In recent decades, a significant volume of literature on the subject of counterintelligence has become available. The knowledge given by this literature has addressed the confusion surrounding counterintelligence methods and organizations in addition to explaining certain taboos and stereotypes. Counterintelligence issues are understood differently in European countries in comparison to the rest of the world. The factors accounting for this difference are several: the diversity of political systems, continental law, human rights, history, nations' culture, language(s), economy, geostrategic position, urban concept of cities, etc. Nevertheless, some similarities in counterintelligence methods in different regions also exist. The Anatomy of Counterintelligence: European Perspective offers a concise overview of counterintelligence measures practiced in Europe that can rarely be found in standard texts; it provides information about counterintelligence staff, the definition of principles of counterintelligence, the targets of foreign intelligence services, how to identify agents and operatives (as well as operatives working undercover as diplomats) and some of the dilemmas in counterintelligence in the light of current events. The book also presents the case of Vladimir Vauhnik, a Slovenian counterintelligence operative in the time of Nazi Germany. The Anatomy of Counterintelligence: European Perspective will be of particular of interest to political science scholars in Europe who are interested in studying the European angle of counterintelligence and its influence on the organization of European counterintelligence services as well as national security policy.

From his first appearance as Mork from Ork on the 1970s sitcom Happy Days, Robin Williams was heralded as a singular talent. In the pre-cable television era, he was one of the few performers to successfully transition from TV to film. An Oscar-winning actor and preternaturally quick-witted comedian, Williams became a cultural icon, leaving behind a large and varied body of work when he unexpectedly took his own life in 2014. This collection of new essays brings together a range of perspectives on Williams and his oeuvre, including beloved hits like Mrs. Doubtfire, Good Morning, Vietnam, Good Will Hunting, The Fisher King, Dead Poets Society and Aladdin. Contributors explore his earlier work (Mork and Mindy, The World According to Garp) and his political and satirical films (Moscow on the Hudson, Toys). Williams's darker, less well-known fare, such as Being Human, One Hour Photo, Final Cut and Boulevard, is also covered. Williams's artistry has become woven into the fabric of our global media culture.
