the temporary concept. Because I would like to underline the differences I will present in short form the timing concept too. The temporary concept includes the timing and the temporary differences and excludes the permanent differences. Now we have to find a definition for each type of difference. If we know the idea of deferred taxes and we know how to determine them, we will be interested in the evaluation of deferred taxes. Therefore I will describe the liability method used by IAS and to show the differences I will describe the deferred method. For a better understanding I would like to conclude my report by giving the different way of calculation deferred taxes by using the deferred method and the liability method.
