The Baboon and Mother of Apis Catacombs were cleared in the 1968/9 season and the 1969/70 and 1970/71 seasons respectively during the Egypt Exploration Society's excavation of the site now known as the Sacred Animal Necropolis at North Saqqara. These excavations were initiated by W. B. Emery and directed by him from 1964 until his death in Cairo in March 1971. Later in that year, the Society's Committee appointed H. S. Smith as Field Director and G. T. Martin as Site Director for the project. During the years 1971-6 fieldwork was completed by the Society as far as was deemed practicable. Work then started upon the formidable task of publishing the underground catacombs and surface structures discovered and the very large quantities of objects and documents found during the excavations. Two of the reports, on the Falcon Complex and Catacomb and the Main Temple Complex have since appeared. This volume by Sue Davies constitutes the final archaeological report on the cult installations accessed directly from the Main Temple Complex.

The most popular introduction to amateur radio, this guide offers a unique mix of technology, public service, convenience, and fun. All levels of ham radio operators can brush up on their skills and use the book to study for their first license exam with the latest questions pool with answer key.

Bradt's Abruzzo remains the only full English-language guide to this beautiful and increasingly favoured part of Italy. This new edition has been thoroughly updated to cover all developments since the last edition, reflecting the region's growing popularity for holiday homes and as a busy conference destination at the heart of Italy, plus its appeal for wildlife and active tourism, including trekking, family holidays and horse-riding. Abruzzo offers the best of undiscovered Italy from pristine beaches to mountain glaciers, with some of Italy's most beautiful medieval villages clinging to the hillsides in between. This brand new edition of Bradt's Abruzzo provides all the practical and background information you'll need to explore this surprising region. What makes the Abruzzo region remarkable is that it is still about as unique and authentic an Italian experience as you can get in a country so devoured by international tourism. Abruzzo offers one of the most beautiful coastlines in the country, only a short distance from the tallest mountain ranges in Italy outside the Alps (it is the second most popular skiing centre in Italy outside the Alps) and one of the best places for hiking and flora/fauna spotting. What's more, despite the economic downturn of recent times, the regional government continues to invest in a 'beautification' project for its major urban centres and in the development of its regional highlights such as mountains, wildlife parks and rural towns. It's notable that in the 2017 national competition for

## Online Library 2m 70cm Dual Band High Performance Gain Base Station Antenna

'I Borghi Più Belli d'Italia' (The Most Beautiful Towns in Italy) programme, Abruzzo was recognised as having 23 of the country's most beautiful towns, trailing second only behind Umbria and with at least a handful more than Tuscany. Intriguingly, Madonna's family hails from the town of Pacentro, to which the singer donated US\$500,000 for restoration works after the 2009 earthquake in the region. Blue Flag beaches, mountain hiking and where to spot rare wildlife such as bears and wolves are all covered, as are untouched castles and frescoed churches and the region's plethora of Roman ruins. Italian cooking and the best places to eat are featured (Abruzzo is home to the majority of Italy's domestic pasta production), and there is extensive coverage of culture and language (Abruzzo is one of Italy's most linguistically diverse regions). Written with warmth and insight by a native Abruzzese, Bradt's Abruzzo contains all the information you need to discover this enchanting part of Italy.

In order to reflect the increasing importance and interest of the microsatellites in high technology and scientific applications in space, the Colloquium on Microsatellites as Research Tools was organized to promote its usage and technology development and to foster the international cooperation, especially in the area of the Asia pacific region. Attended by 150 participants from 18 countries the colloquium was organized into five major themes: regional development, lessons learned, innovations, scientific

applications, and education. A special session was organized as well by the organizing committee and supported by the National Space Program Office to present its development of the Taiwan's satellite program and the current status of ROCSAT-1 which is scheduled to be launched at the beginning of 1999. Two main conclusions were drawn from the material presented: microsatellite in general is a very good means for doing space research and technology development, and a suitable vehicle to promote international collaborations.

New 3d edition -- If it's about ham radio, it's in the Almanac. -- Updated annually, with new tables, facts and figures. -- For all amateur and professional ham radio enthusiasts. -- Unique publication -- no other book like it on the market. Anyone looking for information about ham radio will find it in the 1996 Amateur Radio Almanac.
