Akash Target Series Solutions

THE ULTIMATE SOCIAL MEDIA PLANNER (183 pages, total 7 sections) - ALL IN ONE For those who will run a business online or start digital marketing for a business, this book is the ultimate solution for maintaining Facebook, Instagram, Pinterest, etc. Section-1, "SOCIAL MEDIA ACCOUNT MANAGEMENT" (for 2 pages) where you can address the accounts' info of Facebook Instagram Twitter Youtube Whatsapp Section-2, "SOCIAL MEDIA BUSINESS GOALS," has some features: Goal Start Date, End Date Action Step box (8 boxes) Date Achieved (8 boxes) Challenges (8 boxes) Steps to Get Back on Track Notes Section-3: "SOCIAL MEDIA CONTENT PLANNER," has the features below: The platform which you will select(for example, Facebook, Youtube, Instagram, Pinterest...) Post Name, Date, Content, Keywords Checklist: Create Content, Create Graphics, Check Spelling, Check Link, Schedule Post, Publish Post, Call to Action. Promotion: Facebook, Instagram, Pinterest, Twitter, Email... To-Do List (8 boxes) Notes Likes box, Comments box, Link Clicks. Evaluation Notes Section-4: "SOCIAL MEDIA MONTHLY BUDGET PLANNER," has the features below: Platform Month Expenses Details Income Details Advertising Expenses Business Expenses Monthly Income with descriptions Notes Section-5: "SOCIAL MEDIA

TARGET AUDIENCE PLANNER" has the features below: Sex: Male, Female, Both Age: Below 18, 18-25,26-35, 36-45,45-55, Over 55 Location, Education, Occupation, Average Income Commonly Used Platform selections Top Products Sold (4 blank boxes) Top Facebook Groups (4 blank boxes) Top Market Influencers (4 blank boxes) Top Authority Bloggers (4 blank boxes) Notes Section-6: "HASHTAGS/KEYWORDS" features: Title boxes (6 shelves) Notes Section-7: "SOCIAL MEDIA TRASK TRACKER" has features below: Date Create / Schedule / Publish Platform Content/Notes So, have you ever seen all the ultimate solutions and business modem (digital marketing) in one book? in Akash Publications, you will find it. You will love it because there are so many things you will find in one book only. I hope, you will enjoy it.

The number of school shootings has skyrocketed recently not only in the United States but also in many other countries. This was one of the reasons why William Jeynes set out to write this illuminating book, in which he provides policy makers, school leaders, teachers and other interested individuals with valuable insights, research data and facts to reflect upon. It is to the great merit of William Jeynes that he proofed character education as well as parental engagement to be highly effective tools to improve schools in the 21st century. Schools need to focus more on character and parental engagement and less on testing. This book is an

incredibly valuable contribution and deserves to be taken very seriously. Roland Bernhard, Professor of History and Civics Education, University of Vienna School shootings have arguably become one of the most pressing concerns facing the American education system. While officials have proposed different solutions to the problem, few have attempted to address the multiple factors contributing to school shootings. In Reducing School Shootings, William Jeynes offers a much-needed comprehensive approach to addressing the problem that is grounded in many years of scholarly analysis and evidence. Scholars and policymakers interested in substantive solutions that go beyond single policy prescriptions for alleviating school shootings will learn a great deal from this book. Daniel Hamlin, Professor of Education Policy, University of Oklahoma Dr. Jeynes bravely uncovers the complex psycho-social dynamics that have long contributed to the global-wide incidence of school Shootings. The evidence is presented objectively and pinpoints the contributions of family dysfunction, mental illness, addiction, and the overall desensitization of violence wrought in the vacuum of postmodern culture. The commonalities and context for school shootings were delivered succinctly but Dr. Jeynes warns against an oversimplification of the problem and provides comprehensive strategies for preventative and legislative change that will lead to a more hopeful future. Dr. Robert Grand, Executive Director, The

Family Afterward Resource Center, Metro Los Angeles, California.
This book discusses analysis, design and optimization techniques for streaming multiprocessor systems, while satisfying a given area, performance, and energy budget. The authors describe design flows for both application-specific and general purpose streaming systems. Coverage also includes the use of machine learning for thermal optimization at run-time, when an application is being executed. The design flow described in this book extends to thermal and energy optimization with multiple applications running sequentially and concurrently. This book presents high-quality, peer-reviewed papers from the FICR International Conference on Rising Threats in Expert Applications and Solutions 2020, held at IIS University Jaipur, Rajasthan, India, on January 17-19, 2020. Featuring innovative ideas from researchers, academics, industry professionals and students, the book covers a variety of topics, including expert applications and artificial intelligence/machine learning; advanced web technologies, like IoT, big data, and cloud computing in expert applications; information and cybersecurity threats and solutions; multimedia applications in forensics, security and intelligence; advances in app development; management practices for expert applications; and social and ethical aspects of expert applications in applied sciences.

This practical title presents 18 challenging cases in paediatric critical care, complete with case histories and evidence-based, up-to-date learning points and clinical tips. Each chapter has commentary from an expert who identifies and explains the key points and controversies of the case.

This book presents ongoing research activities of currently available renewable energy technologies and the approaches towards clean technology for enabling a socio-economic model for the present and future generations to live in a clean and healthy environment. The book provides chapter wise implementation of research works in the area of green energy technologies with proper methods used with solution strategies and energy efficiency approaches by combining theory and practical applications. Readers are introduced to practical problems of green computation and hybrid resources optimization with solution based approaches from the current research outcomes. The book will be of use to researchers, professionals, and policy-makers alike.

What should have been a simple employment interview for Aadhya Mhann, a middle-class Punjabi lady in her early twenties, turned into a gruesome gang rape by 6 men, 4 of them being part of the most influential circles in Mumbai. Aadhya had the opportunity to seek for legal help and she had enough evidence to make sure all 6 men were locked up for years, but she chose to do things her own way. The justice system always had a soft spot for rich and

influental people and even when it didn't, the culprits of the crime enjoyed minimal sentences compared to the torture and trauma they put their victims through. Aadhya didn't want her rapists to be let off that easy. She had to make all of them suffer... But she couldn't do it alone. Aadhya finds and recruits 5 other girls that have been raped at some points in their lives. Manju, Sudesha, Palakh, Sathya and Lakshmi. They all came from different backgrounds, castes, and social classes, but they all had the same objective: To make the scumbags that had raped them regret ever having the ability to! They were willing to step out of the restrictions of the law and make sure that these vile men get the punishment they deserve for their atrocities. Creating an elaborate, covert operation with Aadhya at the helm, they combine their resources and talents and go on a revenge rampage. One by one, the girls target the 10 men that had raped any one of them and kill them off in the most gruesome and blood-curling way possible. They leave the most psychologically draining death for Akash Rathore, the biggest and richest pervert of them all. The murders and the elaborate ways in which they are carried out shakes the core of Mumbai. What is more mysterious is that no one has any idea who the killers are as the girls are always careful to keep their identities secret. As time goes by, the painful pasts of the girls are revealed, and they create the most unlikely of bonds with each other. They become pillars for each other, and the deaths of their rapists becomes the glue that keeps them together.

This book comprehensively reviews drug stability and chemical kinetics: how external factors

can influence the stability of drugs, and the reaction rates that trigger these effects. Explaining the important theoretical concepts of drug stability and chemical kinetics, and providing numerous examples in the form of illustrations, tables and calculations, the book helps readers gain a better understanding of the rates of reactions, order of reactions, types of degradation and how to prevent it, as well as types of stability studies. It also offers insights into the importance of the rate at which the drug is degraded and/or decomposed under various external and internal conditions, including temperature, pH, humidity and light. This book is intended for researchers, PhD students and scientists working in the field of pharmacy, pharmacology, pharmaceutical chemistry, medicinal chemistry and biopharmaceutics. Strategies for effective and responsible giving

This volume comprises select proceedings of ETAEERE-2016. The volume offers state-of-the-art chapters on energy management systems (EMS), renewable energy resources, micro-generation, green communications architectures and frameworks, green computing and education as well as energy-aware process optimization. The contents covers a wide variety of topics and aspects including management of renewable energy systems and environmental challenges. The contents of this volume will be useful to researchers and practicing engineers working in the areas of smart grids and renewable energy generation, distribution, and management.

The global environment has significantly changed due to a number of factors such as industrial pollution, expansion of agricultural land way beyond the fringe forest zones, destruction of virgin forests, loss of quality agricultural lands due to soil erosion, loss of global wildlife and biodiversity, climate change, global warming, devastating forest fires, floods, draughts, melting

of glaciers to mention a few. Human or anthropogenic impacts are in turn devastating the planet with our attention being shifted only to the shinning aspect of our civilizations. The most alarming fact about this hidden factor is that they are all directly or indirectly impacted by human activities in some way or other. The present work, Environment at Crossroads deals with various environmental problems like climate change, global warming, food security, bioremediation of waste, oil spills, and problems of heavy metal toxicity, control strategies like use of gene therapy, conservation of mangroves, revival of river Vishwamitri and role of plant and animals in biodiversity conservation is discussed.

This Special Issue focuses on the synthesis and characterization of hydrogels specifically used as carriers of biological molecules for pharmaceutical and biomedical employments. Pharmaceutical applications of hydrophilic materials has emerged as one of the most significant trends in the area of nanotechnology. To propose some of the latest findings in this field, each contribution involves an in-depth analysis including different starting materials and their physico-chemical and biological properties with the aim of synthetizing high-performing devices for specific use. In this context, intelligent polymeric devices able to be morphologically modified in response to an internal or external stimulus, such as pH or temperature, have been actively pursued. In general, hydrophilic polymeric materials lead to high in vitro and/or in vivo therapeutic efficacy, with programmed site-specific feature showing remarkable potential for targeted therapy. This Special Issue serves to highlight and capture the contemporary progress in this field. Relevant resources and people to approach - American Association

This book comprises select proceedings of the international conference ETAEERE 2020, and covers latest research in the areas of electronics, communication and computing. The book includes different approaches and techniques for specific applications using particle swarm optimization, Otsu's function and harmony search optimization algorithm, DNA-NAND gate, triple gate SOI MOSFET, micro-Raman and FTIR analysis, high-k dielectric gate oxide, spectrum sensing in cognitive radio, microstrip antenna, GPR with conducting surfaces, energy efficient packet routing, iBGP route reflectors, circularly polarized antenna, double fork shaped patch radiator, implementation of Doppler radar at 24 GHz, iris image classification using SVM, digital image forgery detection, secure communication, spoken dialog system, and DFT-DCT spreading strategies. Given the range of topics covered, this book can be useful for both students and researchers working in electronics and communication.

The thoroughly updated 4th edition of the book IAS Prelims General Studies Paper 1 - 101 Speed Tests with 5 Practice Sets consists of latest questions in all the sections. The 12 tests in the General Knowledge and Current Affairs section have been completely Changed and based on latest happenings. No matter where you PREPARE

from – a coaching or any textbook/ Guide - 101 SPEED TESTS provides you the right ASSESSMENT on each topic. Your performance provides you the right cues to IMPROVE your knowledge in the various topics so as to perform better in the final examination. # It is to be noted here that these are not mere tests but act as a checklist of student's learning and ability to apply concepts to different problems. # The book contains 87 Topical Tests + 9 sectional tests + 5 Full length Practice Tests. The complete CSAT paper 1 syllabus has been divided into 7 broad sections which are further divided into 87 topics. # The book aims at improving your SPEED followed by STRIKE RATE which will eventually lead to improving your SCORE. # Each test is based on small topics and contains around 20 MCQs on the latest pattern of the exam. # The various types of questions covered are Statement based, Matching based, Sequencing of events and Feature based MCQs. # The whole syllabus has been divided into 9 sections which are further distributed into 82 topics. # Finally at the end 5 FULL TESTS are provided so as to give the candidates the real feel of the final exam. The Full Test contains 100 questions as per the latest pattern. # In all, the book contains 2400+ Quality MCQ's in the form of 101 tests. # Solutions to each of the 101 tests are provided at the end of the book.

This volume is a joint effort of the Research Materials Information Center (RMIC) of the Solid State Division at Oak Ridge National Laboratory and the Libraries and Information Systems Center at Bell Telephone Laboratories (BTL) Murray Hill, N. J. The Research

Materials Information Center has, since 1963, been answering inquiries on the avail ability, preparation, and properties of inorganic solid-state research materials. The preparation of bibliographies has been essential to this function, and the interest in ferroelectrics led to the compila tion of the journal and report literature on that subject. The 1962 book Ferroelectric Crystals, by Jona and Shirane, was taken as a cutoff point, and all papers through mid-1969 received by the Center have been included. The Libraries and Information Systems Center of BTL has, over a period of years, developed a proprie tary package of computer programs called BELDEX, which formats and generates indexes to biblio graphic material. This group therefore undertook to process RMIC's ferroelectric references by BELDEX so that both laboratories could have the benefit of an indexed basic bibliography in this important research area. How do you create a blog in this book, and make money from it? This book has been made keeping in mind the new blogger in general. Sometimes what happens is that you do not know why we have to write a post, or you know, but do not know the way how to write. And how to write at least 1000 words on any keyword, this book is given. What is seo? How to use it, how to make pages in the blog, how to make contact care, information is given in this book. Preparing for Product Interviews is a one-stop guide for anyone wishing to successfully ace a Product Management Interview and land a job in PM. The book contains sample interview cases for the different types of product cases, as well as information on how

to get shortlisted for PM interviews. Apart from these, the book contains interviews with established Product Managers in the global technology industry, which will help you better understand the PM role.

This book discusses advances in smart and sustainable development of smart environments. The authors discuss the challenges faced in developing sustainable smart applications and provide potential solutions. The solutions are aimed at improving reliability and security with the goal of affordability, safety, and durability. Topics include health care applications, sustainable smart transportation systems, intelligent sustainable wearable electronics, and sustainable smart building and alert systems. Authors are from both industry and academia and present research from around the world. Addresses problems and solutions for sustainable development of smart cities; Includes applications such as healthcare, transportation, wearables, security, and more; Relevant for scientist and researchers working on real time smart city development. This book presents best selected research papers presented at the 3rd International Conference on Cognitive Informatics and Soft Computing (CISC 2020), held at Balasore College of Engineering & Technology, Balasore, Odisha, India, from 12 to 13 December 2020. It highlights, in particular, innovative research in the fields of cognitive informatics, cognitive computing, computational intelligence, advanced computing, and hybrid intelligent models and applications. New algorithms and methods in a variety of fields are presented, together with solution-based approaches. The topics addressed

include various theoretical aspects and applications of computer science, artificial intelligence, cybernetics, automation control theory, and software engineering. Monthly. Bibliography of MEDLARS-based journal articles that describe perturbations in the ecosystems important to health. For the most part, genetic and clinical literature not included. Index medicus format; author, subject sections. This volume offers a detailed and comprehensive analysis of Endocrine Disrupting Chemicals (EDCs), covering their occurrence, exposure to humans and the mechanisms that lead to the parthogenesis of EDCs-induced metabolic disorders. The book is divided into three parts. Part I describes the physiology of the human endocrine system, with special emphasis on various types of metabolic disorders along with risk factors that are responsible for the development of these disorders. Part II addresses all aspects of EDCs, including their role in the induction of various risk factors that are responsible for the development of metabolic disorders. Part III covers up-to-date environmental regulatory considerations and treatment strategies that have been adopted to cure and prevent EDCs-induced metabolic disorders. This section will primarily appeal to clinicians investigating the causes and treatment of metabolic disorders. The text will also be of interest to students and researchers in the fields of Environmental Pharmacology and Toxicology, Environmental Pollution, Pharmaceutical Biochemistry, Biotechnology, and Drug Metabolism/Pharmacokinetics. This book is a collection of research articles and critical review articles, describing the

overall approach to energy management. The book emphasizes the technical issues that drive energy efficiency in context of power systems. This book contains case studies with and without solutions on modelling, simulation and optimization techniques. It covers some innovative topics such as medium voltage (MV) back-to-back (BTB) system, cost optimization of a ring frame unit in textile industry, rectenna for radio frequency (RF) energy harvesting, ecology and energy dimension in infrastructural designs, 2.4 kW three-phase inverter for aircraft application, study of automatic generation control (AGC) in a two area hydrothermal power system, energy-efficient and reliable depth-based routing protocol for underwater wireless sensor network, and power line communication using LabVIEW. This book is primarily targeted at researchers and senior graduate students, but is also highly useful for the industry professional and scientists.

Dr. Giuliano Freddi is Chief Scientific Officer and co-founder of the company Silk Biomaterials srl. All other Guest Editors declare no competing interests with regards to the Topic subject.

This book constitutes the refereed proceedings of the 16th International Conference on

Verification, Model Checking, and Abstract Interpretation, VMCAI 2015, held in Mumbai, India, in January 2015. The 24 revised full papers presented were carefully reviewed and selected from 53 submissions. The papers cover a wide range of topics including program verification, model checking, abstract interpretation, abstract domains, program synthesis, static analysis, deductive methods, program certification, error diagnosis, program transformation, and hybrid and cyberphysical systems. 5G is the upcoming generation of the wireless network that will be the advanced version of 4G LTE+ providing all the features of a 4G LTE network and connectivity for IoT devices with faster speed and lower latency. The 5G network is going to be a service-oriented network, connecting billions of IoT devices and mobile phones through the wireless network, and hence, it needs a special emphasis on security. Security is the necessary enabler for the continuity of the wireless network business, and in 5G, network security for IoT devices is the most important aspect. As IoT is gaining momentum, people can remotely operate or instruct their network devices. Therefore, there is a need for robust security mechanisms to prevent unauthorized access to the devices. Evolution of Software-Defined Networking Foundations for IoT and 5G Mobile Networks is a collection of innovative research on the security challenges and prevention mechanisms in high-speed mobile networks. The book explores the threats to 5G and IoT and how to implement effective security architecture for them. While highlighting topics including artificial intelligence, mobile technology, and ubiquitous

computing, this book is ideally designed for cybersecurity experts, network providers, computer scientists, communication technologies experts, academicians, students, and researchers.

The thoroughly revised and updated 3rd edition of the book CSAT Paper 1 General Studies 101 Speed Tests with 10 Practice Sets has been updated with the latest questions in all the sections. No matter where you PREPARE from – a coaching or any textbook/ Guide - 101 SPEED TESTS provides you the right ASSESSMENT on each topic. Your performance provides you the right cues to IMPROVE your knowledge in the various topics so as to perform better in the final examination. It is to be noted here that these are not mere tests but act as a checklist of student's learning and ability to apply concepts to different problems. The book contains 82 Topical Tests + 9 sectional tests + 10 Full length Practice Tests. The complete CSAT paper 1 syllabus has been divided into 7 broad sections which are further divided into 82 topics. The book aims at improving your SPEED followed by STRIKE RATE which will eventually lead to improving your SCORE. • Each test is based on small topics and contains around 20 MCQs on the latest pattern of the exam. • The various types of questions covered are Statement based, Matching based, Sequencing of events and Feature based MCQs. • The whole syllabus has been divided into 9 sections which are further distributed into 82 topics. • In the end of each section a Sectional Test is provided so as to sum up the whole section. • Finally at the end 10 FULL TESTS are provided so as to give the

candidates the real feel of the final exam. The Full Test contains 100 questions as per the latest pattern. • In all, the book contains 2800+ Quality MCQ's in the form of 101 tests. • Solutions to each of the 101 tests are provided at the end of the book. • Separate Time Limit, Maximum Marks, Cut-off, Qualifying Score is provided for each test. • The book also provides a separate sheet, SCORE TRACKER where you can keep a record of your scores and performance.

Competition Science Vision (monthly magazine) is published by Pratiyogita Darpan Group in India and is one of the best Science monthly magazines available for medical entrance examination students in India. Well-qualified professionals of Physics, Chemistry, Zoology and Botany make contributions to this magazine and craft it with focus on providing complete and to-the-point study material for aspiring candidates. The magazine covers General Knowledge, Science and Technology news, Interviews of toppers of examinations, study material of Physics, Chemistry, Zoology and Botany with model papers, reasoning test questions, facts, quiz contest, general awareness and mental ability test in every monthly issue.
