Since its beginnings as a series of stories told to Kenneth Grahame's young son, *The Wind in the Willows* has gone on to become one of the best-loved children's books of all time. The timeless story of Toad, Rat, Mole, and Badger has delighted readers of all ages for more than eighty years. Friendly Rat, mild-mannered Mole, wise Badger, and kind—but conceited—Toad all live on the banks of the Thames. While Mole and Rat are content to go out in a row boat or travel the roads in a caravan, Toad prefers the excitement of motor cars. He's already wrecked seven! While his friends try to keep him out of trouble, his passion for cars eventually results in his being caught and kept prisoner in the remotest dungeon of the best-guarded castle in all the land. Somehow, he has to escape and get home but what will he find when he gets there? *The Wind in the Willows* is a book for those "who keep the spirit of youth alive in them; of life, sunshine, running water, woodlands, dusty roads, winter firesides." So, wrote Kenneth Grahame of his timeless tale of Rat, Mole, Badger, and Toad.

This accessible and cutting-edge work offers a new look at the history of western 'civilization,' one that brings into focus the interrelated suffering of oppressed humans and other animals. Nibert argues persuasively that throughout history the exploitation of other animals has gone hand in hand with the oppression of women, people of color, and other oppressed groups. He maintains that the oppression both of humans and of other species of animals is inextricably tangled within the structure of social arrangements. Nibert asserts that human use and mistreatment of other animals are not natural and do little to further the human condition. Nibert's analysis emphasizes the economic and elite-driven character of prejudice, discrimination, and institutionalized repression of humans and other animals. His examination of the economic entanglements of the oppression of human and other animals is supplemented with an analysis of ideological forces and the use of state power in this sociological expose of the grotesque uses of the oppressed, past and present. Nibert suggests that the liberation of devalued groups of humans is unlikely in a world that uses other animals as fodder for the continual growth and expansion of transnational corporations and, conversely, that animal liberation cannot take place when humans continue to be exploited and oppressed.

'I think everyone has at least one eccentric aunt or uncle in the family. I had more than one. My boyhood days were enlivened by their presence.' India's best-loved children's writer Ruskin Bond introduces us to some of the most endearing and adorable characters he has ever written about—his grandfather, with his unusual ability to disguise himself as just about anyone; the eccentric Uncle Ken, with his knack for trouble; the stationmaster Mr. Ghosh and his amazing family; and the unforgettable Aunt Ruby and her hilarious encounter with a parrot! Heart-warming, funny and delightful, *The Parrot Who Wouldn't Talk and Other Stories* features some old favourites as well as refreshingly new stories. Marked by Bond's inimitable style and trademark humour, and embellished with lively illustrations, this book will be a firm favourite with children.

This book has resulted from collaborative interactions between academic institutions and animal shelters. It contains a collection of eleven papers (one review and ten research articles) on the behavior of dogs and cats in animal shelters, which can be very challenging environments. The papers focus on stress and behaviors associated with stress; the effectiveness of shelter enrichment programs in reducing stress; the usefulness of shelter behavioral evaluations in predicting behavior and assessing adoptability; and interactions between humans and companion animals. The aim of this book is to provide information that will inform shelter programs and policies, and thereby improve the welfare of shelter animals.

A respected resource for decades, the *Guide for the Care and Use of Laboratory Animals* has been updated by a committee of experts, taking into consideration input from the scientific and laboratory animal communities and the public at large. This book provides an introductory text covering the use and misuse of behaviour tests applied to animals. By including illustrative examples from a variety of species, the book inspires the animal scientist to think about what a given behavioural test can be used for and how the results can be interpreted. This text includes: the dos and don'ts of running behaviour tests and interpreting the results; many clear, simple illustrations which make the information readily accessible, down to earth, practical advice yet a thorough, evidence-based approach; information on behaviour tests for a whole range of species from companion, farm, zoo, laboratory and wild animals; succinct yet comprehensive text, designed to be read cover to cover and stimulate further reading. This book is an essential item in the researcher's toolkit when embarking on and devising any animal behaviour test and is valuable to students, established researchers, teachers and practitioners of applied ethology, animal welfare science, and veterinary science.

Typically, the legal investigation of nonhuman life, and of animal life in particular, is conducted through the discourse of animal rights. Within this discourse, legal rights are extended to certain nonhuman animals through the same liberal framework that has afforded human rights before it. *Animals, Biopolitics, Law* envisions the possibility of lively legalities that move beyond the humanist perspective. Drawing on an array of expertise—from law, geography, and anthropology, through animal studies and posthumanism, to science and technology studies—this interdisciplinary collection asks what, in legal terms, it means to be human and nonhuman, what it means to govern and to be governed, and what are the ethical and political concerns that emerge in the project of governing not only human but also more-than-human life.

Whatever may be thought of the somewhat aristocratic pretensions of the lion, as the dog, after all, has the reputation of being the most intelligent of the inferior animals, I will allow this interesting family the precedence in these stories, and introduce them first to the reader. For the same reason, too—because they exhibit such wonderful marks of intelligence, approaching, sometimes, almost to the boundary of human reason—I shall occupy much more time in relating stories about them than about any other animal. Let me see. Where shall I begin? With Rover, my old friend Rover—my companion and play-fellow, when a little boy? I have a good mind to do so; for he endeared himself to me by

thousands of acts of kindness and affection, and he has still a place of honor in my memory. He frequently went to school with me. As soon as he saw me get my satchel of books, he was at my side, and off he ran before me toward the school-house. When he had conducted me to school, he usually took leave of me, and returned home. But he came back again, before school was out, so as to be my companion homeward. I might tell a great many stories about the smartness of Rover; but on the whole I think I will forbear. I am afraid if I should talk half an hour about him, some of you would accuse me of too much partiality for my favorite, and would think I had fallen into the same foolish mistake that is sometimes noticed in over-fond fathers and mothers, who talk about a little boy or girl of theirs, as if there never was another such a prodigy. So I will just pass over Rover's wonderful exploits-for he had some, let me whisper it in your ear-and tell my stories about other people's dogs.

AS SEEN ON CHANNEL 5 Heartwarming true stories from Channel 5's The Dog Rescuers, the RSPCA's tireless team of expert officers who save the lives of dogs in peril, return them to health and help them to find their forever homes. As a nation, we're big fans of man's best friend. Nearly a quarter of all British homes own a dog. Sadly, not all of them receive the love and care they deserve and some dogs are neglected or, worse, abused. Enter Channel 5's The Dog Rescuers. Every day, these dedicated and passionate RSPCA inspectors - like Anthony Joynes - contend with dog owners' abandonment and misuse of their pets, and spring into action on behalf of dogs in trouble, returning them to health, happiness and a loving new home. This collection of heartbreaking but ultimately heartwarming tales follows the likes of puppy Clover, who suffered damage to her face and lips, and Flint, the Lurcher who'd been used for badger baiting and lost most of his tail. When all seems lost, the RSPCA's dog rescuers are on hand, providing vital support to get Clover, Flint and friends the help they need and into forever families so that they don't just survive, they thrive.

Who Would Win? is back with another exciting bind-up featuring five more books in this action-packed animal series! There is a long history of the involvement of animals for tourism purposes in circuses, zoos, fairs, ecotourism and wildlife tourism, using animals as the prime focus of their experience. The wave of responsibility and sustainability that currently permeates the tourism field is catalyzing deeper moral questions about equity, equality, rights, justice, and values in regards to what constitutes acceptable tourism practice. Tourism and Animal Ethics represents a required extension of the sustainability imperative and environmental theory by providing a critical account of the role that animals play in tourism. This book explores the rich history of animal ethics research that lies outside the field of tourism for the purpose of providing greater theoretical, empirical and conceptual guidance inside the field. It examines historical and current practices of the use of animals in the tourism industry from both in situ to ex situ consumption and production perspectives, identifying a range of ethical issues associated with such use. This detailed examination of current animal ethics theories will be instrumental in determining the rightness or wrongness of these practices, and hence allow tourism practitioners and theorists to think about these issues and practices in a different light, minimizing the impact that the industry has on animals. This text provides an interdisciplinary overview of the moral issues related to the use of animals in tourism, and contains cutting edge research and boxed international case studies throughout. It will appeal to students, academics and researchers interested in Tourism Ethics, Sustainable Tourism and Wildlife Tourism.

This book presents all the publicly available questions from the PISA surveys. Some of these questions were used in the PISA 2000, 2003 and 2006 surveys and others were used in developing and trying out the assessment.
