

A Southern Music The Karnatik Story Tm Krishna

Music is an art that, in one guise or another, permeates every human society. Though musical theory did not develop until the nineteenth century, rhythm has had the power to move people for millennia. Readers will travel the river of musical time, from early Indian and Chinese conceptions, when music was first used as a sonic vector for religion, through its development in the Middle Ages to great classical composers of the late eighteenth century to the music of today.

T.M. Krishna, one of the foremost Karnatik vocalists today, begins his panoramic exploration of that tradition with a fundamental question: what is music? Taking nothing for granted and addressing diverse readers from Karnatik music's rich spectrum and beyond it, Krishna provides a path-breaking overview of south Indian classical music. He advances provocative ideas about various aspects of its practice. Central to his thinking is the concept of 'art music', the ability to achieve abstraction, as the foundational character of Karnatik music. In his explorations, he sights the visible connections and unappreciated intersections between this music form and others - Hindustani music, Bharatanatyam, fusion music and cine music - treading new, often contentious, ground. A Southern Music seeks to retrace the sources of Karnatik music even as it reflects on its self-renewing vitality today. To that end, Krishna examines a number of issues that Karnatik music must face up to: questions of gender and caste, the role of religion and of lyrics inspired by devotional sentiments, the diaspora and its relationship with 'classical' music, technology. Unquestionably the definitive book on Karnatik music.

As a vocalist in the Karnatik tradition, T.M. Krishna eludes standard analyses. Uncommon in his rendition of music and original in his interpretation of it, Krishna is at once strong and subtle, manifestly traditional and stunningly innovative. He is searingly outspoken about issues affecting the human condition. His work is spread across the whole spectrum of music and culture, politics and the social sphere; he is at once philosophical, aesthetic and sociopolitical, and asks important questions about how art is made, performed and disseminated. Unabashedly given to rethinking classical paradigms, he addresses crucial issues of caste, class and gender with nuance and openness. For the first time, T.M. Krishna's key writings have been put together in this extraordinary collection. The Spirit of Enquiry: Dissent as an Art Form draws from his rich body of work, thematically divided into five key sections: art and artistes; the nation state; the theatre of secularism; savage inequalities; and in memoriam. Revised and expanded, and with marvellous new additional materials and powerful new introductions, this is a collection that reflects the critical and cultural engagement of one of our finest thinkers, public intellectuals and practitioners of art.

A widely-accepted explanation for India's national unity is a narrative called the bhakti movement—poet-saints singing bhakti from India's southern tip to the Himalayas between 600 and 1600. John Hawley shows that this narrative, with its political overtones, was created by the early-twentieth-century circle around Rabindranath Tagore in Bengal.

This collective volume concentrates on the concept of transposition, exploring its potential as a lens through which to examine recent Francophone literary, cinematic, theatrical, musical, and artistic creations that reveal multilingual and multicultural realities. The chapters are composed by leading scholars in French and Francophone Studies who engage in interdisciplinary reflections on the ways transcontinental movement has influenced diverse genres. It begins with the premise that an attentiveness to migration has inspired writers, artists, filmmakers, playwrights and musicians to engage in new forms of translation in their work. Their own diverse backgrounds combine with their awareness of the itineraries of others to have an impact on the innovative languages that emerge in their creative production. These contemporary figures realize that migratory actualities must be transposed into different linguistic and cultural contexts in order to be legible and audible, in order to be perceptible - either for the reader, the listener, or the viewer. The novels, films, plays, works of art and musical pieces that exemplify such transpositions adopt inventive elements that push the limits of formal composition in French. This work is therefore often inspiring as it points in evocative ways toward fluid influences and a plurality of interactions that render impossible any static conception of being or belonging.

In this engaging and easy text, the authors explore the foundational works of Hinduism. Spanning philosophy, mythology, poetry and music, this book is sure to educate, as well as entertain.

It is one of two main sub-genres of Indian classical music that evolved from ancient Hindu

traditions; the other sub-genre being Hindustani music, which emerged as a distinct form because of Persian and Islamic influences in North India. In contrast to Hindustani music, the main emphasis in Carnatic music is on vocal music; most compositions are written to be sung, and even when played on instruments, they are meant to be performed in *g yaki* (singing) style. Although there are stylistic differences, the basic elements of (the relative musical pitch), (the musical sound of a single note), (the mode or melodic formulae), and (the rhythmic cycles) form the foundation of improvisation and composition in both Carnatic and Hindustani music. This book provides a critical academic evaluation of the 'music city' as a form of urban cultural policy that has been keenly adopted in policy circles across the globe, but which as yet has only been subject to limited empirical and conceptual interrogation. With a particular focus on heritage, planning, tourism and regulatory measures, this book explores

how local geographical, social and economic contexts and particularities shape the nature of music city policies (or lack thereof) in particular cities. The book broadens academic interrogation of music cities to include cities as diverse as San Francisco, Liverpool, Chennai, Havana, San Juan, Birmingham and Southampton. Contributors include both academic and professional practitioners and, consequently, this book represents one of the most diverse attempts yet to critically engage with music cities as a global cultural policy concept.
