Take a Deeper Look Here is a Paragraph from The Book about making voice call or send message You can use Echo Show to make a voice call or send a message. However, the person you intend to call or send a message to must have a compatible device such as a tablet, Echo, or smartphone and the Alexa app installed. When it comes to video calling, you can only call someone who has an Echo Show device, or someone who has a video enable phone with the Alexa app installed. Further, you can only call people in your contact list. To make a video call, all you have to do is tap on the onscreen icon for video call. If the person is in your contact list, Alexa will connect you (you can also command Alexa to connect you to the person by saying the person's name). The same applies to a voice call and messaging. To access the feature, tap the "speech" bubble somewhere at the middle of the toolbar. From here, tap the contacts icon that should be somewhere at the top right corner. The feature shall ask for access to your contact (if you're using the feature for the first time-you may also need to enter and validate a phone number). Once you allow the feature access, it will show you a list of contacts you can call with your Echo Show. When you tap a contact's information, you will note an icon underneath the contact's name. This icon will allow you to send a message or start a voice and video call. On the Echo Show, if the person you are calling has an Echo Show device, the default call made will be a video, which you can turn off by commanding Alexa to turn the video off.
