During the years of Mexican President Calderone, drug cartels fought pitched battles against other cartels, the police, the army, and the good citizens of Mexico. Kidnappings, murder, threats, and intimidation by drug cartels impinged on every facet of Mexican life. This story of the de la Vega family in Culiacan, the state capital of the Mexican state of Sinaloa, tells of their struggles with the death of their beloved sister and the courageous brothers who become a force exacting revenge on the Pacific cartel. The family ancestors moved away from Southern California during the 1840's as the influx of white settlers changed the culture and created certain discriminations against Mexican-Americans. The family legend is the de la Vegas sold out and relocated to Culiacan, Mexico where they quickly established prominence socially and financially. In Culiacan, the whispers are frequently heard of their great wealth and of being descendents of the great Zorro. In 1973, out of work university graduate Maynard  
Seider took the only job he could get in San  
Francisco at the time, at a factory. Here's an account  
of his year of factory toil - and of his workmates,  
management, rebellion, the union, and a whole lot  
more. "I learned more about worklife from this  
account of a run-of-the-mill year and run-of-the-mill  
strike, than from a hundred stories of historic labor

struggles. Seider shows that those nameless and faceless factories that litter the view from freeways in every American city are battlegrounds where a war is fought at a low, low heat, but fought daily." [Joan Holden, playwright, San Francisco Mime Troupe]

"Seider has a wonderful ability to portray the intimate details of workgroups and the interplay of personality and power in the world of work. I recommend this book to anyone who wants to know about what it's like to work in a factory today or to introduce students to the realities of American industrial life." [Jeremy Brecher].

"Perhaps I should have realized that cancer runs in my family. After all, three grandparents and my father and brother perished from this disease. Yet, when I received my colorectal cancer diagnosis, I was surprised. I never expected to be primarily identified as a cancer patient. Following a typical combination of chemotherapy, radiation, surgery, and more chemo, I was presumably cancer-free when my post-treatment scans looked clean. Nonetheless, within a year I received a terminal diagnosis; cancer had metastasized in my lungs. Thus began my year as a dead woman--a time of chaotic emotions, new priorities, and rapid-fire plans and changes. Expecting the unexpected became a theme in my life, but the things that turned out to be most shocking are social, familial, and even my expectations about what is realistic for a dead

woman to be or do." Preconceptions about a terminal cancer diagnosis frequently are based on popular culture depictions of cancer and dying, which can be misleading as a guide for knowing what to expect when you're expecting to die. This memoir provides one woman's often-irreverent, pop culture-illustrated guide to life that deconstructs some common preconceptions about living with a terminal diagnosis.

A year in the life of Richmond Park - the largest open space in London - captured in photographs and text. H1N1. Staph aureus. Traveler's diarrhea. All examples of human interaction with the microbial world, which counts viruses, bacteria, and parasites too numerous to mention. Infectious Disease doctor Mark Crislip has a strange relationship with this world—he spends most of his time trying to kill it, even as he appreciates the vital role microorganisms play in the Earth's ecosystems. Puswhisperer is a collection of infectious disease anecdotes created from a year's worth of clinical blog posts from the Medscape blog Rubor, Dolor, Calor, Tumor. Originally intended for residents and fellows, the posts have been compiled, edited, and revised for a

non-specialist audience. The tales cover a wide range of diagnostic dilemmas and treatment quandaries. Which infection smells like buttered popcorn? Are some antibiotics “stronger” than others? Is it OK to eat the oysters? Along with clinical insight, the book provides a good dose of humor and insightful, microbe-centered philosophy. The author speculates on what the Earth might look like in five billion years, when animals and plants are gone, but bacteria remain. He also draws attention to the staggering rate of evolution in bacteria, made possible by short generation times and passing of genetic material from one bug to another. Finding a 60-year-old Staph strain in an old wound, Crislip tells us, is like looking out your window and seeing a Neanderthal shuffle by. Recommended for anyone interested in infectious disease and the microorganisms that run our planet.

spiritual. In this new title from Carole Lewis, First Place 4 Health's national director, readers are challenged to "give God a year" to change them from the inside out. Change will happen over the course of 12 months, but the right changes only happen when we set the right goals and take the right steps to achieve them. Written with Carole's signature warmth and humor, the book invites readers to dream big about the changes they long for in their lives and then offers practical, biblical, step by step guidance for how to see those dreams made into reality. In a culture of "right now," a year may seem like an eternity. A year in the hands of God, however, means change that will last eternally.

When my grandmother passed away, I inherited a wonderful memento, a chest containing her handwritten twenty-page memoir. A Year in the Life of a Southern Girl features one year of my grandmother's life around the year 1900, describing life in small town Arkansas at the turn of the century. In it, my paternal grandmother comes of age, tells her favorite funny family stories, and at the same time, demonstrates her faith in God. Along with her stories, I have also included my other grandmother's tales, as well as my own research and stories. All these tales are fiction based on facts. The stories remind us of what we have forgotten of "the good old days," how to be at peace even in the worst of times, and how to trust that life will get better. And, we should all share a laugh in the meantime.

A record of the author's first year with the New York City Ballet.

Despite its importance to the life of the nation and all its citizens, the Supreme Court remains a mystery to most Americans, its workings widely felt but rarely seen firsthand. In this book, journalists who cover the Court—acting as the eyes and ears of not just the American people, but the Constitution itself—give us a rare close look into its proceedings, the people behind them, and the complex, often fascinating ways in which justice is ultimately served. Their narratives form an intimate account of a year in the life of the Supreme Court. The cases heard by the Supreme Court are, first and foremost, disputes involving real people with actual stories. The accidents and twists of circumstance that have brought these people to the last resort of litigation can make for compelling drama. The contributors to this volume bring these dramatic stories to life, using them as a backdrop for the larger issues of law and social policy that constitute the Court's business: abortion, separation of church and state, freedom of speech, the right of privacy, crime, violence, discrimination, and the death penalty. In the course of these narratives, the authors describe the personalities and jurisprudential leanings of the various Justices, explaining how the interplay of these characters and theories about the Constitution interact to influence the Court's decisions. Highly readable and richly informative, this book offers an unusually clear and comprehensive portrait of one of the most influential institutions in modern American life.

One Year in the Life of a Dog By LTC Clifton H. Deringer Jr. USA (Ret.) "Tip" One Year in the Life of a Dog follows the story of Friend, a dog that can hear the thoughts of humans and respond telepathically. There are humans who are gifted with understanding the telepathy in animals and a university student who interviews Friend is blessed with such a gift. The book follows their interactions and various events that occur within their world. Intrigue, deception, kidnapping, and prejudice are woven seamlessly with love, understanding, sympathy, and acceptance. Barney and Jeff, Friend's owners, are a homosexual, bi-racial couple. Seeing their lives from Friend's point of view speaks on many levels to how ridiculous and outdated prejudice is. Barney and Jeff are just as loving and fulfilled as any other happy couple. Many of the characters with whom Friend interacts are not open to the couple's way of life, but quickly realize their mistake when they see how lovely Barney and Jeff truly are. There are harrowing situations that breed a deeper understanding of the differences between people; this book is truly a tool to teach readers to love all, despite the different ways the characters live their lives.
