Borders, Bandits, and Baby Wipes is Tarazi's incredible tale of what comes with life on the go and off the map. It's a dive into cultures and cop cars, big thoughts and meltdowns, and what it means to be human while covered in a constant sheen of awe and grime. The U.S. government has a habit of supporting brutal (and comically outrageous) dictators. This book offers 20 current examples, together with some background on historical patterns, some explanation for why this happens, and a proposal to put an end to it. As documented here, the U.S. government arms, trains, and funds all variety of oppressive governments, not just dictatorships. The choice to focus on dictatorships in this book was not made merely to shorten the list. Rather, that choice was made because the U.S. government so often claims to be opposing dictators through the promotion of democracy. Frequently, the atrocious conduct of a dictator is a central selling point for a new war or coup or program of sanctions. Yet neither Saddam Hussein's horrific (though fictional) removal of babies from incubators nor Manuel Noriega's cavorting in red underwear with prostitutes while snorting cocaine and praying to voodoo gods (as the New York Times solemnly informed us on December 26, 1989) rivals the moral horror or the glorious goofiness of the 20 tyrants described in this book. No one will be able to read this and believe that a primary purpose of U.S. foreign policy is to oppose dictatorships or to

promote democracy. If it is important to you to try to believe that, you've probably already stopped reading.

In writing this book, it is my wish to provide unmarried pregnant girls with first-hand insight on what they may or may not expect by sharing my personal thoughts, behaviors, and outcomes. I'm hoping they will find comfort and a sense of mutual commonness in reading this book. It is simply a written account of my life's experience, thus far, as a single parent. I initially began writing this book for therapeutic reasons. It was a way for me to visualize my life's circumstances so I can put them into perspective. By writing down bits and pieces of my life, I was able to analyze and evaluate the undetermined path I was on and ensure its congruency with my short- term and long- term goals that I established prior to my son's birth. This book is my gift in return or all that I have gained from reading about other parents' trials and tribulations. It is my hope that other girls and/ or struggling single parents, who find themselves in the same situation, will know there is a light at the end of their tunnel.

The Science Subcommittee began its oversight of the implementation of the High-Performance Computing Act of 1991 by focusing on the establishment of the National Research and Education Network (NREN), which will evolve out of the current internet, the National Science Foundation's (NSF) NSFNET. The policy issues under discussion were: providing a level playing field for network services providers; ensuring that the network is responsive to user needs; providing for effective network management; determining the level of consultation that has occurred between the NSF, the network user, and provider communities during the course of developing the policies for governance and operation of the NSFNET backbone; and moving toward the long-term vision for the NREN, including the appropriate roles of the public and private sectors. Included in the hearing report are statements from Bob Traxler and Jerry F. Costello of the House Subcommittee on Science and testimony from the following witnesses: Eric Hood, Federation of American Research Networks and Northwestnet, Inc.; Douglas E. Van Houweling, Merit Network, Inc. and the University of Michigan, Ann Arbor; Mitchell Kapor, Commercial Internet Exchange Association and Electronic Frontier Foundation; Michael M. Roberts, Educom; William L. Schrader, Performance Systems International, Inc. Also included are a statement by A. Nico Habermann and Stephen S. Wolff, National Science Foundation; the Subcommittee and Full Committee markups of H.R. 5344, Amendment to the NSF Act of 1950; and an additional statement submitted for the record by E. Michael Staman, CICNet. (ALF)

In Closer he looks at the world through a telescopic lens, honing in on specifics to people, their cultures and their environments.
