A comprehensive update, the fourth edition of this leading text features numerous chapters by new authors addressing the latest trends and topics in the field. The book presents the foundational concepts and methodological tools that readers need in order to engage with today's pressing urban transportation policy issues. Coverage encompasses passenger and freight dynamics in the American metropolis; the local and regional transportation planning process; and questions related to public transit, land use, social equity and environmental justice, energy consumption, air pollution, transportation finance, sustainability, and more. Among the student-friendly features are special-topic boxes delving into key issues and 87 instructive figures, including eight color plates. ÿ New to This Edition \*Extensively revised coverage of information and communication technologies, urban freight, travel behaviors, and regional transportation planning. \*Engaging discussions of current topics: smartphone travel tracking, Uber, car and bike sharing, food deserts, biofuels, and more. \*Heightened focus on climate change. \*Reflects over a decade of policy changes, technological advances, and emergent ideas and findings in the field. \*Most of the figures and special-topic boxes are new. ?????:??

A young man describes his torment as he struggles to reconcile the diverse influences of Western culture and the traditions of his own Japanese heritage

Draws on more than forty interviews with Steve Jobs, as well as interviews with family members, friends, competitors, and colleagues to offer a look at the co-founder and leading creative force behind the Apple computer company.

Migration is an expanding global reality, one that allows millions of people to seek new opportunities. But it also involves challenges for migrants and for societies, both in areas of origin and of destination. This report analyses migratory flows – internal and international – and how they are linked to processes of economic development, demographic change, and natural-resource pressure. The focus is on rural migration, the many forms it takes and the important role it plays in both developing and developed countries. The report investigates the drivers and impacts of rural migration and highlights how related policy priorities depend on country contexts that are in continuous evolution.

An analysis of the welfare state from a political economy perspective that examines the effects of aging populations, migration, and globalization on industrialized economies. In *The Decline of the Welfare State*, Assaf Razin and Efraim Sadka use a political economy framework to analyze the effects of aging populations, migration, and globalization on the deteriorating system of financing welfare state benefits as we know them. Their timely analysis, supported by a unified theoretical framework and empirical findings, demonstrates how the combined forces of demographic change and globalization will make it impossible for the welfare state to maintain itself on its present scale. In much of the developed world, the proportion of the population aged 60 and over is expected to rise dramatically over the coming years--from 35 percent in 2000 to a projected 66 percent in 2050 in the European Union and from 27 percent to 47 percent in the United States--which may necessitate higher tax burdens and greater

public debt to maintain national pension systems at current levels. Low-skill migration produces additional strains on welfare-state financing because such migrants typically receive benefits that exceed what they pay in taxes. Higher capital taxation, which could potentially be used to finance welfare benefits, is made unlikely by international tax competition brought about by globalization of the capital market. Applying a political economy model and drawing on empirical data from the EU and the United States, the authors draw an unconventional and provocative conclusion from these developments. They argue that the political pressure from both aging and migrant populations indirectly generates political processes that favor trimming rather than expanding the welfare state. The combined pressures of aging, migration, and globalization will shift the balance of political power and generate public support from the majority of the voting population for cutting back traditional welfare state benefits.

Today's electric power companies compete to provide cleaner electricity. That's a good thing, but progress has come with costs, especially for communities reliant on the coal industry. Thomas McGarity examines the changes of recent decades and offers ideas for building a more sustainable grid while easing the economic downsides of coal's demise.

A multidisciplinary index covering the journal literature of the arts and humanities. It fully covers 1,144 of the world's leading arts and humanities journals, and it indexes individually selected, relevant items from over 6,800 major science and social science journals.

Chinese edition of Malcolm Gladwell's *Outliers: The Story of Success*. The #1 New York Times and Amazon bestselling book in nonfiction. Gladwell examines the lives of Outliers - the best of the top 1%, asks what makes them different than ordinary lives.
