

A World Of Cities

Do you know where in the world you can buy drinkable gold; why an 'elephant's foot' is one of the most dangerous objects in the world; or where you might have to swim to school? Discover the answers to these questions and loads more mindblowing facts in *The Cities Book*, where readers aged 8+ are taken on an incredible world tour through 86 of the world's greatest cities. Sister title to the bestselling *The Travel Book*, every page is packed with facts on city living, and gives kids a flavour of what it's like to grow up in each place featured. From food and festivals, to awesome architecture and amazing history - there's something for everyone. A mix of wow photography, beautiful illustrations and hand drawn maps bring each page to life. It's the perfect gift for curious kids everywhere. Contents: Toronto Montreal Vancouver San Francisco Los Angeles Las Vegas New Orleans Nashville Chicago New York Philadelphia Washington DC Miami Havana Kingston Mexico City Oaxaca City La Paz Cartagena Manaus Rio de Janeiro Cuzco Buenos Aires Ushuaia Reykjavik Tromso Stockholm Copenhagen Edinburgh London Dublin Amsterdam Brussels Paris Berlin Munich Krakow Prague Vienna Moscow Pripyat Istanbul Athens Rome Vatican City Venice Madrid Barcelona Lisbon Marrakesh Cairo Timbuktu Dakar Addis Ababa Nairobi Zanzibar Town Cape Town Jerusalem Mecca Dubai Samarkand Mumbai Varanasi Thimphu Ulaanbaatar Beijing Chengdu Hong Kong Bangkok Singapore Hanoi Manila Tokyo Kyoto Pyongyang Seoul Darwin Perth Ballarat Melbourne Sydney Auckland Rotorua Queenstown Apia South Tarawa About Lonely Planet Kids: From the world's leading travel publisher comes Lonely Planet Kids, a children's imprint that brings the world to life for young explorers everywhere. With a range of beautiful books for children aged 5-12, we're kickstarting the travel bug and showing kids just how amazing our planet can be. From bright and bold sticker activity books, to beautiful gift titles bursting at the seams with amazing facts, we aim to inspire and delight curious kids, showing them the rich diversity of people, places and cultures that surrounds us. We pledge to share our enthusiasm and love of the world, our sense of humour and continual fascination for what it is that makes the world we live in the diverse and magnificent place it is. It's going to be a big adventure - come explore!

After two decades of evolution and transformation, London had become one of the most open and cosmopolitan cities in the world. The success of the 2012 Olympics set a high water-mark in the visible success of the city, while its influence and soft power increased in the global systems of trade, capital, culture, knowledge, and communications. *The Making of a World City: London 1991 - 2021* sets out in clear detail both the catalysts that have enabled London to succeed and also the qualities and underlying values that are at play: London's openness and self-confidence, its inventiveness, influence, and its entrepreneurial zeal. London's organic, unplanned, incremental character, without a ruling design code or guiding master plan, proves to be more flexible than any planned city can be. Cities are high on national and regional agendas as we all try to understand the impact of global urbanisation and the re-urbanisation of the developed world. If we can explain London's successes and her remaining challenges, we can unlock a better understanding of how cities succeed.

Population aging often provokes fears of impending social security deficits, uncontrollable medical expenditures, and transformations in living arrangements, but public policy could also stimulate social innovations. These issues are typically studied at the national level; yet they must be resolved where most people live--in diverse neighborhoods in cities. New York, London, Paris, and Tokyo are the four largest cities among the wealthiest, most developed nations of the world. The essays commissioned for this volume compare what it is like to grow older in these cities with respect to health care, quality of life, housing, and long-term care. The contributors look beyond aggregate national data to highlight the importance of how local authorities implement policies.

In our rapidly urbanizing global society, solid waste management will be a key challenge facing all the world's cities. *Solid Waste Management in the World's Cities* provides a fresh perspective and new data on one of the biggest issues in urban development. Using the framework of Integrated Sustainable Waste Management (ISWM), the report brings together unprecedented research from 22 cities across six continents. It uncovers the rich diversity of waste management systems that are in place throughout the world, and draws out the practical lessons for policymakers. The volume will be essential reading for all professionals and policymakers in the field, as well as a valuable resource for researchers and students in all aspects of urban development. Winner of the International Solid Waste Association Publication Award 2010 Published with UN-Habitat.

From World City to the World in One City examines changing geographies of Liverpool through and across the lives of Malay seamen who arrived in the city during its final years as a major imperial port. Draws upon life histories and memories of people who met at the Malay Club in Liverpool until its closure in 2007, to examine changing urban sites and landscapes as well as the city's historically shifting constitutive connections In considering the historical presence of Malay seamen in Liverpool, draws attention to a group which has previously received only passing mention in historical and geographical studies of both that city, and of multi-ethnic Britain more widely Demonstrates that Liverpool-based Malay men sustained social connections with Southeast Asia long before scholars began to use terms such as 'globalization' or 'transnationalism' Based on a diverse range of empirical data, including interviews with members of the Malay Club in Liverpool and interviews in Southeast Asia, as well as archival and secondary sources Accessibly-written for non-academic audiences interested in the history and urban social geography of Liverpool

With the advent of multinational corporations, the traditional urban service function has 'gone global'. In order to provide services to globalizing corporate clients, the offices of major financial and business service firms across the world have formed a network. It is the myriad of flows between office towers in different metropolitan centres that has produced a world city network. Through an analysis of the intra-company flows of 100 leading global service firms across 315 cities, this book assesses cities in terms of their overall network connectivity, their connectivity by service sector, and their connectivity by world region. Peter Taylor's unique and illuminating book provides the first comprehensive and systematic description and analysis of the world city network as the 'skeleton' upon which contemporary globalization has been built. His analyses challenge the traditional view of the world as a 'mosaic map' of political boundaries. Written by one of the foremost authorities on the subject, this book provides a much needed mapping of the connecting relationships between world cities, and will be an enlightening book for students of urban studies, geography, sociology and planning.

"From London and Las Vegas to Sydney and Shanghai, become an urban time traveler with this interactive tour of some of the world's greatest cities. Lift the flaps and full-page gatefolds to see how these mighty metropolises once looked compared to how they look now, then read their incredible histories."--Back cover.

A seismic population shift is taking place as many formerly racially homogeneous cities in the West attract a diverse influx of newcomers seeking economic and social advancement. In *The Changing Face of World Cities*, a distinguished group of immigration experts presents the first systematic, data-based comparison of the lives of young adult children of immigrants growing up in seventeen big cities of Western Europe and the United States. Drawing on a comprehensive set of surveys, this important book brings together new evidence about the international immigrant experience and provides far-reaching lessons for devising more effective public policies. *The Changing Face of World Cities* pairs European and American researchers to explore how youths of immigrant origin negotiate educational systems, labor markets, gender, neighborhoods, citizenship, and identity on both sides of the Atlantic. Maurice Crul and his co-authors

how people have tried to make a connection with nature; how well they've done is both a lesson in hope and, often, a warning. Featuring chapters on Babylon, Provins (France), London and Bloomsbury, Hamilton, Chicago, Irvine, Singapore, Tanga (Tanzania), Kochi (India), Shanghai, and So Paulo, as well as recommendations on what must be done so that everyone has a bit of green to call their own. Also includes photographs and extensive notes.

The Third Edition of *Cities in a World Economy* shows how certain characteristics of our turn-of-the-millennium flows of money, information, and people have led to the emergence of a new social formation: global cities. These developments give new meaning to such fixtures of urban sociology as the centrality of place and the importance of geography in our social world. The book focuses on the major challenges that world cities are facing in such key areas such as governance, social inclusiveness, infrastructural development, financial solvency as well as environmental and ecological sustainability. Based on case studies from cities in North America, Europe, and the Asia-Pacific, top academics, professionals and policymakers from the world over presents their views on how to best strike the balance between growth and sustainability.
