In order to remain competitive in the world economy, the United States must develop and improve mathematics and science education. Given that the future workforce in this country will be comprised largely of women and minorities, groups traditionally not entering mathematics and science careers, special recruitment and retention efforts must be developed. Urban community colleges enroll the largest numbers of women and minorities and have a special role to play in these efforts. This collection of articles reviews the status of mathematics-science education, identifies barriers to greater enrollment among women and minorities, examines the growing demand for skilled workers, and prescribes steps to be taken by urban colleges to train a more technical workforce. Included are the following 10 articles: (1) "Implications of the Mathematics-Science Crisis on the U.S. Economy," by Dennis P. Gallon; (2) "Student Participation in Mathematics and Science Programs," by Stelle Feuers; (3) "Federal Government Support for Mathematics and Sciences," by Carl Polowczyk; (4) "Breaking Down Barriers for Women and Minorities in Mathematics and Sciences," by Dianne Halleck; (5) "The Urban Climate and Strategies for Intervention," by Tom Hooe; (6) "Mathematics and Science Crisis: Implications for Educational Leaders of Urban Community Colleges," by Wright L. Lassiter, Jr.; (7) "Mathematics-Science Professors in Community Colleges," by P. M. Commons; (8) "Mandate for Action," by Frank Cerrato; (9) "Needed: An Applied Academics Program," by Dale Parnell; and (10) "Selected Sources and Exemplary Practices in Mathematics and Sciences at Community Colleges," by James Holmberg. Empower your Students for Success George Woodbury's Algebra Seriesempowers students for future success in college-level math courses through its early-and-often approach to functions and graphing, integrated study strategies, and quality exercise sets that encourage true conceptual understanding. The early-and-often approach to functionshelps students prepare for future math courses. A Study Skill Strategyis introduced in each chapter opener and then expanded upon throughout the chapter in the Building Your Study Strategyboxes that appear before each exercise set. Students can further develop their study skills with the Study Skills Workbook, written by Alan Bass, to accompany the Woodbury texts. Vocabulary Exercisesbegin each section of exercises and check student understanding of the basic vocabulary presented in the preceding section.

Clearly written and focused for success, the Twelfth Edition of Gustafson and Hughes' popular book, COLLEGE ALGEBRA, provides in-depth and precise coverage, incorporated into a framework of tested teaching strategy. The authors combine carefully selected pedagogical features and patient explanations to give students a book that preserves the integrity of mathematics, yet does not discourage them with material that is confusing or too rigorous. Long respected for its ability to help students quickly master difficult problems, this book also helps them develop the skills they'll need in future courses and in everyday life. Retaining the mathematical precision instructors have come to expect, the authors have focused on making this new edition more modern to better illustrate to students the importance of math in their world. This book has only one goal: to help you succeed in a beginning calculus course. The book begins with a comprehensive self-assessment test and review of the math you'll need before you start calculus: basic algebra, functions and graphs, polynomial and rational functions, trigonometry, and both exponential and logarithmic functions. Next, it provides five sample mid-term exams and five detailed final exams, so you'll know exactly what to expect. Best of all, the exams are followed by detailed explanations that walk you through how every answer was arrived at. The more you see it done, the more you practice, the better you'll do -- it's that simple. College, university and high school students preparing to take an introductory calculus course.
