In Writing to Explore, David and Peter demonstrate how to teach adventure writing, which integrates nonfiction and fiction and motivates students to write with imagination, curiosity, and a hunger to learn everything about their topic. The book starts with a solid foundation in the basics of good writing: setting descriptions, writing atmosphere, and character development. The authors then explore the specific elements of adventure writing--from setting the stage to conducting research; from combining history and geography to effectively utilizing technology. The result is an adventure-based paper that is "rooted in real places, supported by facts, and developed with detailed description of images from real locations." Teachers will find handouts, sample activities, student writing examples, research sources, and tips to help them create a nonfiction writing program based around the adventure writing model. Research papers don't have to be boring to read or to write. This book will show you how to get vibrant papers from your students--papers that teach both reader and writer something new. Do you sometimes find yourself wishing you had a different family? Some of us have all felt it before. It is in those moments when your kids are fighting and screaming with each other and you. Your spouse seems distant and disconnected from you with regard to family matters, disciplining children, planning for family events and more. Life seems to be an endless sequence of meals, laundry, dirty diapers, messy rooms, undone home improvement projects, and chauffeuring kids to dance lessons and soccer practices. Then in the middle of all this chaos, you begin to want more peace and a greater sense of mission and purpose. What's it all for? Then you notice the 'Joneses' next door. The parents never seem to be in disagreement and never, ever yell at their kids. Their children always speak to their parents with respect and never, ever fight with each other. The children excel at just about everything and always seem to be the most talented, best students, most socially adjusted in the neighborhood. Can this be for

real? Or are they just a bunch of invading aliens from another planet? The Jones seem to always be happy, peaceful, confident...no problems right? Wrong! But they do know something you don't - Just like our panel of experts featured in our latest book, they know following principle-based family skills are fundamental in raising children who excel in all areas of their life. Principle-based family skills are a fundamental requirement for successful communication in a marriage. And mostly, they know parents can now transform their inadequacies into effective skills for their marriages and their children. That is why we should always be reading, studying and ever learning to improve ourselves and our families. So now you too, can discover what other great mentors, teachers and coaches have discovered about their families - Now you can keep up with the 'Joneses' in a healthy way. Out of the many experiences of my own life both personally and in working with large numbers of young people and their families, I have seen the increasing devastating effect that fatherlessness is having in our society. I am a father – to me that is a great privilege and honour – and I have walked out the journey of raising 3 children of my own, and I have also observed the challenges that many men face in being a father. To a large extent it was a combination of those 3 factors/experiences that challenged me to write a book on what I believe is a man's greatest challenge – that of being a father. In the book I firstly wanted to highlight briefly some of the consequences of fatherlessness in our society. Men need to know that the efforts that they make as fathers are important – they are leaving a legacy in the lives of their children that will impact generations. And they need to know that the challenges that they face as they seek to father their children are not unique. As fathers we are all in the same 'fight'; we are all walking out a very similar journey and I want to challenge men afresh to rise up and make a difference in their own homes and families and then in society. The majority of the book is designed to pass on the things that I have learnt in my own journey as a father to the next generation of fathers. I firstly present what I believe are some of the fundamental requirements of being an effective father – things such as love and time, and the power of the words that we speak. I then focus on six basic steps or principles that apply to becoming an effective father to your children. These six 'steps' are both sequential, and yet they need to be continually applied to the many different areas of life time and time again – you never outgrow them, rather they evolve as you and your children grow and mature. I then look at the importance of dealing with your children as individuals, and encourage men to see things in a long term perspective. Life at times does get messy and take unexpected detours, but with time we get to see the results that we all desire as men in the lives of our children. In all these areas I haven't sought to give men a 'how to' guide or a 'step by step' method, rather where possible I have endeavoured to share examples from my own family to help explain the principles and to help men work out how to apply the truths to their own families. The last thing that I touch on is to address some of the main challenges or obstacles that we as men confront as we seek to be an effective father. For each of these areas one could write an entire book on the subject, and

the ways in which these obstacles work out in a man's life are as varied as men themselves. So all that I have done is to raise awareness of these issues and give some broad guidelines to help guide men through them. As fathers we are all in the process of learning and growing. None of us have arrived, but we can all learn from one another and together we can make a positive change in our society for the benefit of the generations to come. Being a father is a man's greatest challenge, and it is hard work at times but it is worth it all.

Offers seventy-five activities for fathers and sons to do together, including making pizza, camping in the backyard, and collecting bugs.

A stimulating, do-it-yourself, inventive resource packed with cross-curriculum science and design and technology projects that children can put together themselves and which really work. Uses child's natural curiosity to develop creative problem-solving skills.

In today's high-stakes testing environment, integrating technology into the curriculum is often seen as something "extra" or for use with a few special projects. With the growth in Internet use by even the youngest children, educators urgently need a practical introduction to online literacy and reading comprehension. Reading, Writing, and Literacy 2.0 offers that and more by providing tools and teaching strategies for incorporating online reading and writing into classroom learning, as well as a host of web resources that teachers can draw on to make this happen. All this without endless hours of searching! Denise Johnson's book connects to the Common Core State Standards and is organized around the Technological Literacy Assessment of the National Assessment of Education Progress (NAEP), which focuses on three areas that characterize a technologically literate person: knowledge, capabilities, and critical thinking and decision making. This resource provides everything reading teachers need to begin using technology to deepen and enrich literacy learning for all students. In addition, the author maintains a companion blog to update and add helpful teaching links. Book Features: An explanation of the concept and practices of literacy 2.0, and how it differs from literacy 1.0. Specific examples and resource links for using technology with diverse learners in the K-8 classroom, including translation sites and multilingual materials. Examples of teacher-to-student and student-to-student wiki and blog interactions. Companion blog offers ongoing support, including links to resources, new teaching tools, classroom examples, and more. "There are many things that I love about this book. It is written with a voice wise to both the opportunities and the challenges of classroom teaching. It also contains a vast number of ideas that can be

immediately used in your classroom. Of course, too, it describes effective teaching of new literacies with so many new technologies. In addition, it begins by providing a clear and compelling framework to put all of the upcoming ideas into a package that will make perfect sense to any teacher.” —From the Foreword by Donald J. Leu, Neag Chair in Literacy and Technology, University of Connecticut, Neag School of Education
“Written in a clear and practical format, this book weaves research-based practices across print and digital literacy worlds into engaging learning communities for younger and older readers alike. Denise Johnson’s innovative lessons and assessment ideas provide step-by-step supports for designing curriculum in a Web 2.0 world.” —Julie Coiro, University of Rhode Island
