Description Voice Change is an important part of “Transformation of Sentence” in which one sentence is changed into another but the sense or meaning of one sentence when changed to another remains the same. It is a rare significance of any language and literature that the speaker can express his/her views not only in one way but in more than one ways also. There is no exaggeration to say it is an art of such a language that enriches it. Voice change is one of them that teaches us how to express our views suitably in both voices - active and passive as and when required on different occasions. Rule 3: Place the active sentence's subject into a phrase beginning with the preposition 'by'. Rule 4: If the object in an active voice sentence is a pronoun (me, us, you, him, her, they, it), it changes in passive voice sentence as follows: me -- I; us -- we; you -- you; him -- he; her -- she; them -- they; it -- it Rule 5: Subject- Verb Agreement Make the first verb agree with the new subject in passive voice. Rule 6: When there are two objects (direct object and indirect object), only one object is interchanged. The second object remains

“If any man wish to write in a clear style, let him first be clear in his thoughts.” Johann Wolfgang von Goethe You may ask why anyone would want to write yet another book about scientific writing. There are many books on the subject, some more useful than others, and the abundance of literature on this topic may confuse rather than guide. I felt that this book was necessary for several reasons. During the past years, I have learnt much about the needs of scientific communicators, both through my personal experience as a pharmacologist and, later, through teaching scientific writing at universities, pharmaceutical companies, and other institutions. In today’s busy world, guidance on scientific writing must be focused and to the point. Our constraints no longer permit the time-consuming search for the “correct” word or formulation. Moreover, the speed by which we produce a manuscript has become increasingly important, be it in academia or the pharmaceutical industry. Scientists often find it difficult to accept that their professional success essentially depends on their skill and efficiency to communicate their research results. Without any doubt, the rapid exchange of pertinent information is critical to

scientific advancement and should therefore be regarded with due respect. A second, perhaps even more important reason for writing this book is my personal concern for everyone challenged to write high-quality texts in a language that is not his or her native tongue.

### New English Grammar Series

Seminar paper from the year 2012 in the subject English - Grammar, Style, Working Technique, grade: 1,0, Humboldt-University of Berlin, language: English, abstract: Since English and German belong to the West Germanic family, both languages are - considered from a historical perspective – closely related. However, English and German have developed in entirely different ways over time. While English was strongly influenced by many foreign languages, such as French, German remained closer to the language group both originally derived from. Precisely these divergent developments make a contrastive analysis between the two major languages particularly interesting. Within this paper, English and German will be compared with regard to the passive voice, one form of the grammatical category voice that is, according to König & Gast (2009: 123), easy to identify in English and German and rather unproblematic to compare. In its general meaning, the term voice is used interchangeably with diathesis. In this

sense, the concept of voice relates to the argument structure of predicates, i.e. the relationship between thematic roles like Agent, Patient, Instrument and grammatical functions like subject and object, as well as to the alternations found between different argument structures. (ibid.). While diathesis appears to be a characteristic of any verb, voice - in the more restricted understanding of the word – “means the form of a [...] verb which shows whether the person or thing denoted by the subject acts or is acted upon” (Xavier 2008: 50). The narrower concept of voice, thus, differentiates between the active and the passive. In the course of my studies, the grammatical phenomenon of voice has been used several times to exemplarily compare English with German. The system of voice in English and German has been (re-)introduced in the course of this semester’s seminar English in Contrast. Therefore, my interest in this topic was already raised before the seminar and I found it particularly interesting to learn more about the differences of English and German passives. As a future teacher of both of these major languages, I consider this an excellent opportunity to gain a detailed insight into this matter. This term paper aims at figuring out in how far the passive voice is different in English and German. Despite both languages’ very same origin, it is assumed that, due to language change, English and German show considerable differences in the passive voice. The work by König & Gast (2009) will be taken as the basis for a discussion on this question...

Mary Grace Soccio. My writing could not please this kindhearted woman, no matter how hard I tried. Although Gifted and Talented seventh-grade math posed no problem for me, the same was not true for Mrs. Soccio's English class. I was frustrated that my first assignment only netted me a C. I worked harder, making revision after revision, a concept I had never really put much faith in before. At last, I produced an essay that seemed the apex of what I was capable of writing. Although the topic of that essay is now lost to my memory, the grade I received was not: a B?. "The best I could do was a B??" The realization sank in that maybe I was not such a good writer. In those days, my youthful hubris did not understand about the capacity building. In other words, being challenged would result in my intellectual growth—an academic restatement of Nietzsche's "What does not destroy me, makes me stronger." Consequently, I asked to be withdrawn from Gifted and Talented English in the eighth grade.

Seminar paper from the year 2007 in the subject English Language and Literature Studies - Linguistics, grade: 1,3, University of Munster, 9 entries in the bibliography, language: English, abstract: 1Introduction In order to learn more about the English language and how it is actually used by the native speaker community I am going to investigate the occurrence of bare passives as modifiers and of relative clauses in be-passive form which can be compared to the former in its function as modifier. With help of the queries I will find out how many of these constructions exist in The Penn Treebank and then take a closer look at the beginning of sentences. Which of these two grammatical phenomenon is more frequent at the beginnings of sentences and why? Firstly in this term paper, I will introduce the grammatical phenomenon of the passive voice with its variants 'be-passive', 'get-passive' and 'bare passive' by contrasting it to the active voice. Furthermore I will explain the development of the different queries needed for the research whose findings will be discussed subsequent to that."

This resource serves to educate lawyers and business professionals on how to draft the many types of "boilerplate" provisions, a legal term that refers to the standardized, one-size-fits-all provisions of a contract. Each chapter tackles one of 20 provisions and analyzes why it is important, the key legal and business issues raised, and how to draft the provision to suit a particular transaction. Such analysis not only helps readers better understand how to draft these provisions in their contracts, but also helps them better understand the other party's process.

Concord is an agreement that exists on the correct use of subjects, verbs, genders, tenses, voice and mood in speaking and writing English. It is in this lucid manner that this book will teach you concord. It clearly explains the subject-verb agreement as the first rule of concord. The subject-verb agreement states that a verb must agree in number with the subject of its sentence. It throws light on the distinctive exceptions to the subject-verb agreement. It analyzes the pronoun-antecedent agreement as the second rule of concord. The pronoun-antecedent agreement states that a pronoun must agree in number, gender and case with its antecedent. It identifies the shift in construction as the third rule of concord. The shift in construction implies that sentences must be the same in person, in number, in tense, in voice, in mood, and between direct speech and indirect speech. This being so, you should not shift unnecessarily between first person (I, we), second person (you), and third person (he, she, it, they), or between singular and plural. You should not shift unnecessarily between present, present perfect, past, past perfect and future tenses, especially if the verbs in question refer to actions occurring at the same time or expressing a single idea. You should not shift unnecessarily between the active voice and the passive voice. Sometimes, it makes sense to shift in voice, but it often confuses the readers. You should not shift from one mood to another without a good reason. A mood is a form of verb that indicates the writer's or speaker's attitude towards the idea expressed by the verb. You should not shift between a direct speech and an indirect speech. A direct speech is when the exact words of someone are quoted. An indirect speech is when the exact words of someone are reported without repeating the exact words. And this book contains many
