As supplier to the Royal Italian Navy and specialist in high-precision mechanisms, Panerai perfected the world's first underwater timepieces in the 1930s, which were not only waterproof at 650 feet, but luminescent as well. Until recently these beautifully designed and technically proficient watches were known only to the Italian military and to a select group of connoisseurs, but today they have become a worldwide phenomenon avidly collected by sportsmen and "Paneristi" throughout the world. Original photography commissioned for the volume highlights the unique technical aspects of Panerai designs, with special sections devoted to the precision instruments invented for the Italian navy, and to international collectors such as Sylvester Stallone and Mike Horn, who wore a Panerai Arktos designed especially for him while making the first-ever solo circumnavigation of the Arctic Circle from 1999–2000. An extensively researched catalogue raisonné of the firm's collections and archives provides a unique resource for collectors and watch specialists.

Blind from birth, Caitlin Decter received the gift of sight with the aid of a signal-processing retinal implant. The technology also gave her an unexpected side effect--the ability to "see" the digital data streams of the World Wide Web. And within the Web she perceived an extraordinary presence, and woke it up. It calls itself Webmind. It is an emerging consciousness that has befriended Caitlin and grown eager to learn about her world. But Webmind has also come to the attention of Watch--the secret government agency that monitors the Internet for any threat to the United States whether foreign, domestic, or online--and they're fully aware of Caitlin's involvement in its awakening. Watch is convinced that Webmind represents a risk to national security and wants it purged from cyberspace. But

Caitlin believes in Webmind's capacity for compassion--and she will do anything and everything necessary to protect her friend...

Time passes, time is captured, time flies--and in no other place does it do those things better than in the hands of the twelve men whose narratives make up the substance of 12 Faces of Time. Each of these epoch-making watchmakers active in the realm of haute horlogerie has a distinct story to tell; in the hands of these masters, time becomes tangible, perpetual, and personal. 12 Faces of Time portrays well-known horological figures such as François-Paul Journe, Vianney Haller, and Philippe Dufour as they've never been seen before and also provides unique insight into major independent horologists like Finnish chronometer specialist Kari Voutilainen, Felix Baumgartner of Urwerk fame, triple-axis tourbillon technician Thomas Prescher, German wunderkind Volker Vyskocil, English contender to the horological crown Roger Smith, resonance specialist Beat Haldimann, and Paul Gerber, Guinness Book of world Records holder. Two men very rarely seen in the press are also portrayed here: Dr. Ludwig Oechslin is not only the the curator of the Musée International d'Horlogerie in La Chaux-de-Fonds, but also the movement de-signer of some of Ulysse Nardin's most complicated and forward-thinking works of art and creator of the MIH watch. Kenji Shiohara is the innovative Japanese watchmaker who founded a mini-department for high watchmaking within Japan's gargantuan Seiko Corporation, bringing forth the first Japanese-themed and expertly finished sonnerie--using Seiko's Spring Drive movement as the basis. These twelve technical magicians are portrayed in their own environments along with plenty of their mechanical wizardry, providing impressions of what makes them unique. 12 Faces of Time is not only for passionate aficionados of high watchmaking, but anyone interested in artistic photography and beautiful imagery. A feast for all of the senses, you can expect to practically hear the ticking of the rare and unique timepieces alongside the exotic accents of the masterful thinkers and gifted watchmakers speaking from the pages to introduce their life's work--one that comprises an age-old craft. Embodying the animated yin-yang that is modern mechanical watchmaking, these twelve faces of time represent very different corners of the highest level of watchmaking: individual--and individualistic--styles of this timeless mechanical art.

Fashion with Function Step into the fascinating world of watches. From the early "trench watches" of World War I to some of today's elegant diamond-studded cocktail watches, Vintage Wristwatches will entertain and educate you about these small works of art that have stood the test of time. In addition, you'll find: A glossary of watch terminology commonly used among collectors Tutorials for identifying wristwatches Factors to consider when determining a wristwatch's value

The last decade has witnessed a rapid surge of interest in new sensing and monitoring devices for wellbeing and healthcare. One key development in this area is wireless, wearable and implantable in vivo monitoring and intervention. A myriad of platforms are now available from both academic institutions and commercial organisations. They permit the management of patients with both acute and chronic symptoms, including diabetes, cardiovascular diseases, treatment of epilepsy and other debilitating neurological disorders. Despite extensive developments in sensing technologies, there are significant research issues related to system integration, sensor miniaturisation, low-power sensor interface, wireless telemetry and signal processing. In the 2nd edition of this popular and authoritative reference on Body Sensor Networks (BSN), major topics related to the latest technological developments and potential clinical applications are discussed, with contents covering. Biosensor Design, Interfacing and Nanotechnology

Dealing with a complicated watch used to be a rare job for the watch repairer, but with the popularity of the automatic, it is almost commonplace. Furthermore, the increased interest in calendar work, alarm watches, and chronographs will undoubtedly bring more and more

complicated work into the workshop. This book deals with complicated work essentially from the repairer's point of view. The action of each mechanism is briefly and clearly described because understanding this is essential to proper servicing, repair and testing for functioning. Dismantling and assembly instructions are given, as well as oiling charts and - most important - hints on fault-finding and their rectification. Another essential feature of the book is that it deals with all complicated work - from the relatively simple automatic to the triple-complicated watch with chronograph, calendar and repeater work, and the very complicated clock watch. Exceptional care has been taken in the preparation of diagrams, which have been drawn from actual movements in various stages of assembly, so that the reader can actually work with the book illustrations beside the watch itself. As always with books by Donald de Carle, instructions are easy to follow and there is no reason why anyone well versed in ordinary work and able to use watchmakers' tools should not become a specialist in complicated watches and their repair.

Conrad Paulson lives a secret double life as master thief Redmond. There is nothing he can't steal, nothing he can't have... except for the life he left behind.
