[What is the name of oldest public libraries in all of the different continents of the world? In what year was the first CD-ROM book released? In what years were the first books printed in French, Thai, Japanese, Arabic and Turkish printed? What are the name of the oldest extant texts or inscriptions written in Chinese, English, Russian, and Spanish? When was the first major computer database used in libraries? What is the title of the largest and smallest and most expensive books ever published? Where in the world is the world's busiest public library? Which famous horror fiction writer worked in a library? What are the names of the very first three books to contain photographs? Where are the tallest bookstores and library buildings in the world? This updated and expanded edition provides over 500 fascinating facts about libraries, periodicals, books and reference databases. The new book is not just a book about library and book comparisons, it is a remarkable story of libraries and books from the earliest times to the present. It is best described as a Guinness Book of Records for libraries and books.]

Mobile users are demanding fast and efficient ubiquitous connectivity supporting data applications. This connectivity has to be provided by various different

networks and protocols which guarantee that mobile networks function efficiently, performing routing and handoff for mobile users. Hac proposes a comprehensive design for mobile communications including mobile agents, access networks, application protocols, ubiquitous connectivity, routing, and handoff. It covers the entire spectrum of lower and upper layer protocols to evaluate and design modern mobile telecommunications systems. Furthermore, the aspects of modern mobile telecommunications for applications, networking, and transmission are described. For mobile users and data applications these are new networking and communications solutions, particularly for the local area network environment. * Describes the recent advances in mobile telecommunications, their protocols and management * Covers hot topics such as mobile agents, access networks, wireless applications protocols, wireless LANs, architecture, routing and handoff * Introduces and analyses architecture and design issues in mobile communications and networks * Includes a section of questions/problems/answers after each chapter The book is written as a practical, easily accessible tutorial with many figures and examples of existing protocols and architectures making it essential reading for engineers, system engineers, researchers, managers, senior & graduate students.

A problem patron is not one with difficult requests or obscure interests, but one

who displays behavior that is deemed destructive, criminal, bothersome, offensive, or otherwise inappropriate. Librarians look at the nature of the problem in academic and public libraries, the impact of such technologies as the Internet and cell phones, and solutions from other professions as well as from the experience of librarians.

Includes history of bills and resolutions.

The marriage of mobile communications with Internet technologies opens up the Web to a vastly expanded audience. New types of applications that take advantage of user location, provide time-critical information, and offer personalized content are now possible. WAP, the Wireless Application Protocol, provides the technology to build this wireless Web. You will learn about the WAP Forum, mobile devices, and what makes a good WAP application. This book shows you around the WAP standards, explaining which ones you really need to build WAP applications. It guides you through the critical success factors in designing WAP applications and helps you choose the right architecture for your WAP project. Tutorials on WML (the HTML of wireless web) WMLScript, and Push technology are combined with real world examples to make Practical WAP ideal for software developers, architects, and managers.

A revitalized version of the popular classic, the Encyclopedia of Library and

Information Science, Second Edition targets new and dynamic movements in the distribution, acquisition, and development of print and online media-compiling articles from more than 450 information specialists on topics including program planning in the digital era, recruitment, information management, advances in digital technology and encoding, intellectual property, and hardware, software, database selection and design, competitive intelligence, electronic records preservation, decision support systems, ethical issues in information, online library instruction, telecommuting, and digital library projects.

An up-to-date showcase of the innovative and inspiring work that libraries are doing across the world to interact with their users and deliver resources via mobile devices. This brand new edition of the highly successful M-Libraries series brings together cutting-edge international contributions from the leading experts, practitioners and researchers in the field. Based on the proceedings of the Fifth International M-Libraries Conference held at the Chinese University of Hong Kong in 2014, it illustrates the diversity of innovative and inspiring work that libraries are doing across the world to interact with their users and deliver resources via mobile and hand-held devices. With a foreword from Joan K Lippincott and 22 chapters from 13 countries, as far apart as India and Germany, Hong Kong and Zimbabwe, Scotland and Bangladesh, the book explores the following themes: - Best practice for the use of mobile technologies in libraries - Challenges and strategies involved in embracing mobile innovation for libraries - The impact of ubiquitous and wearable technologies on the future of libraries - Harnessing the future for

teaching and learning with mobile technologies - Mobile technologies enhancing information access for all and pursuing the millennium development goals. As the world becomes more mobile, users will access information using mobile technologies. Hence, libraries have to make the transition to provide mobile service. M-Libraries 5 will help libraries to develop adaptable and efficient mobile services so they can meet the needs of the current and new generations of users. Readership: Information professionals in all sectors and researchers, educators, technical developers, managers and library professionals. It will also be invaluable for students of library and information science and newcomers to the profession.

Interest in m-library services has grown exponentially in the last five years, as libraries are recognizing the potential of ubiquitous and increasingly sophisticated mobile devices. Building on the highly regarded M-Libraries: libraries on the move to provide virtual access, this new book brings together research and case studies from all corners of the globe on the development and delivery of library services and content to mobile devices. Based on the proceedings of the Second International M-Libraries Conference held in Vancouver, this new collection of contributions from authorities in the field serves to demonstrate the ingenuity and creativity of developers and service providers in this area, ranging from the innovative application of basic mobile phone technology to provide information services in remote parts of the globe lacking internet access, to the development of new tools and technologies which harness the full functionality of popular mobile phones. Key topics include: enhancing library access through the use of mobile technology the university library digital reading room mobile access for workplace and language training the role of an agent supplying content on mobile devices cyberlearning and reference services via mobile devices podcasting as an outreach

tool service models for information therapy services delivered to mobiles bibliographic ontology and e-books health literacy and healthy action in the connected age a collaborative approach to support flexible, blended and technology-enhanced learning The collection demonstrates the emergence of an evidence base for m-libraries, with a number of contributions presenting the results of user surveys and studies of user behaviour. Readership: This highly topical book should be read by information professionals in all sectors, and by policy makers, researchers, developers, publishers and suppliers. It will also be of great interest to library and information studies students and newcomers to the profession.

Library World Records, 3d ed. McFarland

What is an abbreviation? Abbreviations have a long history, created so that spelling out a whole word could be avoided. This might be done to save time and space, and also to provide secrecy. In both Greece and Rome the reduction of words to single letters was common. In Roman inscriptions, "Words were commonly abbreviated by using the initial letter or letters of words, and most inscriptions have at least one abbreviation". However, "some could have more than one meaning, depending on their context. An abbreviation, on the other hand, is also a way to shorten a phrase but with a slight difference. In general, abbreviations tend to shorten the word or phrase being referenced by literally shortening the word but not creating a new one. So for example, shortening the word "avenue" to "ave." is an abbreviation rather than an acronym because "ave." does not form a new enunciable word. Similarly, shortening the names of the months, such as "December" to "Dec." is also an abbreviation because when reading "Dec." out loud, you would just say the full term "December."

M. Sankara Reddy, b. 1945, librarian from Andhra Pradesh, India; contributed articles.

This insightful book shows you how to deal with an issue as old as the library profession: interacting with problem patrons. It looks at this fact of life that affects almost every facet of library work and provides practical solutions--some developed within the field and some borrowed from other professions--that will improve reference services for those you serve and make the work of your library staff less stressful, more productive, and increasingly meaningful. *Helping the Difficult Library Patron: New Approaches to Examining and Resolving a Long-Standing and Ongoing Problem* examines: the nature of the problem from historical and demographic perspectives ways of dealing with the problem in academic and public libraries competency-based training techniques that will empower your frontline staff the impact of new technologies such as cellular phones and the Internet and ways of dealing with the new breeds of difficult patrons that come with them solutions from our colleagues what we can learn from the perspectives of others--psychotherapists, businesspeople, and corporate managers--you even get a Zen Buddhist viewpoint! effective ways to utilize community resources such as campus and local police and much, much more! Nowhere in the library literature have so many practitioners and educators combined their efforts to examine and provide solutions to this ageless problem. Library administrators, staff, and educators will find *Helping the Difficult Library Patron* a matchless resource!
