In 2016, Google announced it was getting into the home assistant business with Google Home. The smart device allowed users to essentially have a computer controlled by their voice. Google was just getting started. In 2017, Google released two more devices: the Google Home Mini and Google Home Max. Finally, in 2018, Google announced that its smart speaker would get a whole lot more visual with the Google Home Hub. The Google Home Hub is a hybrid of two worlds--a device that works best with both your voice and by touch. The same voice commands as the non-touch Google Home's are there, but a screen gives it the extra touch you need to control things in your home like security cameras. It's original, powerful, and just a little weird! It's unlike anything you've ever used--not quite a tablet, not quite a voice assistant, not quite a computer--it's a Hub! Because it's a little weird, it takes some getting used to; this guide will walk you through what you need to know to get the most out of the powerful display. Ready to get started?!

Currently in the third edition, popularly known as NEC 3, it is a process based construction contract embodying project management best practice, and thus the basic philosophy behind the contract is different to the more adversarial principles and approach of other standard construction contracts. Written as a practical guide to the application of the procedures contained in NEC 3, this book will aid users in the transition from their use and understanding of the other standard construction contracts to the collaborative project management based approach of the ECC. Written for anyone working in the construction industry working on a project under the ECC, it will be of interest to the complete construction supply chain including employers, construction professions, contractors and sub-contractors. The authors survey the key considerations in this process, including: What are the different models for family offices, and what are their respective benefits? What costs can be expected from a family office, and how much wealth must be under management to justify them? What are the role and responsibilities of the Family Officer and his staff? In *The Ikigai Journey*, authors Hector Garcia and Francesc Miralles take their international bestseller *Ikigai: the Japanese Secret to a Long and Happy Life* a step further by showing you how to find your own ikigai through practical exercises, such as employing new habits and stepping outside your comfort zone. Ikigai is the place where our passion (what we love), mission (what we hope to contribute), vocation (the gifts we have to offer the world) and profession (how our passions and talents can become a livelihood) converge, giving us a personal sense of meaning. This book helps you bring together all of these elements so that you can enjoy a balanced life. Our ikigai is very similar to change: it is a constant that transforms depending on which phase of life we are in. Our "reason for being" is not the same at 15 as it is at 70. Through three sections, this book helps you to accept and embrace that—acting as a tool to revolutionize your future by helping you to understand the past, so you can enjoy your present. Section 1—Journey Through the Future: Tokyo (a symbol of modernity and innovation) Section 2—Journey Through the Past: Kyoto (an ancient capital moored in tradition) Section 3—Journey Through the Present: Ise (an ancient shrine that is destroyed and rebuilt every twenty years) Japan has one of the longest life spans in the world, and the
