

Ancient Post Flood History Historical Documents That Point To Biblical Creation

For too long many Christians have doubted the stories in Genesis such as creation and the Great Flood. But more and more today we see Christian scientists finding evidence to prove that these stories are in fact true, disproving the theories of mainstream scientists. Our history books today don't even acknowledge our creator God or the stories of Genesis (even though most, if not all, ancient civilizations had similar stories like the ones we find in Genesis); therefore, it's impossible with today's history books to study ancient civilizations and historical figures before and after the Great Flood. This book is written to provide Christians a true representation of the ancient universal history of mankind in light of the book of Genesis.

Despite the fact that the name of many characters mentioned in the Old Testament, like David, King of Israel, have been recently confirmed by archaeology as well as their epoch and the events in which they were involved, most archaeologists continue to deny the historicity of the Bible they view as pious fiction or a mythical account. They argue that the major events in the Bible such as the victory of Abraham against Chedorlaomer, an unknown king of Elam around 2000 BCE, the victory of Moses against an unknown Pharaoh around 1500 BCE or the victory of Esther, an unknown Persian Queen, against an unknown vizier of Xerxes, never existed because they left absolutely no evidence. They also explain that according to what we know today, these events could not have occurred. These logical arguments are impressive but a precise chronological analysis based on absolute dates, coupled with a rigorous historical investigation, shows that all those major events really took place at the dates and places indicated.

Provides an account of what is known about the remotest geological ages, comprising chapters on the different kinds of evidence concerning man and his physical environment.

Did Noah's Flood really occur, or is it a MYTH? Yes! God did really drown that world, except for Noah and a PART of his family. But why did God submerge that entire world? How really WICKED had that society become? Who were the main characters that led it to its doom? What kind of EVILS were they practicing? Gleaning information from ancient sources, Herman Saini provides detailed answers to these questions. He explains why pre-Flood history seemed lost, and restores much of that history. He tells the gripping, yet sobering history of the universe and man from the creation of Adam and Eve, and how their son Cain sold himself to work EVIL. His descendents followed in his footsteps and led the world to its doom. He draws vital lessons from that experience to enable men to avoid the same fate in a fast approaching great tribulation. HERMAN SAINI has been an accountant and business consultant for over 16 years. He has developed a model of economic development and international trade that nations can use as a guide to develop plans for economic growth. He holds a chemical engineering degree, a MBA, and has been a Ph.D. candidate in marketing, having completed three years of work towards the degree. He is also licensed as a Certified Public Accountant. He maintains two blogs, the purpose of which is to "preach the gospel of the soon coming kingdom of God," in fulfillment of the prophecy in Matthew 24: 14. You can read his articles at www.thetrue religionreport.com, and his weekly messages at www.thetrue religionreport.com/blog1. He currently lives in Holiday, Florida.

Ancient history is the aggregate of past events from the beginning of writing and recorded human history and extending as far as post-classical history. This is a history book written for a general audience. It inherits its title from the peculiar introduction to the story of Noah's flood, in the 6th chapter of the biblical Genesis, where the "sons of God" saw that the daughters of men were beautiful and took them as wives. There, they are described as "heroes of old" and "men of renown", supposedly at a time when mankind was just created, eight generations before Noah. It is about history and not theology, although it is difficult not to mention and discuss various theological ideas and trends. It is about setting aside any preconceived ideas and doctrinal notions, recovering the prehistory from the earliest chapters of Genesis, and placing them in their proper context. This book's intent is to reveal the historical facts behind the stories. Buy this book now.

This book is a Christian timeline of ancient post-Flood history based on Bible chronology, the early church fathers, and ancient Jewish and secular history. This can be used as a companion guide in the study of Creation science. This revised edition adds the background history of nine new countries. Learn the true origins of the countries and people of France, Germany, Denmark, Sweden, Ireland, Scotland, Greece, Italy, Russia, Egypt, Israel, Iraq, Iran, China, the Arabs, the Kurds, and more. Some questions answered: Who were the Pharaohs in the times of Joseph and Moses? When did the famine of Joseph occur? What Egyptian documents mention these? When did the Exodus take place? When did the kings of Egypt start being called "Pharaoh" and why? Who was the first king of a united Italy? Who was Zeus and where was he buried? Where did Shem and Ham rule and where were they buried? How large was Nimrod's invasion force that set up the Babylonian Empire, and when did this invasion occur? What is Nimrod's name in Persian documents? How can we use this information to witness to unbelievers? Brought to you by Biblefacts Ministries, Biblefacts.org

The Tower of Babel: The Cultural History of Our Ancestors reveals our shared ancestry as never before! Many are familiar with the Biblical account of Babel, but after the dispersal, there was a void beyond Biblical history until empires like Rome and Greece arose. Now, discover the truth of these people groups and their civilizations that spread across the earth and trace their roots back to Babel as well as to the sons and grandsons of Noah. Many of today's scholars write off what occurred at the Tower of Babel as mythology and deny that it was a historical event. Beginning with the Biblical accounts, author Bodie Hodge researched ancient texts, critical clues, and rare historic records to help solve the mystery of what became of the failed builders of Babel. For the purpose of defending the Bible, Hodge presents these and other vital historical facts surrounding this much-debated event. Teens and older can use this layman's reference for Biblical classes, ancient history, apologetics training, and to realize their own cultural connection to the Bible. A speaker and researcher for Answers in Genesis, Bodie Hodge is known for his contribution to and authoring of other Christian apologetics titles including: Begin Fall of Satan Answers Books Series How Do We Know the Bible is True Vol 1 & 2 Demolishing Supposed Bible Contradictions Series

Ancient calendars found around the world are designed to end one point in time. They communicate an urgent warning to everyone alive today! Complex bronze and gold clocks with multiple dials are found in museums around the world. Why they have such advanced intricacy has stumped scientists for hundreds of years. This book reveals why the ancients built so many pyramids, observatories as well as those complex gold and bronze clocks with more than one dial. It surprised me greatly to discover that their various complex designs in one way or another converge on 21 December 2012. It amazes me that

ancient cultures separated by thousands of miles of geography and thousands of years in chronology agree so precisely in the cyclical nature of time, history and prophecy, which is history written in advance. The most famous example is the Mayan-Aztec calendar, which ends its 25,626-year cycle on that momentous date. Some researchers have also found 21 December 2012 in what is called, the Bible Code. Using very different research methods, I discovered it in the Bible's book of Revelation and Daniel's prophecies. It is one of the most important dates in the plan of God for all humanity!

Ancient history is fascinating, but it can be difficult to find material that teaches it from a Christian perspective. Even harder is finding a history curriculum that captivates students. But Angela O'Dell's newly revised *The World's Story 1 - The Ancients* does both! Students will learn all about the ancient civilizations of the Middle East, Europe, Africa, Asia, and the Americas from a strong Biblical perspective. Focuses on History and interweaves a Christian perspective throughout. Features an engaging historical narrative. First volume in a three-book world history series for upper elementary and junior high students. The text covers Biblical history, also educating students about civilizations mentioned in the Bible, including ancient Egypt, ancient Israel, ancient Babylon, ancient Persia, ancient Greece, and ancient Rome, up to the development of the early Church. It also discusses other ancient civilizations from around the world.

science, history, homeschool, evolution, young earth creation, ancient manuscripts

The historical record of humankind in the third millennium before Christ bears the stamp of Noah's family and of the events and structures outlined in Genesis 9-11. The purpose of monogenetic study is to consolidate the Biblical explanation of human origins by generating a historical science based on the family of Noah. The goal is to create a coherent Christian synthesis of the disjointed data of antiquarian study. This goal was pursued by a variety of authors between 1650 and 1820: Samuel Bochart, Paul Pezron, William Stukeley, Jacob Bryant, Sir William Jones, George Faber, and others. My logic resembles theirs. The difference between my work and theirs lies in the data furnished by archaeology since the discovery of the Sumerians around 1880. The challenge of my work is to combine their logic with the essential information unavailable to them. To trace the nations concretely from Noah is to consolidate the usage of John 3:16 and to picture humankind as former recipients of salvation fit for the evangelical mystery of regeneration. Without completing this task, we leave the "world" in the anonymous, profane condition. In the final analysis, the Genesis-10 study is an attempt to advance the cause of holiness at the expense of profanity by countering the view that the world of humankind is the anonymous result of natural causes. The goal of monogenetic study is to consolidate, in scientific terms, the Biblical view that this world owes its existence to the sacred history of Noah. The study embodied in this postdiluvian timeline takes the Flood as seriously as it can be taken. Instead of reasoning about the Flood, it reasons from the Flood. That is what faith does. It "sanctifies" subjects by conferring on them the value of presuppositions rather than debate topics. I put the Flood to work by deducing the whole of ancient world history from it. Logically I cannot do otherwise. If the Flood happened and reduced the human race to four men and four women, it holds the key to every scrap of evidence deriving from human existence in the second half of the third millennium BCE. An accurate understanding of biblical monogenesis must be built, not on generalities, but on specific identifications of ancient names with a core of elite human beings listed in the text of Genesis 10-11. The Table of Nations in Genesis 10 refers to both races and men according to a pattern of interlocking feudal relationships. A systematic study of these lists by means of comparison with selected historical and mythological names results in certain surprises. At the time of the Flood, the four female survivors gained high importance as genetic carriers of the Adamic heritage of four races. thing- the lack of theologically explicit leadership. The eight persons who survived the Flood lived and breathed theocracy. Efforts to interpret these persons from a modern, democratic perspective have been ludicrous. In fact, the democratic mind despairs of ever understanding them and translates that despair into denial. Modern man doubts the Book of Genesis because he cannot cope with its political implications. The early postdiluvian lived in a context where gods, heroes, kings, and priests were given. "Kingship descended from heaven," reports the Sumerian King-List. Secularists have done their best to suppress this reality. They instinctively shun conflict based on the rivalry of theocratic power. Much of the narrative content of this study concerns such conflict. During the 350 years that remained to Noah after the Flood, his family created a political universe as evidenced by the systematic appearance of Sumerian city-states and the voluminous Sumerian King-List. We still live in the outer precincts of that universe.

In depth study of the book of Genesis chapters 6 through 10. Insightful looks into the ancient history of the pre-flood and post-flood world. This volume looks at foundational Christian doctrines from Genesis and tries to put them into the modern application. In addition to enlightening on the Biblical text, this series also defends the Christian faith against pseudoscience and pagan philosophies. Why you believe what you believe is extremely important because you need to share those reasons with others. Those reasons should be rational. The Genesis series provides a logical and historical understanding of the faith.

The hallmark of a healthy humanity is a genuine connection to the truth of our historical identity. History, simply put, is what happened. But how do we find our way to the origins of the human race thousands of years ago? We go back two and a half millennia to Greek artists who were closer to it, and whose marble sculptures and vase paintings bear a silent witness to the key characters and events described in the early chapters of the Book of Genesis, validating their reality. Here is some of what is revealed in this extraordinary book: *Zeus' and Hera's connection to the serpent-entwined apple tree. *Cain killing Abel depicted on the Parthenon. *Seth-men depicted as Centaurs who seize Cain-women as their wives. *The unique Greek depiction of Noah's Flood. *The Cain-woman who survived the Flood as Ham's wife. *The true landing site of Noah's ark in the mountains of Ararat. *Naamah reconsecrates her grandson Nimrod to the way of Cain. *Nimrod/Herakles usurps the authority of Noah. *The Genesis serpent transfigured into Zeus. *The Altar of Zeus in Pergamum is the throne of Satan in the Book of Revelation. *The post-Flood Cainite onslaught against the line of Seth. *The true identity of the Amazons. After the Flood illuminates the hidden role and complicated legacy of religion in the emergence of a global environmental consciousness.

The beginning chapters of Genesis come alive with characters, places, and events almost totally unknown outside of the Bible itself except when illuminated by the fascinating history of the ancient Near East. Did a man we call Adam actually exist? Was someone known to us as Noah warned of a cataclysmic flood and instructed to build an ark? Could the Tower of Babel incident actually have happened? When archaeological artifacts and literature began to surface from ancient Mesopotamia (present-day Iraq) nearly 200 years ago, only a handful of archaeologists dared to point out that there appeared to be a close relationship between Genesis and the ruminations of the Sumerians and Akkadians who once lived there. Often enduring great personal hardships, these archaeological pioneers produced copious translations and marvelous insights. Cuneiform texts compiled from almost two centuries of exploration have added significantly to our understanding of the historical underpinnings of the Old Testament. The reader will gain a new appreciation for the historical integrity of Genesis 2-11, and marvel at the evidence that the persons, places, and events depicted, though long misunderstood, could be real. Please visit Richard J. Fisher's web site at <http://www.historicalgenesis.com>.

Here is your comprehensive guide to creationist thinking on the Flood in an easy-to-understand style! Get your facts and misunderstandings about the Flood straightened out! Study the history of the immediate post-Flood world, as well as modern considerations of the histories of earth sciences. Read four fictional short stories that place the reader back in time just before the Flood—showing a world filled with non-belief and the few who reached out to save others with God's truth. *Don't Miss the Boat* provides various perspectives on the biblical account of the Great Flood that speak to both the technical and

scientific evidence we see around the world today. This book contains information for the layman who wants to know the basics, as well as the solid evidence that can be shared with anyone. Theological considerations, historical essays, and scientific implications are included, as well as fictional representations that convey the emotional power of God's judgement on a wicked pre-Flood world, rounding out this unique resource.

There is general agreement in the field of Biblical studies that study of the formation of the Pentateuch is in disarray. David M. Carr turns to the Genesis Primeval History, Genesis 1-11, to offer models for the formation of Pentateuchal texts that may have traction within this fractious context. Building on two centuries of historical study of Genesis 1-11, this book provides new support for the older theory that the bulk of Genesis 1-11 was created out of a combination of two originally separate source strata: a Priestly source and an earlier non-Priestly source that was used to supplement the Priestly framework.

Though this overall approach contradicts some recent attempts to replace such source models with theories of post-Priestly scribal expansion, Carr does find evidence of multiple layers of scribal revision in the non-P and P sources, from the expansion of an early independent non-Priestly primeval history with a flood narrative and related materials to a limited set of identifiable layers of Priestly material that culminate in the P-like redaction of the whole. This book synthesizes prior scholarship to show how both the P and non-Priestly strata of Genesis also emerged out of a complex interaction by Judean scribes with non-biblical literary traditions, particularly with Mesopotamian textual traditions about primeval origins. The Formation of Genesis 1-11 makes a significant contribution to scholarship on one of the most important texts in the Hebrew Bible and will influence models for the formation of the Hebrew Bible as a whole.

This book provides summary apologetics from about 200 references. It is unique in that many authors with differing viewpoints are put together in brief key point summaries. Some of the books covered are 1100 pages long. The original authors views are briefly integrated and compared. The different views of creation are also discussed and compared and given a open minded weighing. Are you concerned about the fact that 70% of our youth no longer attend church and do not have a biblical world view? The naturalistic or humanistic world view they adopt from schooling favors the following: 1. Man evolved from primates and is a biological machine with no purpose. 2. There is no source of true morals and thus morals are relative and determined by whatever a given group decides or whatever is most popular. 3. Since man is only and animal, there is no basis for individual human rights, only rights for the masses. There are some good arguments provided in the book to counter all of this and provide a biblical world view. These arguments are brief and easy to share in witnessing situations.

From Flood to Fallen Kingdoms (FFFK) is the first truly authoritative, detailed and coherent, young-earth creationist overview of the post-flood history of the ancient Near East (and the land of Israel), for laypersons and scholars alike. It is a unique work which does not have serious rivals in the biblical-creationist book market. The lack of a good and comprehensive introductory book was the main reason why I started to write the book in the first place. I have made use of the best available scholarly literature, Christian as well as secular. The book contains a lot of my own research, but it is also in very good agreement with the archaeological articles written by A. J. M. Osgood (can be read at creation.com) and the books of David Down (Unwrapping the Pharaohs and Unveiling the Kings of Israel), for example. FFFK follows the absolute chronology of Floyd Nolen Jones' The Chronology of the Old Testament. As a Bible-faithful narrative introduction to the history and archaeology of the ancient Near East, From Flood to Fallen Kingdoms is far better than the existing apologetic works that come towards the genre of FFFK (Evidence for the Bible by Clive Anderson and Brian Edwards; Ancient Post-Flood History by Ken Johnson; The World's Story 1: The Ancients by Angela O'Dell, for example). From Flood to Fallen Kingdoms will strengthen the faith of numerous believing readers who take the Holy Scriptures seriously. They will also be surprised to see how well the first five post-flood centuries, from Ararat to Abraham, which until now have been in great darkness, can be elucidated through proper interpretation of biblical and archaeological evidence.

The story of Noah's flood is one of the best-loved and most often retold biblical tales, the inspiration for numerous children's books and toys, novels, and even films. Whether as allusion, archetype, or literal presence--the American landscape is peppered with "recreations" of the ark--the story of Noah's animals and the ark resonates throughout American culture and the world. While most think of Noah's ark as a dramatic myth, others are consumed by the quest for geological and archeological proof that the flood really occurred. Persistent rumors of a large vessel on the mountain of Ararat in Turkey, for instance, have led many pilgrims and explorers over the centuries to visit that fabled peak. Recent finds suggest that there may have been a catastrophic flood on the shores of the Black Sea some 7,600 years ago. Is this then the reality behind the ancient tale of Noah? More to the point, why does it matter? What does the story of the Flood mean to us and why does it so stir the collective imagination? When the Great Abyss Opened examines the history of our attempts to understand the Flood, from medieval Jewish and Christian speculation about the physical details of the ark to contemporary efforts to link it to scientific findings. Unraveling the mythical dimensions of the parallel Mesopotamian flood stories and their deeper social and psychological significance, J. David Pleins also considers the story's positive uses in theology and moral instruction. Noah's tale, however, has also been invoked as a means of justifying exclusion, racism, and anti-homosexual views. Pro-slavery advocates, for example, used the story of Noah's Curse on Ham's son Canaan to rationalize the enslavement of Africans. Throughout this expansive and lively book, Pleins sheds new light on our continuing attempts to understand this ancient primal myth. Noah's Flood, he contends, offers a unique case study that illuminates the timeless and timely question of how fact and faith relate.

Past, present and future finally collide in this fascinating, action-packed, enlightening account of our long-forgotten ancient past catching up with its impending Earth-shattering future! Following annihilation of their own world after a cosmic collision between Triton and Pluto, which sent Venus spiralling into a near-Sun orbit, the Venusian's set up the Atlantis Empire on Earth. However, following genetic enhancement of humanity, the cosmopolitan harmony was catastrophically interrupted by invading Reptilian forces from the Red Dwarf Star system which passed by our solar system 70K years ago. This sparked a 30K Cold War, also ending in global destruction. Finally, the past catches up with the present and following an unexpected encounter between brothers and a Venusian in waters off the Welsh coast, a highly publicised series of astonishing events unravels, captured instantly by social media. Then humanity faces the fact it really is not alone in the Universe, let alone on Earth!

In this provocative book, evolutionist and evangelical Christian Denis O. Lamoureux proposes an approach to origins that moves beyond the "evolution-versus-creation" debate. Arguing for an intimate relationship between the Book of God's Words and the Book of God's Works, he presents evolutionary creation--a position that asserts that the Father, Son, and Holy Spirit created the universe and life through an ordained and sustained evolutionary process. This view of origins affirms intelligent design and the belief that beauty, complexity, and functionality in nature reflect the mind of God. Lamoureux also challenges the popular Christian assumption that the Holy Spirit revealed scientific and historical facts in the opening chapters of the Bible. He contends that Scripture features an ancient understanding of origins that functions as a vessel to deliver inerrant and infallible messages of faith. Lamoureux shares his personal story and his struggle in coming to terms with evolution and Christianity. Like many, he lost his boyhood faith at university in classes on evolutionary biology. After graduation, he experienced a born-again conversion and then embraced belief in a literal six-day creation. Graduate school training at the doctoral level in both theology and biology led him to the conclusion that God created the world through evolution. Lamoureux closes with the two most important issues in the origins controversy--the pastoral and pedagogical implications. How should churches approach this volatile topic? And what should Christians teach their children about origins?

Includes full student text, review questions, vocabulary, and answer keys. The worldwide Flood is one of the most discounted records in the Scriptures. Yet it is supported around the world by historical

accounts. Take a look at feasibility studies on the safety and the stocking of the Ark. The Geologic Column ought to prove that fossils reveal the age of the earth. They show progression from simple to complex organisms over millions of years. But do they? Take a look at "living fossils." Meet the extinct creature found only in the "oldest" layers but more complex than "later" life forms. Consider the real conditions that surrounded the Flood and the Ice Age.

This book is written to make sense of the Genesis Flood, in terms of both biblical and scientific accuracy. As well as the creation of both the earth and the universe. God has given us the Bible not only to guide our faith but to provide us with ways to interpret the mysteries of the earth's origin and destiny.

Foreword / Henry M. Morris -- Foreword / John MacArthur -- Prologue / Terry Mortenson, Thane Hutcherson Ury -- The Church Fathers on Genesis, the Flood, and the age of the Earth / James R. Mook -- A brief overview of the exegesis of Genesis 1-11 : Luther to Lyell / David W. Hall -- "Deep time" and the church's compromise : historical background / Terry Mortenson -- Is nature the 67th book of the Bible? / Richard L. Mayhue -- Contemporary hermeneutical approaches to Genesis 1-11 / Todd S. Beall -- The Genre of Genesis 1:1-2:3 : what means this text? / Steven W. Boyd -- Can deep time be embedded in Genesis? / Trevor Craigen -- A critique of the framework interpretation of the Creation Week / Robert V. McCabe -- Noah's Flood and its geological implications / William D. Barrick -- Do the Genesis 5 and 11 genealogies contain gaps? / Travis R. Freeman -- Jesus' view of the age of the Earth / Terry Mortenson -- Apostolic witness to Genesis Creation and the Flood / Ron Minton -- Whence cometh death? : a biblical theology of physical death and natural evil / James Stambaugh -- Luther, Calvin, and Wesley on the Genesis of natural evil : recovering lost rubrics for defending a "very good" creation / Thane H. Ury -- A biographical tribute to Dr. John C. Whitcomb Jr. / Paul J. Scharf -- Affirmations and denials essential to a consistent Christian (biblical) worldview

This book answers the question as to the origin of Early Man. Was he created by God or did he evolve through a long evolutionary process? Who was the first Early Man to live on this Earth? What did he look like? Was he half ape and half man? Paleo archaeologists believe it is possible to trace Early Man back from about 2 to 3 million years ago to a more recent time when he could be truly called Early Man. Is it possible that Adam & Eve were the first man and woman that can truly be called Early Man? The science of archaeology and anthropology would have us believe that Early Man was a Stone Age person. He is often related to the Old Stone Age, the Middle Stone Age and the New Stone Age periods. He is often referred to as the Palaeolithic Man, the Mesolithic Man and the Neolithic Man. What were the great accomplishments of Early Man? Is it possible that the mysterious, megalithic and colossal stone and pyramidal structures that are present in various parts of the earth were constructed by Early Man? What type of stone tools did he manufacture? Who was Modern Man? When did he appear on this Earth? Is there a gap in time that separates Early Man from Modern Man? How is it possible to relate Early Man throughout Europe, Asia, Africa, Australia, North and South America to Modern Day Man? This book reveals how it is possible to Bridge the Gap between Early Man and Modern Man. To find the answer you must read this book? Volume Two is a sequel to Volume One entitled, "Bridging the Gap: The First 6 Days." Volume One bridges the gap between the origin and history of the Earth about 4.6 billion years ago to the time of Early Man. It also reveals the astounding relationship that exists between the record of geology and the Biblical record of the earth throughout this vast period of time. Both books are a must to read. "The Author brings the History of Early Man and the Old Testament account into focus in a very logical way, so that we in the present feel a real connection to the past. This organized information is extremely helpful in adding to the wonder of the Creator's Plan for Mankind." W. Gerry Loewen, BA (Econ), LLB "Linking contemporary earth science knowledge with man's ancient beginnings is an engaging story. This book is for you if you've ever wondered how the Bible and science can be complementary. This book is for you if you've ever wondered about the origin of our earth, its hidden secrets and its early inhabitants." Cheryl Miller B.Ed. MAL Administrator Glenmore Christian Academy The science of Archaeology and anthropology would have us believe that Early Man has evolved from a certain ape ancestry. They believe it is possible to trace Early Man back from about 2 to 3 million years ago to a more recent time when he could be truly called Early Man. Who was Modern Man? When did he appear on this Earth? Is there a gap in time that separates Early Man from Modern Man? How is it possible to relate Early Man throughout Europe, Asia, Africa, Australia, North and South America to Modern Day Man? This book reveals how it is possible to Bridge the Gap between Early Man and Modern Man. To find the answer you must read this book? Volume Two is a sequel to "Bridging the Gap: The First 6 Days." (Vol. One). Volume One bridges the gap between the Creation of the Earth about 4.7 billion years ago, the Creation of the first Bacteria and Algae about 4.5 billion years ago, the creative, dramatic Cambrian Explosion of Animal life about 530 million years ago and the creation of Early Man about 6,000+ years ago. Both books are a must to read. "The Author brings the History of Early Man and the Old Testament account into focus in a very logical way, so that we in the present feel a real connection to the past. This organized information is extremely helpful in adding to the wonder of the Creator's Plan for Mankind." W. Gerry Loewen, BA (Econ), LLB "Linking contemporary earth science knowledge with man's ancient beginnings is an engaging story. This book is for you if you've ever wondered how the Bible and science can be complementary. Ancient Post-Flood History Historical Documents That Point to Biblical Creation CreateSpace

After pondering over the fact if my book is historical or religious, I have decided that the book best benefits philosophy. After retiring from work as a medical biologist, I began a research project, and it has grown and grown into a book. Darwin wrote a very controversial book, and he had difficulty in having it published because it contested theology. But not to worry; today, we may have it published and all may enjoy it. The Islamabad-Peshawar area had a history of six thousand years, and the Euphrates was its fourth river. Seth ventured north, up the twisting river that had once spilled a course along the eastern border of what is now Iran. Cain built his city at 49 degrees north on the Volga River, in the land that became Sythica. After the city was two hundred and seventy years old, Noah came down from the Black Sea, and his ship was named The Pride of Two Worlds. The lineage of Seth entitles early Europe, from the Volga to the Baltic. In the East, writing is found as far away as Northern China and dated to the very generation of Enoch. By the time of the historic flood, the population in these areas exceeded a half million. After the flood the Japhetic lineage expanded from Troy I into both Greece and Persia. The Hamitic line established Dynasty III in Egypt, and the Semitic lineage established Dynasty I of Kish. Abraham left the Euphrates Basin exactly five hundred years after the birth of Adam.

Study scientific data and biblical truths in five chapters: Science in the Bible, The Theory of Evolution, Science and the Flood, The Bible and Ancient History, and Fulfilled Prophecy.

This collection of original essays repositions medieval literary studies after an era of historicism. Analyzing the legacy of Marxist and materialist theory on medieval literary criticism, the collection offers new ways of reading texts historically. Drawing upon aesthetic, ethical, and cultural vantage points and methods, these essays demonstrate that a variety of approaches and theories are "historical" and can change what it means to historicize medieval literature. By defining our post-historical moment in medieval English literary studies in terms of new possibilities, this collection will have broad appeal to those interested in the English Middle Ages, history, culture, and reading itself.

Evidences and commonalities explored from ancient man around the globe! Why structures echoing the Tower of Babel have been recreated on almost every continent and major culture What artifacts and archaeology, technology and innovation, really reveal about the origin of mankind Why many biblical symbols (rainbows, human sacrifice, mountains, the Son/ sun worship) were,

and continue to be, distorted in pagan religious practices What the historical record reveals about Satan's "counterfeit" of God's plan for humanity All over the world there are similar findings of ancient religions, cities and towers, world travel, advanced astronomy, and civilized government. Over the course of two years, a team of researchers from Jackson Hole Bible College has worked to bring together the different pieces of the convoluted mystery and history of ancient man. Hours of researching, trips to various sites around North and Central America, visits to museums, and meetings with experts have provided the team with an overwhelming amount of evidence for the intelligence of these early innovators. A jumble of anomalies and magnificent structures continue to confound archaeology and anthropology today, yet as the dots are connected, one finds history as described in the biblical record.

The Language of God in History reinterprets history and archeology within a biblical framework. It also refutes the atheistic humanism behind modern archeological, scientific, and historical viewpoints. Archeological evidence is then re-examined through a biblical worldview, revealing how many ancient buildings appear to have originally been designed not to worship Pagan deities, but the one true God. By deciphering the Language of God hidden in these ancient structures, some startling conclusions are drawn concerning the spiritual teachings of the godly people before the Flood - especially the prophet Enoch. The pyramids of Egypt's Old Kingdom are particularly examined as possible storehouses of antediluvian spiritual and scientific wisdom. Next, using facts found in the Bible and the Book of 1 Enoch, the Nephilim, and the possible causes of the Great Flood are explored, as well as the swift Post-Flood devolution of mankind into sin - as Noah and Shem's righteous witness were forgotten, paganism spread across the globe, and Yahweh's truths were gradually perverted - just as they had been prior to the Flood. Finally, the rise and fall of ancient Israel, the facts behind their migrations in the Diaspora, and the re-immersion of Israel in modern times is discussed in preparation for the study of biblical prophecy in the final book of this series.

Is it possible that the mythical gods of polytheistic Greece, Egypt, Assyria, etc. were actual people that lived shortly after the flood of Noah? The Last Nephilim is a work of historical fiction based upon the first chapters of the book of Genesis and several ancient apocryphal texts. The Bible presents the sons of Noah as monotheistic followers of the God of the universe. So how did their grandchildren end up reigning over polytheistic empires? What happened? This story presents the Nephilim of Genesis chapter six as gifted giants that essentially promoted worship of themselves as deities to post-flood human populations. The Bible asserts that monotheism was before polytheism, but there is no clear explanation as to why polytheism became so prevalent such a short time after the flood. This book describes one possible explanation as to what may have occurred to have resulted in the explosion of polytheism. Written in a beautiful, scholarly fashion. This is refined, provocative look at events in history. A fantastic read.?-Yasmin Esack, author of "The Mind Setter" Nephilim have been such an intriguing race of what appear to be super-humans as ancient texts indicate. Just the thought of such beings have always captivated me, causing my imagination to run wild as a boy and even still today as an adult. How fun to read a historical-fiction on these ancient beings that once existed on Earth. The Last Nephilim will inspire you to re-read the biblical account -Kenneth Paul Dykstra, author of "Other Earths/Other Life" Intriguing and catchy premise that seeks to synthesize received truth through illustration. A courageous and bold venture, accomplished by unwavering narrational authority that mixes fact, fiction belief and perception into a mapped shawl. -Azam Gill, author of "Blasphemy!"

The Bible barely mentions his name, but people of antiquity knew him well. Ancient historians recorded substantial information about him. Who was Nimrod? How could such a man be of such importance to today's believer? God's history is replete with accounts of His followers suffering terrible persecution. People of today's world are largely unaware of a lesser-known story, written by the blood of many believers at a time following God's destruction of the Old World. Nimrod was born into a New World, recently recreated by God. This virgin creation was untainted by the wickedness of the Old World. However, innocence did not last long. Eight people had traveled God's floodwaters of judgment in the security of His ark, but the curse of sin still tainted their souls. The prince of darkness wasted no time sowing seeds of rebellion in fertile hearts. He handpicked Nimrod to transform the New World into a cauldron of rebellion. The post-flood world began in present-day Iraq. Several cities conquered by Nimrod are still in existence today. The events happening in present-day Iraq are not coincidental. The world will witness more conflict and fulfilled Bible prophecy in this land until God's Seed returns to fulfill the ancient prophecy recorded in Genesis 3:15.
