

A 88 User Manual

The Gross Motor Function Measure (GMFM) Self-Instructional Training CD-ROMs enable practitioners to train independently at their own pace as reliable users of the Gross Motor Function Measure in print format. They include details of the administration and scoring of all 88 items in the GMFM, as well as several video examples for each, chosen to reflect a variety of scores and to highlight significant training principles. This package is aimed at professionals using the GMFM for clinical or research purposes who want to understand the main testing, scoring and interpretation issues. Also available: Gross Motor Function Measure (GMFM-66 and GMFM-88) Users Manual 2002 1-898-68329-8 Hardback \$80.00M

Cooperatively written, the second edition further enhances reader's familiarity with the 2004 edition of NFPA 921. Provides plain language explanations, suggestions for NFPA 921/interFIRE VR training, important questions at the end of each chapter, and hands-on activities throughout the text.

So, go ahead and click on the buy now! button to get started.

To train your ear, one must learn to distinguish sounds. Acquiring Perfect Pitch requires in addition to remember pitches. In early childhood we collect the vast part of our relevant sound memory by imitating the sounds with our vocal cords. However, our brain doesn't stop there. At a later age we can still learn a new foreign language. Three new method's to acquire Absolute Pitch and Relative Pitch, supported by software feedback, are presented in this book. The first method, the Singing Funnel method, lets you acquire Absolute Pitch like a foreign language. The second method, the Octave Anchor Pithes method helps you to orientate yourself in the pitch realm. The last method, the Interval Overtone method, improves your interval hearing. The Gross Motor Function Measure (GMFM) is a clinical assessment tool developed to evaluate motor function, and change in the function over time, in

children and youth with cerebral palsy (CP).

The third edition of the Gross Motor Function Measure (GMFM-66 & GMFM-88) User's Manual has retained the information contained in the original 2002 and 2013 publications which included the conceptual background to the development of the GMFM, and the administration and scoring guidelines for people to be able to administer this clinical and research assessment tool appropriately. This includes information on the development and validation of two abbreviated methods of estimating GMFM-66 scores using the GMFM-66- Item sets (GMFM-66- IS) and the GMFM-66- B&C (Basal & Ceiling) and a chapter providing a longitudinal case illustration of how the measure and the short forms of the GMFM can be applied and interpreted in clinical practice. The new edition includes information and an Appendix on the updated version of the Gross Motor Ability Estimator scoring program (GMAE-3), which is available through the GMFM App+ (see the CanChild website at <https://www.canchild.ca/en/shop/38-the-gross-motor-function-measure-app>).
