Written by various experts in the field, this volume of thirteen original essays explores some of the most significant theoretical and practical fault lines and controversies in seventeenth-century English literature. The turn into the twenty-first century is an appropriate time to take stock of the state of the field, and, as part of that stocktaking, the need arises to assess both where literary study of the early modern period has been and where it might desirably go. Hence, many of the essays in this collection look both backward and forward. They chart the changes in the field over the past half century, while also looking forward to more change in the future.

The Oxford Handbook of Jurisdiction in International Law provides an authoritative and comprehensive analysis of the concept of jurisdiction in international law. Jurisdiction plays a fundamental role in international law, limiting the exercise of legal authority over international legal subjects. But despite its importance, the concept has remained, until now, underdeveloped. Discussions of jurisdiction in international law regularly refer to classic heads of jurisdiction based on territoriality or nationality, or use the SS Lotus decision of the Permanent Court of International Justice as a starting point. However, traditional understandings of jurisdiction are facing new challenges. Globalization has increased the need for jurisdiction to be applied extraterritorially, non-State forms of law provide new theoretical challenges and intersections between different forms of jurisdiction have become more intricate. This Handbook provides a necessary re-examination of the concept of jurisdiction in international law through a thematic analysis of its history, its contemporary application, and how it needs to adapt to encompass future developments in international law. It examines some of the most contentious elements of jurisdiction by considering how the concept is being applied in specific substantive and institutional settings.

Critical Management Studies (CMS) has emerged as a movement that questions the authority and relevance of mainstream thinking and practice. Critical of established social practices and institutional arrangements, it challenges prevailing systems of domination and promotes the development of alternatives to them. CMS draws upon diverse critical traditions. Of particular importance for its initial articulation was the thinking of members of the Frankfurt School of Critical Theory. From these foundations, CMS has grown into a pluralistic and inclusive movement incorporating a diverse range of perspectives - ranging from labour process theory to radical feminism. In recent times, a set of ideas broadly labelled 'poststructuralist' have been developed to complement and challenge the insights of Critical Theory, giving new impetus for scholars seeking to challenge the status quo and articulate a more inclusive and humane future for management practice. The Oxford Handbook of Critical Management Studies provides an overview of theoretical approaches, key topics, issues, and subject specialisms in management studies, as well as a set of reflections on the progress and prospects of CMS. Contributors are all specialists in the respective fields and share a concern to interrogate and challenge received wisdom about management theory and practice. Given the rapid growth of the CMS movement, its ever increasing theoretical and geographical diversity and its outreach into the public sphere, The Oxford Handbook of Critical Management Studies is a timely publication. In addition to UK contributors, where CMS has developed most rapidly, there is strong representation from North American contributors as well as from areas where CMS has taken hold more recently, such as Australasia.

Laura Wilder fills a gap in the scholarship on writing in the disciplines and writing across the curriculum with this thorough study of the intersections between scholarly literary criticism and undergraduate writing in introductory literature courses. Rhetorical Strategies and Genre Conventions in Literary Studies is the first examination of rhetorical practice in the research and teaching of literary study and a detailed assessment of the ethics and efficacy of explicit instruction in the rhetorical strategies and genre conventions of the discipline. Using rhetorical analysis, ethnographic observation, and individual interviews, Wilder demonstrates how rhetorical conventions play a central, although largely tacit, role in the teaching of literature and the evaluation of student writing. Wilder follows a group of literature majors and details their experiences. Some students received experimental, explicit instruction in the special topoi, while others received more traditional, implicit instruction. Arguing explicit instruction in disciplinary conventions has the potential to help underprepared students, Wilder explores how this kind of instruction may be incorporated into literature courses without being overly reductive. Taking into consideration student perspectives, Wilder makes a bold case for expanding the focus of research in writing in the disciplines and writing across the curriculum in order to grasp the full complexity of disciplinary discourse.

Critical Approaches to Food in Children's Literature is the first scholarly volume on the topic, connecting children's literature to the burgeoning discipline of food studies. Following the lead of historians like Mark Kurlansky, Jeffrey Pilcher and Massimo Montanari, who use food as a fundamental node for understanding history, the essays in this volume present food as a multivalent signifier in children's literature, and make a strong argument for its central place in literature and literary theory. Written by some of the most respected scholars in the field, the essays between these covers tackle texts from the nineteenth century (Rudyard Kipling's Kim) to the contemporary (Dave Pilkey's Captain Underpants series), the U.S. multicultural (Asian-American) to the international (Ireland, Brazil, Mexico). Spanning genres such as picture books, chapter books, popular media, and children's cookbooks, contributors utilize a variety of approaches, including archival research, cultural studies, formalism, gender studies, post-colonialism, post-structuralism, race studies, structuralism, and theology. Innovative and wide-ranging, Critical Approaches to Food in Children's Literature provides us with a critical opportunity to puzzle out the significance of food in children's literature.

In this splendid introduction to the elusive rhetorical device central to the New Testament picture of Jesus, Charles Hedrick explores the nature of the parable and its history of use. He asks basic questions such as, what is a parable? is Jesus really the author of the parables? and what does a parable mean? and then reviews a range of sources--from Aesop's fables to modern New Testament scholarship--to answer them. He also surveys the various ways the parables have been approached in literary criticism throughout history, giving specific examples of each method and delineating their strengths and weaknesses.

This book participates in the ongoing debate about the alleged "death of theory" and the current post-theoretical condition, arguing that the "finitude" of theoretical projects does not mean "end", but rather contingency and transformation of thinking, beyond irreconcilable doctrines. Contributors from different cultural and scholarly backgrounds and based in three different continents propose new areas of investigation and interpretive possibilities, reopening dialogues with past and present discourses from a plurality of perspectives and locations. After a first section that reassesses the status and scopes of critique, theory, and literature, the book foregrounds new or neglected critical vocabulary, literary paradigms, and narrative patterns to reread texts at the intersection with other branches of the humanities—history, philosophy, religion, and pedagogy. It then explores geopolitical, cultural, and epistemological domains that have been historically and ideologically overdetermined (such as postsocialist, postcolonial, and cosmopolitan spaces), recodifying them as unstable sites of both conflicts and convergences. By acknowledging the spatio-temporal and cultural delimitations of any intellectual practice, the book creates awareness of our own partiality and incompleteness, but treats boundaries as zones of contact, exchange, and conceptual mobility that promote crossings and connections.
