Corporate social responsibility (CSR) continues to grow as an area of interest in academia and business. Encompassing broad topics such as the relationship between business, society, and government, environmental issues, globalization, and the social and ethical dimensions of management and corporate operation, CSR has become an increasingly interdisciplinary subject relevant to areas of economics, sociology, and psychology, among others. New directions in CSR research include advanced 'micro' based investigations in organizational behaviour and human resource management, additional studies of environmental social responsibility and sustainability, further research on "strategic" CSR, connections between social responsibility and entrepreneurship, and improvements in methods and data analysis as the field matures. Through authoritative contributions from international scholars across the social sciences, this Handbook provides a cohesive overview of this recent expansion. It introduces new perspectives, new methodologies, and new evidence from a range of disciplines to encourage and facilitate interdisciplinary research and global implementation of corporate social responsibility.

interest in an interdisciplinary engagement of law with social sciences - including sociology, anthropology, political science, geography, and political theory. Closely tied into the substantive transformation that many legal fields are undergoing is the observation that many of these developments are driven by changes in an increasingly global legal practice today. The concept then, of 'transnational law' aims at capturing the distinctly border- crossing nature even of those legal fields which had for the longest been time been seen as having merely 'domestic' relevance. This shift also requires a conscious effort among law school classroom instructors, casebook authors, and curriculum reformers to adapt their teaching content to these circumstances. As the authors of this Handbook make clear, this adaptation requires a close dialogue between a scholarly investigation into the transnational 'concept of law' and the challenges faced by practicing lawyers, be that as solicitor, in-house counsel, as judges, or as bureaucrats in a globalized regulatory and socio-economic environment. While the main thrust is on the transnationalization of legal doctrine and legal theory, with a considerable contribution from and engagement with social sciences, the Handbook features numerous reflections on the relationship between transnational law and legal practice.
