Whether you are inheriting a test team or starting one up, *Manage Software Testing* is a must-have resource that covers all aspects of test management. It guides you through the business and organizational issues that you are confronted with on a daily basis, explaining what you need to focus on strategically, tactically, and operationally. Using a risk-based approach, the author addresses a range of questions about software product development. The book covers unit, system, and non-functional tests and includes examples on how to estimate the number of bugs expected to be found, the time required for testing, and the date when a release is ready. It weighs the cost of finding bugs against the risks of missing release dates or letting bugs appear in the final released product. It is imperative to determine if bugs do exist and then be able to metric how quickly they can be identified, the cost they incur, and how many remain in the product when it is released. With this book, test managers can effectively and accurately establish these parameters.

While there is growing interest in IFRS within the US, interest outside the US has exploded. Weygandt's fourth edition of *Financial Accounting: IFRS* highlights the integration of more US GAAP rules, a desired feature as more foreign companies find the United States to be their largest market. The highly anticipated new edition retains each of the key features (e.g. TOC, writing style,

pedagogy, robust EOC) on which users of Weygant Financial have come to rely, while putting the focus on international companies/examples, discussing financial accounting principles and procedures within the context of IFRS, and providing EOC exercises and problems that present students with foreign currency examples instead of solely U.S. dollars.

The fourth edition of *Accounting: Understanding and Practice* by Danny Leiwy and Robert Perks has been fully revised throughout and updated in accordance with the International Financial Reporting Standards. Ample practice illustrations and examples help present the subject in relation to a business world to which readers can easily relate.

This work introduces the two main sub-disciplines of accounting - financial and management accounting. It covers the main elements of both subjects and includes a variety of exercises within each chapter designed to promote understanding of the principles. The book is suitable for non-accountants as it is written for undergraduate and professional students on business and management courses where accounting isn't the main subject being undertaken.

The leading Heintz/Parry's *COLLEGE ACCOUNTING, 22E* combines a step-by-step approach with excellent examples that make accounting understandable, regardless of the reader's accounting background or business experience. This fourth revised and updated edition gives a practical overview of contemporary finance from a New Zealand perspective. It helps students understand: how the financial system and the institutions within it operate; how and why financial decisions are made; the tools, techniques and concepts used in finance, and how they are applied to the major sectors of finance; and how individuals plan their short- and long-term financial activities; how business organisations manage and finance their short- and long-term financial activities.

Broad in scope, Fundamentals of Finance explains the important financial decisions made by businesses and individuals, and how these decisions are influenced by the financial environment in which we live and work. It provides an introduction to finance that assists students to make their own financial decisions. Helpful features include: examples, self-test questions (with solutions!), learning objectives, a glossary of terms and useful formulae.

data analytics resources. Data Analytics and Decision-Making The text provides numerous discussions on how decision-makers are increasingly relying on data analytics to make decisions using accounting information. Accounting software systems collect vast amounts of data about a company's economic events as well as its suppliers and customers. Business decision-makers take advantage of this wealth of data by using data analytics to gain insights and therefore make more informed business decisions. Data analytics involves analyzing data, often employing both software and statistics, to draw inferences. As both data access and analytical software improve, the use of data analytics to support decisions is becoming increasingly common at virtually all types of companies"--

Management assumes no prior knowledge of statistics. It will also be highly relevant for the statistics component of courses in quantitative methods. The style of the book is similar to that of the highly successful *Essential Mathematics for Economics and Business* by Teresa Bradley and Paul Patton, with many worked examples integrated throughout. Emphasis is placed on verbalising concepts, problems and results of statistical analysis. This will help students learn how to start a problem, complete the calculations, and report the results in a way that makes sense to a non-statistician. Each concept is introduced with a brief but plausible explanation followed by *Worked Examples*. The *Worked Examples* will provide students with the necessary practice that they need in order to succeed at the subject. Emphasis is also placed on 'learning through doing' problems. Excel is used to encourage students in doing problems and to enhance understanding (with links to datasets online). Minitab printouts are also included in the text. *Skills Development Exercises* with brief solutions are included within the chapters, and *Progress Exercises* on theory and applications are provided at the end of each chapter. Solutions to all the worked examples and progress exercises are available as an appendix. Web-based supplementary materials will be provided for lecturers adopting the text, including additional exercises and solutions, excel datasets and exercises, powerpoint slides with key formula, figures and tables. Students can access an online glossary and weblinks.
