updates on the Coalition Government and guides to what is in the book. The added activities are well thought out and can be adapted or expanded to suit the needs of particular students." Hedley Bashforth, Teaching Fellow in Social Policy, University of Bath, UK "Social Policy: An Introduction, now in its fourth edition and eleventh year, will remain a core social policy text on reading lists across the country due to its well written and comprehensive nature. Completely revised, it has been updated and extended to reflect contemporary developments in social policy, including the policy implications of the Coalition Government, and now includes a chapter on global social policy environments reflecting the continued internationalisation of social policy debates. Updated pedagogical features, which include activities for the reader, learning outcomes at the start of each chapter and detailed case studies throughout, enhance this thought-provoking and stimulating text." Dr Liam Foster, University of Sheffield, UK "This book provides, as it states, an introduction to the field and does so by adopting a highly attractive pedagogic style that evidences, at every turn, a sensitivity to the approaches to learning of contemporary students. Although it is tailored to meet the needs of primarily first year specialist students, it is equally suitable for those on other programmes who are taking an option in social policy. Because the book anticipates theoretical issues and debates and students will confront as they

progress to a more advanced level, it will also retain value as be a longer-term reference resource. I will certainly be citing it on a second year core course I teach. It is immediately clear that a great deal of thought has been invested into designing this book. What Blakemore and Warwick-Booth have produced is a clearly laid out and well-structured analysis of impressive breadth that is a readily accessible learning instrument both for student and teacher. Importantly, it provides numerous opportunities to experiment with new ways of approaching the teaching of the subject. Each chapter sets out clearly expressed learning outcomes with a fair balance of theoretical and empirical concerns. Visual displays in box material, graphs and flow charts provides a most effective means for absorbing the large amount of ground covered. There is good incorporation of statistical material and up to date policy developments. Students are also encouraged to exploit useful links to internet and other media sites. Particularly attractive from a teaching point of view are the range of tasks set for the students which are aimed clearly at rapid capacity building. Chapters end by listing the key terms and concepts addressed to aid revision of material. This is repeated in the glossary at the end of the book. Most of the materials are derived from the British context, but there is also a secondary focus on EU member states and beyond, as well as a good chapter on global social policy." David believes that a sociology book should enable the reader to understand social problems. David uses his background, including research on the single homeless, to look at sociological perspectives and research methods. The book looks at the variety of perspectives, including Marxism, Functionalism, Feminism, and Neo-Liberalism. David's political experience is relevant here. His transport background, as both a worker and a lecturer, is reflected in the chapters on urbanism. A sociology book that claims to be comprehensive but ignores global warming would be nonsensical as it is the most important problem for current and future generations; therefore, this book discusses this issue and what to do about it. David's chapter on crime looks at the importance of crime to the victims, using statistics, so that it presents a different perspective to many other books. The chapter on race reflects the ways in which perceptions of immigration have little relationship to the actual data which is available and also the way in which the media has a great influence on public opinion. David uses his examiner experience, as well as teaching experience, to examine the different aspects of the educational system. The chapter on religion reflects the wide variety of views on this subject. As a Quaker, David's views on religion have a Quaker

perspective and this is reflected in his book. The hatred towards people of other religions or no religion is also examined in both contemporary society and the past. The influence of education and attitudes towards it are examined. David has put in the chapter on questions and answers since many students have a problem in knowing where to start when answering exam style questions. This book would be ideal for first year university students, including the London International Degree, as well as for A Level students looking for different material. Learning Through Cooperation Ltd. hopes that this book will provide support to anyone sitting their exams.
