This book was motivated by a need for a “decision–focused” accounting textbook for both MBA and undergraduate programs. The title of the book emphasizes the focus on accounting to meet the needs of managers. The material contained in the book stresses the interpretation (rather than the construction) of accounting information as well as a critical (rather than unthinking) acceptance of the underlying assumptions behind accounting. It is suitable for postgraduate and undergraduate students who are undertaking courses in accounting that do not lead to professional accreditation, and to practicing non–financial managers who need a better understanding of the role of accounting in their organizations. This Canadian edition book has been adapted to include materials, examples and case studies with a Canadian focus. Part I provides a discussion of financial accounting, with particular focus on
