Originally released in 1990, *The New American History* edited for the American Historical Association by Eric Foner, has become an indispensable volume for teachers and students. In essays that chart the shifts in interpretation within their fields, some of our most prominent American historians survey the key works and themes in the scholarship of the last three decades. Along with substantially revised essays from the first edition, this volume presents three entirely new ones - on intellectual history, the history of the West, and the histories of the family and sexuality. The second edition of *The New American History* reflects, in Foner's words, "the continuing vitality and creativity of the study of the past, how traditional fields are being expanded and redefined even as new ones are created." Author note: Eric Foner is DeWitt Clinton Professor of History at Columbia University. He is the author of numerous books, including *Reconstruction, 1863-1877* which was awarded the Bancroft Prize.

Professor Brinkley looks at the time in American history when the idea of the American dream first emerged -- the Great Depression. Inventing the Silent Majority in Western Europe and the United States examines the unprecedented mobilization and transformation of conservative movements on both sides of the Atlantic during a pivotal period in postwar history.

Convinced that 'noisy minorities' had seized the agenda, conservatives in Western Europe and the United States began to project themselves under Nixon's popularized label of the 'silent majority'. The years between the early 1960s and the late 1970s witnessed the emergence of countless new political organizations that sought to defend the existing order against a perceived left-wing threat from the resurgence of a new, politically organized Christian right to the beginnings of a radicalized version of neoliberal economic policy. Bringing together new research by leading international scholars, this ground-breaking volume offers a unique framework for studying the phenomenon of conservative mobilization in a comparative and transnational perspective.

Hailed as "one of the most eminent environmental historians of the West" by Alan Brinkley in The New York Times Book Review, Donald Worster has been a leader in reshaping the study of American history. Winner of the prestigious Bancroft Prize for his book *Dust Bowl*, Worster has helped bring humanity's interaction with nature to the forefront of historical thinking. Now, in *The Wealth of Nature*, he offers a series of thoughtful, eloquent essays which lay out his views on environmental history, tying the study of the past to today's agenda for change. *The Wealth of Nature* captures the fruit of what Worster calls "my own intellectual turning to the land." History, he writes, represents a dialogue between humanity and nature--though it is usually reported as if it were simple dictation. Worster takes as his point of departure the approach expressed early on by Aldo Leopold, who stresses the importance of nature in determining human history; Leopold pointed out that the spread of bluegrass in Kentucky, for instance, created new pastures and fed the rush of American settlers across the Appalachians, which affected the contest between Britain, France, and the U.S. for control of the area. Worster's own work offers an even more subtly

textured understanding, noting in this example, for instance, that bluegrass itself was an import from the Old World which supplanted native vegetation--a form of "environmental imperialism." He ranges across such areas as agriculture, water development, and other questions, examining them as environmental issues, showing how they have affected--and continue to affect--human settlement. Environmental history, he argues, is not simply the history of rural and wilderness areas; cities clearly have a tremendous impact on the land, on which they depend for their existence. He argues for a comprehensive approach to understanding our past as well as our present in environmental terms. "Nostalgia runs all through this society," Worster writes, "fortunately, for it may be our only hope of salvation." These reflective and engaging essays capture the fascination of environmental history--and the beauty of nature lost or endangered--underscoring the importance of intelligent action in the present.
