This book is the first of a new series which will present the proceedings of the newly established Nestlé Nutrition Workshop Series: Clinical & Performance Programme aimed at adult nutrition. Undernutrition is a common phenomenon in elderly people, and malnutrition reaches significant levels in those being in hospital, nursing homes or home care programs. Consequences of malnutrition often go unrecognised owing to the lack of specific validated instruments to assess nutritional status in frail elderly persons. The Mini Nutritional Assessment (MNA) provides a single, rapid assessment of nutritional status in the elderly of different degrees of independence, allowing the prevalence of protein-energy malnutrition to be determined and to evaluate the efficacy of nutritional intervention and strategies. Easy, quick and economical to perform, it enables staff to check the nutritional status of elderly people when they enter hospitals or institutions and to monitor changes occurring during their stay. Moreover, the MNA is predictive of the cost of care and length of stay in hospital. This publication will be of immense assistance to heads of geriatric teaching units, teachers in nutrition, clinicians general practitioners and dieticians, enabling them to better detect, recognise and start treatment of malnutrition in the elderly. This book offers focused and concise coverage of all issues relating to malnutrition in the field of neurology, and in particular addresses practical aspects of nutritional support from a neurology perspective. In addition to providing basic knowledge on important nutritional concepts (body metabolism, assessment and diagnosis of malnutrition, epidemiology, enteral/parenteral nutrition), detailed information is presented on nutritional support for various neurologic disorders handled in a variety of settings, including the neurointensive care unit. Much consideration is also given to the diagnosis and management of dysphagia, which is a common and highly critical cause of malnutrition in these patients. Finally, the newly developing concept of neuronutrition (or brain foods) – the use of certain nutrients for treatment of neurologic disorders – is discussed. By providing practical solutions to commonly encountered challenges in the nutritional management of neurologic patients, this book will prove a valuable resource for practicing neurologists in a wide variety of fields. It will also be very useful for medical personnel from other specialties such as clinical nutrition, critical care, and geriatric medicine.

BESTSELLER Reflections on hope, survival and the messy miracle of being alive It is a strange paradox, that many of the clearest, most comforting life lessons are learned while we are at our lowest. But then we never think about food more than when we are hungry and we never think about life rafts more than when we are thrown overboard. The Comfort Book is a collection of consolations learned in hard times and suggestions for making the bad days better. Drawing on maxims, memoir and the inspirational lives of others, these meditations celebrate the ever-changing wonder of living. This is for when we need the wisdom of a friend or a reminder we can always nurture inner strength and hope, even in our busy world. A book of timeless comfort for modern minds.

Cachexia may well represent the flip side of the tremendous achievements of modern medicine. The aim of this volume, written by world-renowned scientists, is to provide the best available evidence on the pathogenesis, clinical features and therapeutic approach of cachexia, and to facilitate the understanding of the complex yet unequivocal clinical role of this syndrome, that truly represents a disease, or, more likely, a disease within other different diseases.

This book covers all aspects of out of operating room anesthesia and deep sedation practice. The practical aspects of anesthesia are emphasized, with particular stress on management of un-anticipated adverse events. A concise, yet comprehensive description of relevant basic sciences is also included. Although the contributors are predominantly North American, essential elements of out of OR practice in countries other than the USA are incorporated. Situations like those that contributed to the death of Joan Rivers are addressed with particular emphasis on their recognition, prevention and management. The importance of safety as the key element in providing anesthesia in remote or unfamiliar areas is highlighted and discussed. A lack of accurate documentation is a major drawback in out of OR anesthesia practice and the reader is drawn to the importance of documentation, both from a practical and medico legal standpoint. A separate chapter deals with research and future directions in out of OR anesthesia. Out of Operating Room Anesthesia: A Comprehensive Review, is primarily aimed at all anesthesia providers: anesthesiologists, nurse anesthetists and residents. Specific chapters such as dental anesthesia, anesthesia for ER procedures and sedation for cosmetic procedures will be useful as a reference guide to physicians exposed to brief training in anesthesia during their non-anesthesia residency program.
