"In *Unlocking the Power of Academic Vocabulary*, Dr. Yu Ren Dong, an associate professor of English education at Queens College, City University of New York, helps secondary teachers expand their instructional repertoire to teach academic vocabulary in a systematic, meaningful, contextualized, and exciting way. Every secondary, subject-matter teacher will find strategies, easy-to-integrate activities, and tips on selecting words and planning lessons. As you teach with these strategies, your English language learners will be able to: • tap into prior knowledge through cross-language transfer and cross-cultural comparisons; • use concept-based vocabulary, such as analogies, metaphorical language, themes, sources, inquiry, and graphic organizers; • interact with new words in context to decipher euphemisms, words with multiple meanings, connotation, and context clues; • engage in interactive read-alouds, think-alouds, and wordplay; and • master vocabulary through writing. Charts, student examples, suggested resources, and subject-matter vocabulary lists give teachers the hands-on tools they need to teach the concepts behind words as well as the actual definitions, spelling, and sounds. Transform your academic vocabulary instruction into an engaging, skill-building mix that carries over into students' reading, writing, thinking, and conversations in all subject areas."

Academic texts present subject-specific ideas within a subject-independent framework. This book accounts for the presence of academic words in academic writing by exploring recurring patterns of function in texts representing different subject areas. The book presents a framework which describes academic word use at the ideational, textual and interpersonal levels. Functional categories are presented and illustrated which explain the role of academic words alongside general purpose and technical terms. The author examines biomedical research articles, and journal articles from arts, commerce and law. A comparable analysis focuses on university textbook chapters.

Case studies investigate patterns of functionality within the main sections of research articles, compare word use in academic and non-academic texts reporting on the same research, and explore the carrier word function of academic vocabulary. The study concludes by looking at historical and contemporary processes which have shaped the presence of academic vocabulary in the English lexicon.
