

commencement speech in which Jobs urges idealistic grads to chase their dreams, Newport takes issue with that advice, claiming that not only is this advice Pollyannish, but that Jobs himself never followed his own advice. From there, Newport presents compelling scientific and contemporary case study evidence that the key to one's career success is to find out what you do well, where you have built up your 'career capital,' and then to put all of your efforts into that direction.

Have you ever felt invisible? Taken advantage of? Reluctant or unable to articulate what you really want? If so, join the club. The nice girls club that is. Nice girls are those who behave the way others want or expect them to, sacrificing their own needs in the process. Winning women, on the other hand, aren't afraid to stand up to difficult people, set appropriate boundaries, and negotiate for the things that matter most. Lois Frankel and Carol Frohlinger offer indispensable tools, tactics and strategies to guide you in moving from nice girl to winning woman. By the time you finish reading this book you will know how to: * Get your husband and children to do their share of the household chores (without being made to feel like a nag!) * Negotiate with a salesperson to reduce a fee, waive a surcharge or honor a store credit * Decline a friend's request to do an unreasonable favor without damaging the relationship * Confront a colleague who isn't doing his or her fair share of work or taking all the credit * ... and so much more! WHAT PEOPLE ARE SAYING "This book is a treasure! It's filled with down-to-earth strategies for building a fulfilling life." Anne Fisher, Ask Annie columnist, CNNmoney.com "Frankel and Frohlinger break down why so many women go through life harboring resentment and frustration: It's about respect and no one is going to hand it to us." Carolyn Kepcher, former Trump executive vice president and bestselling author. "You don't have to be a drop dead diva to love this book. Every woman can win the life she wants by following its sage advice." Josh Berman, creator of Drop Dead Diva "I've read all the Nice Girls books and now a gem in the series appears - this one is the crown jewel!" Hamida Belkadi, CEO of De Beers, North America "Frankel and Frohlinger have done it again! Nice Girls Just Don't Get It is easy to read, practical, and crammed with great advice for all women. It's a gentle wake-up call and powerful resource for everyone from teenagers to top executives. Brilliant!" Liz Cornish, author of Hit the Ground Running: A Woman's Guide to Success for the First Hundred Days on the Job

This is a how-to-fix-it book about populism, polarization and tribalism, which are tearing our democracy apart - and can ruin our economy if we become couch-potatoes. Venezuela is populism's canary in the coal mine. Chavez rode a wave of racial, populist resentment to power and destroyed Venezuela's democracy and then the economy. Twenty-two years later, Chavez cronies are still in power looting the national treasury as a poor, unemployed and sickly population starves or flees Venezuela as refugees. Few in Venezuela saw this disaster coming in Chavez's 1998 campaign or his first years in office. Likewise, only some Americans realize what can happen to the U.S. democracy no less the rule of law, the economy, trade, and family income nationwide if populism goes its merry way in the US as it did in Venezuela. American populism is dismembering systems that produced the most free and prosperous political economy invented by humankind. How to preserve democracy and prosperity is not just a political question for a toadying, supine Republican Party or a confused and scared Democratic Party in the 2020 election. Fundamental institutions need to step up and communicate to society in TV and the internet not just print - because America's not doing much reading anymore. Media - especially TV and the internet - need to cover the news with factual insight instead of pandering, entertaining and feeding ignorance, bias and isolated cults of violence spurred by mainstreamed conspiracy nonsense. Where is Edward R. Murrow? Education - especially in law and science - need to get back to basics, the facts, the reading, writing and arithmetic of the modern age. A whole generation is losing the discipline of thinking and communicating in depth to others. America is fragmenting. We need the verified, sourced facts of life in context. Business needs to explain to people that the only way to address inequality is for all Americans to have some ownership in enterprises big and small; and that every locality needs to explain to its population continuously the inter-dependent, international nature of all the material things in their community which provide the jobs, income, savings and future of that locality. Government needs to explain to citizens what it does, how it does it, and why it does it, and ask for citizen feedback via social media, internet reported on TV, so citizens see the value of government and what taxes pay for, which they are blissfully ignorant of at the moment. Most importantly, the society in unison needs to address wealth and income inequality, which is at the root of populism and polarization. Democracies cannot survive in a one-person-one-vote democracy living side-by-side a top 1% wealth equals the bottom 99% wealth economy. The solution is not a wealth tax but an investment of the 1% in the 99%, family by family, as in the Shark Tank TV program which should be replicated for every TV station in America telling continuous case stories. That is a win-win solution for 100% of the American people. America is in trouble. Old tragedies - the Indian genocide, slavery and Jim Crow, and the malign view of immigrants -- are coming home to roost. Opportunistic populists are using these unaddressed horrors to get and keep power over cult-like followers who hear, see and say no evil is there. To recapture the spirit of the union, America needs to get beyond Trump, who is just a symptom of the malady. The real story is not about Trump. It's about us, and our efforts to get healthy again. The politicians are not going to do this. We citizens are going to do it, or else we go into the dark.

"Donald Trump's rapid - and seemingly improbable - ascension from reality show star to polarizing president threw into question many assumptions about how our media and political worlds work. His habit of lying, history of racist statements, and disdain for conventions upended traditional journalist-elite relations. Taking an expansive view of the contemporary media and political environment during the Trump years, News After Trump portrays a media culture in transition. As journalism's very relevance comes to be increasingly questioned, we focus on how different actors - from Trump to small-town newspaper editors - use their cultural power to define journalism, assess its value, and question what the news should look like. The chapters chronicle how Trump and his allies turned attacks on journalists into a central component of a rightwing populist formula, with journalists positioned as just one more self-interested, out-of-touch elite. Over time, this anti-press rhetoric escalated, with Trump regularly debasing journalists as the enemy of the people. While journalists responded by falling back on cherished norms of objectivity and neutrality to trumpet their democratic role, many among their ranks questioned whether past commitments still had value in a changed media culture and if their reporting practices did more harm than good. To move forward, News After Trump does not advocate for a nostalgic return to the past, but instead argues for a journalism that is more assertive in speaking in a moral voice on behalf of communities, more comfortable in rendering judgments, and more self-aware of its shortcomings"--

The growth of the Internet has changed almost every aspect of society, and social activism is no exception. Circulating petitions and organizing rallies is easier than ever, but so is the illusion of creating change without putting in effort. Readers learn the ways activism has changed in the Internet era. The informative text is supplemented with detailed charts and annotated quotes

presenting multiple points of view. By learning more about online activism, young adults can become more informed about how to take a stand on issues they are passionate about.

When Donald Trump threw his hat in the ring for the Republican nomination in June, 2015, no one gave him a snowball's chance. As time passed, however, rival after rival dropped out of the race, until he was alone at the top at the beginning of May, 2016. How did an accomplished businessman, but a newcomer to politics, win a real-life version of "The Apprentice?" "Trump's Tricks" offers a psychologist's view of the tactics that were used to first attract attention in a crowded field, and then to defend against and counterattack all rivals and naysayers. The author describes the maneuvers that Donald Trump used to change politics and, perhaps, our society forever.

Political Chronicles 2016/2017 is a book of poetry that captures the climate of the 2016 presidential election and subsequent continuous post election drama. The crazy and oftentimes deplorable behavior that Trump displayed during and after the campaign is directly and humorously confronted in this collection of poems. At 99 years of age, Tycine Randolph Webb has a way of "telling it like it is" that will have you laughing out loud so much that you will actually feel better in light of what is happening right before our eyes in this country. In the first section, poems like "Credentials" address the questions that we all had about the qualifications of Trump as a presidential candidate. In it she says, "When applying for a position, You need a resume-a good disposition, The man's credentials we need to review, You might have missed a clue." The second section is about the first days post-election. In poems like "Hope Fades" she questions Trump's ability to lead the nation in a positive direction. In it she says, "if hoping for a future that's bright, So far nothing looks right" The last section is an ode to Obama, Michelle, and Hillary and how their leadership and professionalism will be missed. Hang on for books 2, 3,.....for as long as Trump's in office, the antics will continue and the poems will keep flowing!

In this urgent and timely book, Patrick Cockburn writes the first draft of the history of the current crisis in the Middle East. Here he charts the period from the recapture of Mosul in 2017 to Turkey's attack on Kurdish territory in November 2019, and recounts the new phase in the wars of disintegration that have plagued the region, leading to the assassination of Iranian General Solemani. Cockburn offers panoramic on-the-ground analysis as well as a lifetime's study of the region. As author of *The Rise of Islamic State*, and *the Age of Jihad*, he has proved to be leading, critical commentator of US intervention and the chaos it has wrecked/ And here he shows how, since Trump entered the White House promising an end to the Forever War, peace appears a distant possibility with the continuation of conflict in Syria, Saudi Arabia's violent intervention in the Yemen, the fall of the Kurds, riots in Baghdad, and the continued aggression towards Iran. While ISIS has been defeated, it is not clear whether it has disappeared from the region. Trump's policies has appeared to pour petrol on the flames, emboldening the other superpowers involved in the proxy wars. Following the collapse of the deal with Iran, and the threat of war crimes, is a new balance of power possible?

This political memoir exposes the weaknesses of democratic culture in the United States and suggests ways to strengthen it in the face of rising authoritarianism. What happens when a democratic theory professor gets involved with the Democratic Party? In this political memoir, Claire Snyder-Hall shares lessons learned from eight years in party politics. She tells the story of organizing a grassroots campaign for state senate in a district dominated by good ole boys, of a political milieu in which a letter to the editor results in a smear campaign and broken friendships, and of battling a party establishment more concerned about shoring up its own power than engaging everyday people or fighting for their needs. Using an intersectional understanding of identity, Snyder-Hall unpacks the ways in which gender, class, and sexuality affect political campaigns, and offers advice for progressives. She also draws on insights from Machiavelli, Rousseau, Marx, and Gramsci to argue that a democratic republic requires a politically engaged populace, a democratic culture, and economic justice, and this can only be achieved when people defend democratic values in the face of rising authoritarianism, stand up to bullies, transform their political consciousness, and create a party willing to fight for the 99%. Claire Snyder-Hall is an independent scholar who received her PhD in Political Science from Rutgers University and is the author of *Gay Marriage and Democracy: Equality for All*.

President Trump's former White House Press Secretary and Communications Director analyzes our current political moment through the lens of politics and culture, arguing that President Trump has put the country back on the right track and that he needs to be elected again in 2020. When it was announced that Sean Spicer would be the newest guest on ABC's *Dancing with the Stars*, he was promptly attacked by countless liberal media institutions. Apparently, they'd rather see him crawl under a rock forever than have a little fun on television (while raising money for charity). And that was only a small example. All over the country, liberals are attacking conservatives with the kind of fervor once reserved for hardened criminals. It's a zero sum game -- either you're with them one hundred percent, or you're the enemy. Whether you're in politics, media, academia, or entertainment, it's the same story. As one of the few people who's played a small part in all of those worlds, Sean Spicer has a unique perspective on the methods used by the left to shut down conservative voices. He's been parodied on SNL, ripped apart on the nightly news, and protested on college campuses, all for doing his job. Outside of the left's bubble, however, he's been able to transition from politics to entertainment very well, and he's got huge numbers of supporters. In *Leading America*, he writes about all the ways President Trump has fought back against the Left, and examines all the ways conservatives can take a stand to uphold their rights and values.

Donald Trump won a significant victory in Iowa in 2016. Although Iowa was carried by Barack Obama in 2008 and 2012, Trump won the popular vote in 93 of its 99 counties, 32 of which were carried by Obama in 2012. What explains this significant victory, in which a third of Iowa's counties were flipped? Through a mixed-methods approach, this volume demonstrates that Trump's electoral victory was shaped by three key factors: firstly, the electorate's desire for "change" in Washington, D.C.; secondly, Trump's successful appeals to both the Republican base and white, working-class voters who had previously supported Barack Obama; and thirdly, Iowa's conservative ideological tendency regarding immigration and race. While contributing to emerging literature on the 2016 presidential elections, this book also serves to aid educators with a published resource on Iowa's electoral politics.

A detailed description of the meltdown of the media/Democrats and Rinos the night of the Trump election in 2016.

ABC/CBS/CNN/FOX/MSNBC/NBC were totally destroyed by their loss. They had convinced America that Clinton had a 99% chance to win and when she lost to Trump - thirty states to twenty states - they became deranged with Trump hate. Hour by hour you can watch them meltdown. It is paraphrased and detailed here. Trump Derangement Syndrome is dangerous - it could destroy the Democrats.

An appealing new guide to critical thinking for college students.

These days it's hard to know what to believe. Is the news on television and the internet real or fake? How can you tell? This comprehensive guide helps readers sift through the many types of information out there. It gives guidelines for deciding which sources can be believed. Using a wealth of examples from recent news, politics, and science, it teaches readers how to distinguish fact from fiction and truth from lies. It gives suggestions on how to function in a "posttruth" world.

In 2020, Donald Trump is elected to a second term as president with 99% of the popular vote. Even he himself does not really believe that. As the world falls further into chaos, an alien race decides to intervene and takes over the world in 2021. Nuclear conflicts and anticipated fast rising sea-levels created havoc with the plans they had for humanity and

someone whom we see as monumentally unfit for his job?? How is it that so many people were beguiled by a vision of hate and discord, of intolerance and violence, of authoritarianism and lawlessness, of coarseness and mendacity, and of simple basic meanness? In light of all Trump's transgressions, listed in Chapter One from "a" to "z," how is it that people remained so devoted to this man, that they would professedly "die for him"? That is the subject of this book. Several years ago, I published *Violence and Religious Commitment: Implications of Jim Jones's People's Temple Movement*. Contributors to that book include leading experts in the field of extremist cults. Now, I bring their expertise to bear in a demographical, sociological, and psychological analysis of what I term the "American Hitler" and his bewildering cult of followers.

The Trump administration looks to be adopting a more muscular and self-interested security policy in the Asia-Pacific.

Confrontational on China: Trump and his advisers have outlined a hard line towards China on most bilateral issues, and view Beijing as an aggressive strategic competitor that needs to be deterred with US strength. **Supportive but transactional on allies:** the administration will uphold Asian security guarantees at the same time as more strictly scrutinising the US interests at stake. **The United States will seek greater burden-sharing and "wins" from allies,** including initiatives to create new US jobs. **A military-first rebalance:** the administration will advance the security elements of President Obama's "pivot to Asia" while attaching little importance to engagement with Southeast Asia or the rebalance's original liberal internationalist goals. **Changes in US Asia policy will likely produce more volatile relations with competitors,** and potentially between Washington and its allies and partners. **Instability in US-China relations:** Trump's abrasive policies, particularly on Taiwan, are likely to deepen friction with China and increase the risk of mixed signals and communication breakdowns. **Disunity and fragility in the US alliance network:** Trump's "America first" approach to Asia is at odds with the policy preferences and public opinions of most regional allies, creating potential constraints on coordination between Washington and its Asian alliance network. **Divergence between Australia and Japan:** Japan's anxiety about being abandoned by the United States may see it rush to embrace Trump's Asia policy, while Australia's concern about being entrapped in potential US military endeavours could see it keep some distance from Washington. **This may produce opposing dynamics that could weaken bilateral ties and trilateral cooperation.** Australia needs to adopt a more active regional security policy to weather these destabilising shifts. **It should: Assist the United States in articulating policy priorities on China. Actively work to reduce possible misperceptions between the United States and China. Work multilaterally with Asian allies and partners to communicate shared interests, opportunities, and redlines to President Trump's cabinet. Coordinate US alliance management strategies with Japan. Build greater resilience into the US Asian alliance network by establishing new trilateral partnerships with Southeast Asia, starting with an Australia-Indonesia-Japan grouping. Assume a more active leadership role in Southeast Asia by independently contributing to a stable and liberal regional order.**

This book aims to recover from ancient and modern thinkers valuable arguments about statesmanship, leadership, and tyranny which illuminate reassessments of political science and practice after the election of Donald Trump. Like almost everyone else, contemporary political scientists were blind-sided by the rise of Trump. No one expected a candidate to win who repeatedly violated both political norms and the conventional wisdom about campaign best practices. Yet many of the puzzles that Trump's rise presents have been examined by the great political philosophers of the past. For example, it would come as no surprise to Plato that by its very emphasis on popularity, democracy creates the potential for tyranny via demagoguery. And, perhaps no problem is more alien to empirical political science than asking if statesmanship entails virtue or if so, in what that virtue consists: This is a theme treated by Plato, Aristotle, and Machiavelli, among others. Covering a range of thinkers such as Confucius, Plutarch, Kant, Tocqueville, and Deleuze, the essays in this book then seek to place the rise of Trump and the nature of his political authority within a broader institutional context than is possible for mainstream political science.
