This book is designed for every manager and business professional who wants to know "what the numbers mean", and how finance and accounting can be used to help manage a business. Each chapter takes readers into the classrooms at the nation's top business schools and provides a state-of-the-art overview of all key topics, including budgeting, financial statements, breakeven analysis, and evaluating an acquisitions target.

This text prepares students to effectively use, manage, and participate in the development of information technology applications in support of common business processes. Interconnections among an organization's management, business processes, information systems and information technology are brought out in each chapter. Another emphasis throughout the text is the governance, control, and security of business processes, information systems — especially underlying financial information systems—and emerging technologies. Moreover, the text centers around three themes: IT innovations, e-business and enterprise systems.

For this volume we have collected 12 original research papers dealing with various issues relating to transparency. This topic spans many disciplines beyond accounting and finance, intersecting economics, law and management, embracing sociology and political science, and offering opportunities for creative interdisciplinary research. We hope this v Written by four prominent academics, this is one of South Africa's best-selling computer books. It was written specifically for those managing or using computers for the first time, be they accountants, lawyers, or other business people. It is also an ideal introduction to business computing for the commerce student.
