be a key resource for the next generation of arts marketing scholars and teachers and will constitute the single most authoritative guide on the subject internationally.

Media Today gives your students the media literacy skills they need to think critically about the role of media in their lives. This book uses a media systems approach to look closely at the production, distribution, and exhibition of media, from Hollywood films to Facebook, to discover cultural, political, and economic forces that shape media now. Completely revised and updated, this 4th edition connects the latest trends, debates, and technologies to the history of media, highlighting the impact and meaning of today's changes to the media landscape, especially how traditional industry boundaries have blurred with digital convergence. Students and instructors will find a full range of supporting materials including interactive quizzes and online video resources at www.routledge.com/textbooks/mediatoday4e.

MODERN DIESEL TECHNOLOGY: LIGHT DUTY DIESELS provides a thorough introduction to the light-duty diesel engine, now the power plant of choice in pickup trucks and automobiles to optimize fuel efficiency and longevity. While the major emphasis is on highway usage, best-selling author Sean Bennett also covers small stationary and mobile off-

highway diesels. Using a modularized structure, Bennett helps the reader achieve a conceptual grounding in diesel engine technology. After exploring the tools required to achieve hands-on technical competency, the text explores major engine subsystems and fuel management systems used over the past decade, including the common rail fuel systems that manage almost all current light duty diesel engines. In addition, this text covers engine management systems, computer controls, multiplexing electronics, diesel emissions and the means used to control them. All generations of CAN-bus technology are examined, including the latest automotive CAN-C multiplexing and the basics of network bus troubleshooting. ASE A-9 certification learning objectives are addressed in detail. In 2013, China's President Xi Jinping launched what is now known as the Belt and Road Initiative (BRI). Since then, the initiative has instilled apprehension, enthusiasm and uncertainty around the globe in equal measure. The Belt and Road Initiative: Opportunities and Challenges of a Chinese Economic Ambition strives to reflect upon and synthesize the challenges and opportunities faced by China and indeed the rest of the world pertaining to the implementation of such an ambitious project. It covers perspectives from regions both in and around Asia, as well as from Europe, the United States and Africa. In addition to this, the initiative is discussed through the lens of various disciplines such as geo-politics, marketing, currency, finance, leadership, negotiation, security and the digital component of the Silk Road. The resulting compilation provides for a thoroughly extensive and pluralistic examination of the BRI, lending the reader a peek into what the world may anticipate from China and this project in the years to come.

The rapid growth of promotional material through the internet, social media, and entertainment culture has created consumers who are seeking out their own information to guide their purchasing decisions. *Promotional Culture and Convergence* analyses the environments necessary for creating a culture of collaboration with consumers, and critically engages with key areas of contemporary promotional development, including: promotional culture's primary industries, including advertising, marketing, PR and branding, and how are they informed by changes in consumer behaviour and market conditions how industries are adapting in the digital age to attract both audiences and advertising revenue the evolving dialogues between 'new consumers' and producers and promotional industries. Ten contributions from leading theorists on contemporary promotional culture presents an indispensable guide to this creative and dynamic field and include detailed historical analysis, in-depth case studies and global examples of promotion through TV, magazines, newspapers and cinema.

This book analyzes the Central Asian economies of Kazakhstan, the Kyrgyz Republic, Tajikistan, Turkmenistan, and Uzbekistan, from their buffeting by the commodity boom of the early 2000s to its collapse in 2014. Richard Pomfret examines the countries' relations with external powers and the possibilities for development offered by infrastructure projects as well as rail links between China and Europe. The transition of these nations from centrally planned to market-based economic systems was essentially complete by the early 2000s, when the region experienced a massive increase in world prices for energy and mineral exports. This raised incomes in the main oil and gas exporters, Kazakhstan and Turkmenistan; brought more benefits to the most populous country, Uzbekistan; and left the poorest countries, the

Kyrgyz Republic and Tajikistan, dependent on remittances from migrant workers in oil-rich Russia and Kazakhstan. Pomfret considers the enhanced role of the Central Asian nations in the global economy and their varied ties to China, the European Union, Russia, and the United States. With improved infrastructure and connectivity between China and Europe (reflected in regular rail freight services since 2011 and China's announcement of its Belt and Road Initiative in 2013), relaxation of United Nations sanctions against Iran in 2016, and the change in Uzbekistan's presidency in late 2016, a window of opportunity appears to have opened for Central Asian countries to achieve more sustainable economic futures.

The text's efficient format does not overwhelm students, and its accessible style provides an alternative to more encyclopedic, reference-book approaches. The book offers a blend of the core concepts of accounting principles with procedural applications. This approach is supplemented with the most expansive set of end-of-chapter material on the market, a thorough integration of today's hot topics, and a robust selection of student and instructor print and online resources. The September 2011 edition of the World Economic Outlook assesses the prospects for the global economy, which is now in a dangerous new phase. Global activity has weakened and become more uneven, confidence has fallen sharply recently, and downside risks are growing. Against a backdrop of unresolved structural fragilities, a barrage of shocks hit the international economy this year, including the devastating Japanese earthquake and tsunami, unrest in some oil-producing countries, and the major financial turbulence in the euro area. Two of the forces now shaping the global economy are high and rising commodity prices and the need for many economies to address large budget deficits. Chapter 3 examines the inflationary effects of commodity price movements and the appropriate monetary policy response. Chapter 4 explores the implications of efforts by advanced economies to restore fiscal sustainability and by emerging and developing economies to tighten fiscal policy to rebuild fiscal policy room and in some cases to restrain overheating pressures.
