In the last decade, opinion mining has been explored by using various machine learning methods. In the literature, document-level sentiment analysis has been majorly dealt with short-sized text only. For large-sized text, document-level sentiment analysis has never been dealt. In this paper, a hybrid framework named as ''Senti-NSetPSO'' is proposed to analyse large-sized text. Senti-NSetPSO comprises of two classifiers: binary and ternary based on hybridization of particle swarm optimization (PSO) with Neutrosophic Set. This method is suitable to classify large-sized text having more than 25 kb of size. Swarm size generated from large text can give a suitable measurement for implementation of PSO convergence. The proposed approach is trained and tested for large-sized text collected from Blitzer, aclIMDb, Polarity and Subjective Dataset. The proposed method establishes a co-relation between sentiment analysis and Neutrosophic Set. On Blitzer, aclIMDb and Polarity dataset, the model acquires satisfactory accuracy by ternary classifier. The accuracy of ternary classifier of the proposed framework shows significant improvement than review paper classifier present in the literature.

The long-awaited sequel to my 1993 best-selling paperback novel Witches is finally HERE! Yes, witches exist…the good and the bad

ones…and one day the two ancient adversaries of good and evil will join the fight for control of the world. Amanda has been told her ten year old witch-child, Lizzy, is fated to someday become one of the planet's most powerful witches. If she lives. If the world survives. Because the world is being threatened by an anti-Christ called Reuben who is prophesied to bring the end of the world by destroying everyone and everything good–including the white witches and warlocks of the world–unless he can be stopped. The Guardians, a secret society of those white wiccans who protect others of their kind and the world from great evil, along with the powerful good witch, Amanda Givens, and her gifted daughter, Lizzy, must battle Reuben and his demonic followers. They must somehow change the outcome of the prophesied end times, aid a possible child of God, help the earth's people to resist the black witches, demons and the soulless, which the times have brought forth and who are trying to bring hell to earth. Good and evil will be brought together for the final battles. Will Amanda, Lizzy, and the Guardians defeat evil or will it defeat them as they fight with all their strength and powers to save the people, the lives and the world they love. Who will win?

Governments of many countries consider the electrification of individual passenger transport as a suitable strategy to decrease oil dependency and reduce transport-related carbon dioxide ($CO_2$) and air pollutant emissions. However, battery-electric vehicles (BEVs) and plug-in hybrid-electric vehicles (PHEVs) have been more expensive than their conventional counterparts and suffer from relatively short electric driving ranges, which still hampers the market potential of these vehicles. Despite persisting shortfalls, mechanisms such as technological learning and economics of scale promise to improve the techno-economic performance of BEVs and PHEVs in the short- to mid-term. Here, the author seeks to obtain insight into the techno-economic prospects of BEVs and PHEVs by: (i) establishing experience curves and (ii) quantifying user costs and the costs of mitigating carbon dioxide and air pollutant emissions in a time-series analysis. The analysis captures the situation in Germany between 2010 and 2016.

The second edition of Sustainable Business prepares future business leaders to tackle the most crucial social and environmental issues of our time. This engaging textbook provides students with a comprehensive, balanced introduction to integrating sustainable business policies into all core business functions and processes. The text employs a qualitative-based learning process to help students understand how leadership, finance, accounting, risk management, marketing, supply chain management, and operations can be adapted to meet the sustainability goals of the 21st century. Looking at

sustainable business from the managerial viewpoint, the fully-updated new edition explains how and why business is evolving due to increased consumer and regulatory pressure for sustainable performance. Business topics are first introduced in the same manner as traditional MBA programs, and then examined through the lens of sustainably. The text incorporates real-life examples of social and environmental leadership to demonstrate the efficacy of good sustainable business decisions, and illustrates the negative ramifications of outdated, purely economic-driven managerial decision-making. Influential concepts based on interdisciplinary research in sustainability are discussed in detail, and practical insights address how to turn policy into practice in the workplace.

In many capital crimes in which no one has been convicted there has been little doubt in the minds of law enforcement personnel as to the identity of the perpetrator, who for lack of admissible evidence has never been brought to trial. In Cold Case Closure five such fictional cases continue to be pursued by a dedicated former homicide detective who appoints himself judge, jury, and executioner.
