There is arguably no field in greater need of a comprehensive handbook than computer engineering. The unparalleled rate of technological advancement, the explosion of computer applications, and the now-in-progress migration to a wireless world have made it difficult for engineers to keep up with all the developments in specialties outside their own

The two-volume set LNCS 8523-8524 constitutes the refereed proceedings of the First International Conference on Learning and Collaboration Technologies, LCT 2014, held as part of the 16th International Conference on Human-Computer Interaction, HCII 2014, in Heraklion, Crete, Greece in June 2014, jointly with 13 other thematically similar conferences. The total of 1476 papers and 220 posters presented at the HCII 2014 conferences were carefully reviewed and selected from 4766 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The total of 93 contributions included in the LCT proceedings were carefully reviewed and selected for inclusion in this two-volume set. The 45 papers included in this volume are organized in the following topical sections: design of learning technologies; novel approaches in eLearning; student modeling and learning behavior; supporting problem-based, inquiry-based, project-based and blended learning.

This practical handbook for designing and teaching hybrid or blended courses focuses on outcomes-based practice. It reflects the author's experience of having taught over 70 hybrid courses, and having worked for three years in the Learning Technology Center at the University of Wisconsin-Milwaukee, a center that is recognized as a leader in the field of hybrid course design. Jay Caulfield defines hybrid courses as ones where not only is face time replaced to varying degrees by online learning, but also by experiential learning that takes place in the community or within an organization with or without the presence of a teacher; and as a pedagogy that places the primary responsibility of learning on the learner, with the teacher's primary role being to create opportunities and environments that foster independent and collaborative student learning. Starting with a brief review of the relevant theory – such as andragogy, inquiry-based learning, experiential learning and theories that specifically relate to distance education – she addresses the practicalities of planning a hybrid course, taking into account class characteristics such as size, demographics, subject matter, learning outcomes, and time available. She offers criteria for determining the appropriate mix of face-to-face, online, and experiential components for a course, and guidance on creating social presence online. The section on designing and teaching in the hybrid environment covers such key elements as promoting and managing discussion, using small groups, creating opportunities for student feedback, and ensuring that students' learning expectations are met. A concluding section of interviews with students and teachers offers a rich vein of tips and ideas.

Provides practice pages and ready-to-use activities which support national and state standards. Each unit includes objectives, assessments, math-related terms, and extensions.

This book presents a general survey of American fiddling. the author's intent is to teach the basics of fiddling by beginning with essential bowings and fingerings, and progressing from simple to more complex renditions of tunes. As fiddling is an aural tradition and fiddlers from different parts of the country play a given tune in many ways, tunes included in this book are offered only as themselves. the author has attempted to present usable fingerings, bowings and explanations of each of the 49 tunes in this book. the end result is the most widely-used fiddle method available! the CD

is in split-track format, allowing the fiddler to play with the fiddle solo, guitar and/or fiddle accompaniment, or both! Contains every tune in the book.
