

Accounting Information Systems Gelinas Chapter Alivar

This text prepares students to effectively use, manage, and participate in the development of information technology applications in support of common business processes.

Interconnections among an organization's management, business processes, information systems and information technology are brought out in each chapter. Another emphasis throughout the text is the governance, control, and security of business processes, information systems – especially underlying financial information systems—and emerging technologies. Moreover, the text centers around three themes: IT innovations, e-business and enterprise systems.

Accounting Information Systems provides a comprehensive knowledgebase of the systems that generate, evaluate, summarize, and report accounting information. Balancing technical concepts and student comprehension, this textbook introduces only the most-necessary technology in a clear and accessible style. The text focuses on business processes and accounting and IT controls, and includes discussion of relevant aspects of ethics and corporate governance. Relatable real-world examples and abundant end-of-chapter resources reinforce Accounting Information Systems (AIS) concepts and their use in day-to-day operation. Now in its fourth edition, this popular textbook explains IT controls using the AICPA Trust Services Principles framework—a comprehensive yet easy-to-understand framework of IT controls—and allows for incorporating hands-on learning to complement theoretical concepts. A full set of pedagogical features enables students to easily comprehend the material, understand data flow diagrams and document flowcharts, discuss case studies and examples, and successfully answer end-of-chapter questions. The book’s focus on ease of use, and its straightforward presentation of business processes and related controls, make it an ideal primary text for business or accounting students in AIS courses.
