The remainder of the text provides in-depth coverage of assessment and exercise prescription for each of five physical fitness components: cardiorespiratory endurance, muscular fitness (strength, endurance, and power), body composition, flexibility, and balance. In each chapter, key questions help readers focus on essential information. Key points, review questions, and key terms reinforce concepts and summarize chapter content. An instructor guide, test package, chapter quizzes, and presentation package plus image bank provide tools for lecture preparation, creative content delivery, and class assessment.
