Named "Christian" to avoid hassles (some things never change), this is the most famous, the most celebrated astrology book in the English language. It has been prized by students ever since its first publication in 1647. The Horary Astrology in these pages, in the hands of a master, is no mere parlour game. It is demanding and precise, combining science and art. Properly used, it will give answer to any well-defined question. William Lilly, famous throughout England for his almanacs & forecasts (he predicted London's Great Fire of 1666), lived during the English Civil War & was a minor historical figure in it. Into his studio came the rich and poor, nobles and commoners, with problems great and small. This new edition restores Lilly's original page layouts, with marginalia. Modern spelling throughout, this edition includes Lilly's bibliography, his original index & a new glossary. Also includes his original woodblock charts, and their modern versions. This is Lilly's great work as he himself knew it. In this volume: Book 1, An Introduction to Astrology, containing the use of an ephemeris; the erecting of a scheme of heaven; nature of the twelve signs of the Zodiac, of the planets; with a most easy introduction to the whole art of astrology. Book 2, The Resolution of All Manner of Questions, by a most methodical way, instructs the student how to judge or resolve all manner of questions contingent unto man, viz, of health, sickness, riches, marriage, preferment, journeys, etc. Some 35 questions inserted and judged.

Making life-altering decisions using astrology, in general, and the zodiac and horoscopes, in particular, can be extremely complicated for the average person, who is not an astrologer and thus, not acquainted with celestial (or planetary) movement and influences. Most of the information provided by astrologers mean little or nothing to the average person who is (simply) more interested in, "will I be successful," or "will I find true love," etc. Astrology has the ability to be a major asset in our lives. The key to astrology is not in only understanding the effects that the celestial (planetary) influences are having on us and the people associated with us, but the effect the influences are having on the environment around us and those we are targeting with our concerns. Only then can we attempt to make decisions that are advantageous to our and their existence. It is enough to state that Astrology existed for many centuries prior to the Christian era, about which time it appears to have been taught chiefly by tradition, being handed down from father to by word of mouth. There is no good evidence of any perfect system of Astrology having been reduced to written rules, depending on mathematical principles, before the first century; though Sir Isaac Newton admits, that it was in existence nearly 900 years before that period. About 133 A.D. the celebrated astronomer, geographer, and astrologer, Claudius Ptolemy, compiled his notable work entitled 'The Tetrabiblos, or Quadripartite, being Four Books of the Influence of the Stars.' In this work he seems to have collected all that appeared of importance to him which was then known of the science; but as Ptolemy did not devote the whole of his time to this study, we may fairly suppose that some of the less important rules had not been tested by him personally, but were merely adopted as the current opinions of the day. The science of Astrology consists of four branches which are essentially different from each other: Nativities, or the art of foreseeing, from the figure of the heavens at the moment of birth, the future fate and character of individuals; Mundane Astrology, or the art of foreseeing, by the positions of the heavenly bodies at certain periods, the circumstances of nations, such as wars, pestilences, inundations, earthquakes etc. Atmospheric Astrology, or the art of foreseeing, by the positions of the planets at the periods of the Sun and Moon being in mutual aspect, and some other circumstances, the quality of the weather at any required time or place and Horary Astrology, or the art of foreseeing, by the positions of the heavens, at any period when an individual may be anxious about the matter, the result of any business or circumstance whatever. The Grammar of Astrology is intended to teach the principles of the science of nativities and to divest them of the trash which ignorant men have introduced, so that persons of an ordinary capacity and a common share of industry may examine and decide for themselves whether there is any truth in astrology or not.

Ascendant is the most important element of Astronomy and Astrology. Ascendant is the fundamental factor or seed of Astrology. This is the base on which the entire mansion of Astrology or the vast banyan tree stands. The calculative portion of Astrology can be solved by computer to a great extent, but the predictive portion is out of question. Astrology without prediction is just like a flower without fragrance. Many a time learned Astrologers and professional fortune-tellers are hesitant in giving correct predictions. The present book is intended to combat this challenge, by presenting facts and figures Ascendant-wise in separate books so that a clear and concise avenue may be opened for those who are aspiring to know what is there in store for them in the celestial world. With the help of this book people can know their future and they can foretell the future of their near and dear ones. It is our humble endeavour to bestow the common people with knowledge of Astrological prediction. Twelve (12) Ascendants arise in the sky during the course of a day and night. An Ascendant exists for roughly two (2) hours. It is the first step towards giving the prediction on the basis of Ascendant itself. It is hoped that it will be appreciated in the world of Astrology. James Wilson wrote his Dictionary of Astrology in 1819. Based in large measure on a close study of the works of Ptolemy and Placidus (among many others), it is a quirky, highly personal view of the ancient science. It has been acclaimed the finest of all astrological dictionaries. Wilson's goal was to force the student to think about some of the basic assumptions in astrology. In the Preface, he writes: If I had any motive more prominent than the rest (beyond promoting the cause of truth, which, I trust, will always be the principal) for publishing this work, it was a desire to injure those harpies who gather together scarce books of science, and hide them from the perusal of mankind, merely for the sake of gain, which, after all, can be but trifling: men like these are the enemies of knowledge, and ought to be severely punished in every civilized nation. This treatise will render most of their hoards comparatively useless, for I have been careful to insert the substance of all they contain relating to astrology, whether true or false, adding occasionally some remarks of my own to distinguish the latter as far as I am able, that every student may be enabled to found his own conviction on his own experience. Rather than the short, arid articles typical of specialized dictionaries, Wilson offers extensive entries on (Primary) Directions, Faces, Figures, Forms of the Body, Horary Astrology, Marriage, Part of Fortune, Weather, the judgment of Revolutions, Progressions, Ingresses, Riches, Promissors, as well as many more. A few years after this book, the author published his translation of Ptolemy's Tetrabiblos, one of only a handful of men to have done so. The Dictionary of Astrology is a book of surprises. It will repay study.

Dear Reader Man is not only a physical entity but represents a cogent expression or an equilibrium of forces, so to say, stimulated by certain higher principles. The zodiacal signs govern these principles also. We know that the signs are grouped into three types, cardinal, fixed and mutable. These three sets of signs govern the three chief modes of expression of the vital body (Pran. amaya), thus complicating the mechanisms of the human constitution. The cardinal signs denote activity and govern the functional activities of life. Circulation, respiration, digestion and excretion and such other vital activities are controlled by these signs. The occultist should gain hold over these functions in order to overcome the effects of the cardinal signs. The fixed signs govern the emotions and the desires of man. Wish, desire, anger, aversion, attraction and repulsion are governed by these signs. The behaviour nature of man which lies beyond the control of his intelligence and understanding comes under their control. In this book I am trying my best to explain the complete details about signs and their secrets which is hidden in universe. This is ancient wisdom and I believe you will love reading and learn a lot from this book if you are interested in the world of astrology. Regards, Saket Shah

LEO.-Physical marks: Strong, broad shoulders; upright walk, cheerful expression; fearless eyes, generally of a grey tint; wavy hair.Mental qualities: Faithful, proud, fearless; ambitious, generous, artistic; opposed to cliques and secrecy; oblivious to enmity; rich in life and feeling.-from "Signatures of the Zodiac" Do you know what "Bestial Signs" are? Which Zodiac sign is prone to "strange and impulsive love affairs"? Which planet tends to rule those who are "ingenious, reserved, covetous, melancholy, unfortunate"? What the "Law of Sex" is? If not, you need to examine this classic work of traditional astrology, first published in 1898. Four concise books-"Treating of the Language of the Heavens," "The Reading of the Horoscope," "The Measure of Time," and "Hindu Astrology"-impart the basics of reading the stars to determine your destiny."Sepharial" was the pseudonym of British mystic WALTER GORN-OLD (1864-1929), one of the most prolific writers on and teachers of astrology in modern times. Among his many works are Astrology Explained, Cosmic Symbolism, Science of Foreknowledge, and The Silver Key.

First published in 1898, this is a very different astrology book from what we have now. There are extensive delineations for the signs of the zodiac, especially when found on the ascendant. There are delineations of planets in signs when they are in the first house or are the chart ruler, in both cases, describing the physical appearance. There are delineations of planets in the various houses, which will also serve for the planetary rulerships of the houses. There are only sketchy notes on aspects. So far as the "pure astrology" of planets in signs, in houses, in aspect, there is almost nothing at all.The reason is found in the second part of the book. We are not reading the chart as a psychological abstraction. We are, instead, looking for specific traits, attempting to answer specific questions. Will we have a profession? What kind of marriage? What kind of children? Will we vanquish our enemies, or submit to them? What kind of illness? We then find the house(s) of the horoscope which rule the question, and then delineate the signs & planets we find there. These are, by the way, the sort of questions that clients would ask, if they only knew we could give answers! The sort of things that astrologers themselves want to know.In the process we learn how to read a chart & get real meaning from it. We get ideas from one section and then apply them to other sections. There are hundreds and hundreds of useful aphorisms, except that Sepharial doesn't label them as such.Get this book, study it, underline key passages, scribble in the margins. You will learn more from this book than most all others put together.

Perhaps the least understood and most misused elements in astrology today are the fixed stars. Current practice is to consider the stars as no more than mini-manifestations of the planets whose nature they are presumed to hold. The locations of the stars projected onto the ecliptic are then considered valid points for aspectual relationships. No special significance is attributed to the non-zodiacal constellations; nor is a star's location within a constellation given any weight whatsoever. Finally, modern astrology places no distinction on the use of the stars and constellations in genethliacal astrology and the other branches of the ancient art. In this book the natures of the fixed stars and constellations as known by the classicists are discussed in detail. Methods of delineating the fixed stars are indicated, with special emphasis on the applications to judicial astrology. Included are chapters on the nature of the fixed stars; the northern, southern and zodiacal constellations; genethliacal applications of the fixed stars; judicial astrology; and three appendices with information on mathematics and rulership and a complete listing of the fixed stars.

most be able to cast and read an astrological figure, Mr. Pearce's book may be recommended as easily intelligible, and containing much interesting matter, besides the process that will be chiefly useful to the student whose aims are more ambitious. To the latter it is invaluable. It is enriched with many interesting notices of nativities illustrating the different rules and doctrines of the science. "

This book endeavours to show in a clear and simple manner the useful and practical truth that underlies the so-called occult study of reading character and disposition by the "period of birth", and the meaning of the number of each day and the influence of such things on human life. It will, I hope, be seen in reading these pages how perfect is the mechanism of the Universe, by which certain characteristics, and even details as to health, may be traced by a study of such things. In the present book I have drawn largely from my own experiences in this study of character, and I may safely state that there is not a rule I have given concerning character tendencies or health, which has not been thoroughly verified by me in my own work, which has extended in a professional way over a period of more than forty years.

More often than not, people think of astrology as a tool for divination or the exploration of one's personality. Astrology is considerably more than that. It is a sacred science, a highly descriptive symbolic language, and it is also a technology that can be applied to ritual, herbalism, the use of crystals, and much more. This is a practical handbook for any practitioner of magic to use in building individual rituals and creating the most effective magic. Concise, focused, and expertly presented, this book teaches the core concepts of astrology so that wiccans and pagans can truly apply it to their practices.

Light on Life: An Introduction to the Astrology of India Light on Life brings the insight and wisdom of Indian astrology to the Western reader. Jyotish, or Indian astrology, is an ancient and complex method of exploring the nature of time and space and its effect upon the individual. In Light on Life they have created a complete and thorough handbook that can be appreciated and understood by those with very little knowledge of astrology.

Will there be peace? Will there be war? Find out with Mundane Astrology. Here, in one volume, are three classic books on the astrology of nations and states, by H.S. Green, Raphael, and C.E.O. Carter: H.S. Green organizes his book planet-by-planet. He tells what each planet will do in the 12 houses. Raphael organizes the topic by house. He tells how mundane houses work when planets are in them. In addition, both authors deal with solar and lunar eclipses, and earthquakes. Green shows the effects of eclipses in the houses, while Raphael describes them by decanate (100 sections of the zodiac). Both mention the effects of comets, although little about these mysterious bodies is known astrologically. Charles Carter, writing after WWII, discusses why astrologers failed to predict the war and what that means for mundane astrology. His plea for better data has largely been met, but the need for more study remains. All three authors give astrological rulerships for countries and cities. These are centuries old and are weighted to England and Europe. Carter's rulers are the most up-to-date. These are the essential texts for serious study of mundane astrology. About the Authors H.S. Green was an astrologer associated with Alan Leo's astrological revival back in the first decade of the 20th century. His various books are highly regarded (all but this one out of print, sadly), but biographical details are sketchy. Raphael was the pen-name of one Robert Cross, 1850-1923. He was the sixth in a series of astrological writers who used the name "Raphael" & remains the best known of them all. He wrote books on virtually all astrological topics. His book on mundane astrology dates from 1910. Charles E.O. Carter, 1887-1968, was one of the outstanding British astrologers of the 20th century. He succeeded Alan Leo as head of the Astrological Lodge of the Theosophical Society, a post he held from 1920 to 1952. He was editor of Astrology, The Astrologer's Quarterly, from 1926 to 1959. Carter's persistent genius reestablished astrology as a serious discipline in England, after two centuries of decline. He wrote his book on Mundane Astrology in reaction to the failure of astrologers to forecast WWII. In 1939, astrologers in London knew there was a full-scale war on in China, they knew the situation with Germany was tense, but they had studied the charts for the year, they knew the fuss would blow over. And they were wrong. Carter set out to discover why, his book was the result.
