Make economics resonate to high school students. This practical handbook will help economics and social studies teachers foster critical thinking by introducing students to the real-life dimensions of the major controversies in contemporary economics. Filled with useful teaching tips and user-friendly information on finding engaging materials and activities for the classroom, the book also includes detailed coverage of the Voluntary National Content Standards for economics. "Introducing Economics" is a one-stop resource for high school teachers who want to make economics relevant to their students' lives. It includes more than 50 sections with lists of suggested "Activities and Resources," many with Internet links. It features boxed "Hints for Clear Teaching" tips for presenting particularly difficult topics. It provides an annotated resource guide to more than 30 organizations involved in economics education, with associated Internet links. It follows the flow of topics in a typical economics course. It addresses real-life topics that are ignored or glossed-over in traditional textbooks - economics and the environment, the distribution of income and wealth, discrimination, labor unions, globalization, the power of corporations, and more. It offers critical guidance for meeting all 20 Voluntary National Content Standards in economics, and also provides an overview of the political and intellectual history and contemporary state of economics education.

This publication addresses trends and issues in global education, providing information about what global education is and how to teach it. The publication emphasizes ERIC resources. It offers ERIC Digests about global education and selected items from the ERIC database that exemplify different viewpoints and approaches to global education. It contains a directory of key organizations and World Wide Web sites that provide teacher resources. Designed as a guide for educators who want to include global education across the various subjects of the curriculum, the volume is divided into four parts: (1) "Overview of Global and International Education"; (2) "Institutionalizing Global Education"; (3) "Curriculum, Methods, and Approaches"; and (4) "Appendices." Information about documents in the ERIC database and how to submit documents for the database is appended. (BT)

January 2009 marked the 25th anniversary of one of the most famous three minutes of television history. It was during half-time of the 1984 Super Bowl that APPLE show cased its new Macintosh Computer in an avant-guard commercial. In the following three weeks sales of the new computer, in both the public and private sectors, took off leading some to note

this occasion as the "true" start of the information age. At the same time schools joined this so-called information revolution and began to use the new technology, in various forms, in a much more serious manner. Given both the changing nature of technology, as well as its classroom applications, over the past quarter century this work's goal is to capture the historical trends of both use and application of information technology in the social studies during this era. This is done by providing a retrospective view , from 1984 through 2009 , of where we've been, where we are, and a view of new tools and strategies and possible studies that are emerging that can enhance our understanding of the effects that technology has and will have on the social studies.

Economics in Action combines 14 favorite NCEE simulations, roleplaying activities, group activities and classroom demonstrations in one volume.

In the Great Recession of 2007-2010, Americans watched their retirement savings erode and the value of their homes decline while the unemployment rate increased and GDP sank. New demands emerged for unprecedented government intervention into the economy. While these changes have a dramatic impact on society at large, they also have serious implications for the content and teaching of economics. Teaching Economics in a Time of Unprecedented Change is a one-stop collection that helps pre- and in-service social studies teachers to foster an understanding of classic content as well as recent economic developments. Part I offers clear and teachable overviews of the nature of today's complex economic crisis and the corollary changes in teaching economics that flow from revising and updating long-held economic assumptions. Part II provides both detailed best practices for teaching economics in the social studies classroom and frameworks for teaching economics within different contexts including personal finance, entrepreneurship, and history. Part III concludes with effective strategies for teaching at the elementary and secondary school levels based on current research on economic education. From advice on what every economics teacher should know, to tips for best education practices, to investigations into what research tells us about teaching economics, this collection provides a wealth of contextual background and teaching ideas for today's economics and social studies educators. Additional information and resources can be found at the authors' website neweconteaching.com.

This essential guide for curriculum developers, administrators, teachers, and education and economics professors, the standards were developed to provide a framework and benchmarks for the teaching of economics to our nation's children.

Advanced Placement Macroeconomics is the go-to guide for helping high school teachers to prepare their students for the AP Macroeconomics Exam administered by the College Board. It is designed to provide a basic framework around which you can design an AP Macroeconomics course that best meets the needs of your students. The Teacher Resource

Manual provides unit overviews, lesson plan objectives, Teacher Alerts, Bell Ringer activities to jump-start each class, visuals, and answers to the student activities. The lessons include instructional activities that are not in the Student Resource Manual. By dividing the Macroeconomics and Microeconomics Teacher Resource Manuals in two and compartmentalizing various elements such as student activities solutions and sample multiple-choice question answer keys, the materials provide a more intuitive structure and easier navigation of content.

This 8chapter guide for curriculum developers and teachers covers integrating economics across the K12 curriculum; effective teaching strategies; models for active teaching and learning; basics in lesson writing; and classroom assessment.

A provocatively rethink of the questions of what, how and for whom economics is produced. Academic economists in the twentieth century have presumed to monopolise economic knowledge, seeing themselves as the only legitimate producers and consumers of this highly specialized commodity. This has encouraged a narrow view of economics as little more than a private dialogue among professionally licensed knowers. This book recasts this narrow view.

[D]esigned to assist high school teachers in teaching undergraduate principles of economics courses to high school students as part of the Advanced Placement (AP) Program of the College Board.

Traditional Chinese edition of Naked Economics: Undressing the Dismal Science. The book may be a college economics reference book, but it is not anything like a textbook. The book is written with wit, humor, clear examples, and you don't have to be a student of economics to enjoy the book - yes, the word is "enjoy." Go ahead, read it. Your understanding of economics will improve greatly and effortlessly. In Chinese. Distributed by Tsai Fong Books, Inc.

The authors use a systematic analysis to examine the key issues of teacher's pay.

This revised edition features simulations, role plays, smallgroup discussions and other activelearning instructional activities to help students explore economic concepts through reallife applications.

This handbook provides valuable information for educators to use in developing a one-semester high school course on economics. The volume includes activity outlines, a model for assessment, and a list of resources to enhance instruction in economics. The handbook identifies methods to enrich instruction using the state-mandated economic component of the California high school curriculum. Chapter 1 reviews the basic components of microeconomics, macroeconomics, economic systems, and international trade as part of the course content. Chapter 2 describes issues-oriented activities to enliven economic concepts. Ten modules provide opportunities to encourage students to study economics through the application of basic concepts. Chapter 3 identifies the conceptual, semantic, and attitudinal hurdles that can interfere with a student's learning of economics. Chapter 4 illustrates a model for the assessment of student learning in a high school economics course. An appendix identifies 53 resources and addresses for further information to enhance high school economics instruction. (CK)

For social studies teachers reeling from the buffeting of top-down educational reforms, this volume offers answers to questions about dealing with the Common Core State Standards (CCSS). Each chapter presents and reviews pertinent standards that relate to the social studies. Each chapter also deals with significant topics in the social studies from various social sciences to processes such as inquiry to key skills needed for success in social studies such as analysis and literacy. The most important aspect of these chapters though is the array of adaptable activities that is included in each chapter. Teachers can find practical approaches to dealing with CCSS across the social studies panorama. The multiple authorships of the various chapters mean a variety of perspectives and viewpoints are presented. All of the authors have fought in the trenches of K-12 public education. Their activities reflect this in a way that will be useful to novice or veteran teachers.
