

2 The Fundamentals Of Financial Accounting And Reporting

This handbook in two parts covers key topics of the theory of financial decision making. Some of the papers discuss real applications or case studies as well. There are a number of new papers that have never been published before especially in Part II. Part I is concerned with Decision Making Under Uncertainty. This includes subsections on Arbitrage, Utility Theory, Risk Aversion and Static Portfolio Theory, and Stochastic Dominance. Part II is concerned with Dynamic Modeling that is the transition for static decision making to multiperiod decision making. The analysis starts with Risk Measures and then discusses Dynamic Portfolio Theory, Tactical Asset Allocation and Asset-Liability Management Using Utility and Goal Based Consumption-Investment Decision Models. A comprehensive set of problems both computational and review and mind expanding with many unsolved problems are in an accompanying problems book. The handbook plus the book of problems form a very strong set of materials for PhD and Masters courses both as the main or as supplementary text in finance theory, financial decision making and portfolio theory. For researchers, it is a valuable resource being an up to date treatment of topics in the classic books on these topics by Johnathan Ingersoll in 1988, and William Ziemba and Raymond Vickson in 1975 (updated 2nd edition published in 2006). This helpful supplement augments each chapter and appendix with reviews of the learning objectives, outlines of the chapters, summaries of chapter materials, and additional problems with solutions.

Includes handy reference formula card. This third edition of FUNDAMENTALS OF FINANCE revises and updates the highly successful previous editions, providing a practical overview of contemporary finance from an Australasian perspective. The textbook helps students understand the operations of the financial system within the context and environment in which financial decisions are made. The fundamental tools, techniques and concepts used in finance are introduced and are then applied to three major sectors of finance: financial institutions and markets, personal finance and financial management. The book is suitable as a foundation for further finance study, or as a stand-alone introduction to finance. Part 1 deals with the tools, techniques and concepts used in finance; Part 2 assists students to understand financial markets and the institutions that operate within them; Part 3 covers the short- and long-term financial planning activities of an individual; Part 4 describes a business organisation, how it is managed and financed, and its short- and long-term financial management. The broad scope of this coverage reflects the important impact of finance upon the economy, businesses and individuals. It allows a more complete perspective of finance than is usually provided in traditional introductory finance textbooks. It also enables students to make their own financial decisions - both in their personal lives and in their workplaces.

Fundamentals of Corporate Finance, 2nd Edition offers an innovative integration of conceptual understanding and problem-solving ... of intuition and decision-making ... of the authors' industry and classroom/research experience ... with current real-world examples and online practice. Authors Robert Parrino, David Kidwell, and Thomas Bates believe that students who understand the intuition underlying the basic concepts of finance are better able to develop the critical judgments necessary to apply financial tools in real decision-making situations. Their text develops intuitive thinking while simultaneously helping students develop problem solving and computational skills. It then shows students how to apply intuition and analytical skills to decision making while integrating it all with valuation and building shareholder value.

The information in this book is extensive. You can use it to sound glib at the water cooler, on the golf course or at a cocktail party. But that would not be it's best use. Instead, use it to improve your life. The information contained in this book will provide you with the questions to ask, and motivate you to find an advisor you can trust. The next step is to have them prepare a comprehensive, written financial plan for you. A financial plan, like a fine tapestry, should be artfully woven to produce a valuable life chart. Next, implement the plan. Get your house in order. Understand your cash flow. Harmonize your investment portfolio so that it will support you throughout your retirement. Properly insure the risks of life that are: illness, disability, death, property damage, lawsuits and a lengthy long-term care stay. The latter can put you and your family in bankruptcy and/or dependent on a government welfare program. Lastly, carefully plan for your estate so that your worldly goods go to those whom you choose, not some agency of the government. "Knowing is not enough; we must apply. Willing is not enough; we must do." —Johann Wolfgang Von Goethe

The book attempts to make students understand the subject with its application in the real world and not merely for the examination purposes. Though the book has been designed as per the latest CBCS curriculum of Delhi University's B.Com. (Hons.) course, it may be helpful to the students of other courses as well. Even professionals, who are not from finance background and are interested in understanding the basics of financial management, would find the book useful.

This book is the result of a decade teaching of Islamic finance course to business graduates (Bachelor and Master classes). This book is written with a clear focus on learning of Islamic banking & finance by accounting, banking, business and finance students/professionals. This book is divided into five parts. Part-1 presents an update on Islamic finance, why and how Islamic banking started; What is current status; Meaning and prohibition of Riba (Interest & Usury) as reported in revealed books (Bible and Qur'an); business models under Islamic financial services industry; principles of Islamic financial system, similarities and differences with conventional finance industry, and challenges being faced by the nascent industry. Part two is about asset-backed financing provided by IFIs. It includes trading (selling) modes of financing including Murabaha (ch.2), Salam, and Istisna'a; it also includes rental-based financing product-Ijarah financing. Chapter 2,3,4,5 include sales and rental-based financing. Part three of the book deals with profit and loss sharing modes of financing including Musharakah, diminishing Musharakah and Mudarabah. A special section is devoted to discussing the causes of lesser application of Musharakah in operations of IFIs, in addition to Shari'ah rulings and financial impact. Chapter seven is about Diminishing Musharakah; a form of gradually declining partnership between an IFI and clients; generally used to finance real estates. Under diminishing Musharakah, the basic Shari'ah rulings, Islamic house financing, comparative study of conventional and Islamic mortgages and installment calculation under different assumptions for house financing are presented. Chapter eight is about Mudarabah. Chapter nine presents various types of deposits collected by IFIs and profit-sharing mechanism. Concepts of daily product and weight-age based profit systems are elaborated. Part four of the book presents special topics in Islamic Finance. In this part areas of liquidity management, Islamic insurance, currency system, substance & form, and challenges to Islamic finance industry are elaborated. Under Islamic capital market (liquidity management) two dedicated chapters have been included; each for equities and sukuk. Chapter 12 elaborates briefly the concept of Islamic insurance covering multiple areas including Shari'ah guidelines, takaful (insurance) models, and role of insurance company, in addition to illustrative financial calculations. Chapter-13 addresses the issue of preference for 'legal form over economic substance' by critically evaluating the selected Islamic finance contracts. Last chapter identifies the challenges [potentially hurdles in sustainability, growth and expansion of the industry]. The fifth edition is the outcome of encouraging response by the academic community to earlier editions. In this edition, due attention has been given to present material in a reader-friendly mode in addition to a thorough review of content, exercises and figures. Title of the book changed by adding prefix of 'fundamentals' to reflect the nature of work (as text book). In this edition, the chapter on Islamic finance: an update is revised thoroughly; and by insertion of specific contents including principles and business models of Islamic financial system, in addition to brief presentation of challenges. Besides, Islamic capital market is re-written by including an evaluation of methodologies used in creation of Shari'ah universes of stocks. Also, a new chapter included to present the application of 'form over substance' principle to industry practices. Updated figures on the global volume of assets, application of financial products; regional shares, etc. are also part of this edition. Also, more examples included in the text to make the concept clear. An increased number of multiple-choice questions and mini cases are also forming part of the updated edition. I

welcome readers' Feedback.
