The different traditions of migration research in different countries are closely related to national political patterns and the self-image of the respective nation-state -- either affirmatively reinforcing or critically questioning. If you place them side by side, much becomes questionable and debatable that previously seemed self-evident. This volume presents the migration research traditions in twelve countries: the traditional immigration countries Canada and Australia, four European countries with decades of immigration experience (Great Britain, Germany, Austria, the Netherlands), the new immigration countries Italy, Poland and Japan and the postcolonial countries India, Malaysia and Nigeria. In this way, from a comparative perspective, the volume opens the way to a better understanding of different research traditions, beyond the traditional Western context of discussion. We can better understand and put into perspective the different patterns of inclusion and exclusion of immigrants and intellectual discourses if we confront them with other solutions and traditions of thought. Since the key disciplines of migration research are not the same in different countries, the volume also contains a pluralism of subject approaches: sociologists, political scientists, ethnologists, economists and philosophers define migration, integration and their relationships to social structures. In doing so, you question assumptions that are taken for granted in the respective context.

“A brilliantly conceived and long overdue opening up [or deconstruction] of the Anne Frank story.” —James Clifford, Professor Emeritus, History of Consciousness Department, University of California As millions of people around the world who have read her diary attest, Anne Frank, the most familiar victim of the Holocaust, has a remarkable place in contemporary memory. Anne Frank Unbound looks beyond this young girl's words at the numerous ways people have engaged her life and writing. Apart from officially sanctioned works and organizations, there exists a prodigious amount of cultural production, which encompasses literature, art, music, film, television,

blogs, pedagogy, scholarship, religious ritual, and comedy. Created by both artists and amateurs, these responses to Anne Frank range from veneration to irreverence. Although at times they challenge conventional perceptions of her significance, these works testify to the power of Anne Frank, the writer, and Anne Frank, the cultural phenomenon, as people worldwide forge their own connections with the diary and its author. “This collection of brilliant essays offers fascinating and unexpected insights into the significance of Anne Frank’s iconic Holocaust-era diary from many disciplinary perspectives in the arts and humanities.” —Jan T. Gross, the Norman B. Tomlinson Professor of War and Society, Princeton University “This volume is a major contribution to scholarship regarding Anne Frank’s diary and its cultural influence . . . Highly recommended.” —Choice “Engrossing . . . The overall aim is to provide a greater understanding of the general and particular engagement with Anne Frank as a person, a symbol, an icon, an inspiration, and perhaps most polarizing, as one victim, not the victim of the Nazi holocaust.” —Broadside

In one moment Nicole Burns's life changes forever. The sound of gunfire at an Anne Frank exhibit, the panic, the crowd, and Nicole is no longer Nicole. Whiplashed through time and space, she wakes to find herself a privileged Jewish girl living in Nazi-occupied Paris during World War II. No more Internet diaries and boy troubles for Nicole—now she's a carefree Jewish girl, with wonderful friends and a charming boyfriend. But when the Nazi death grip tightens over France, Nicole is forced into

policy makers in the role that museums might play in confronting prejudice and promoting human rights and cross-cultural understanding. Museums in many parts of the world are increasingly concerned to construct exhibitions which represent, in more equitable ways, the culturally pluralist societies within which they operate, accommodating and engaging with differences on the basis of gender, race, ethnicity, class, religion, disability, sexuality and so on. Despite the ubiquity of these trends, there is nevertheless limited understanding of the social effects, and attendant political consequences, of these purposive representational strategies. Richard Sandell combines interdisciplinary theoretical perspectives with in-depth empirical investigation to address a number of timely questions. How do audiences engage with and respond to exhibitions designed to contest, subvert and reconfigure prejudiced conceptions of social groups? To what extent can museums be understood to shape, not simply reflect, normative understandings of difference, acceptability and tolerance? What are the challenges for museums which attempt to engage audiences in debating morally charged and contested contemporary social issues and how might these be addressed? Sandell argues that museums frame, inform and enable the conversations which audiences and society more broadly have about difference and highlights the moral and political challenges, opportunities and responsibilities which accompany these constitutive qualities.

Few scholarly fields have developed in recent decades as rapidly and vigorously as Holocaust Studies. At the start of the twenty-first century, the persecution and murder perpetrated by the Nazi regime have become the subjects of an enormous literature in multiple academic disciplines and a touchstone of public and intellectual discourse in such diverse fields as politics, ethics and religion. Forward-looking and multi-disciplinary, this handbook draws on the work of an international team of forty-seven outstanding scholars. The handbook is thematically divided into five broad sections. Part One, Enablers, concentrates on the broad and necessary contextual conditions for the Holocaust. Part Two, Protagonists, concentrates on the principal persons and groups involved in the Holocaust and attempts to disaggregate the conventional interpretive categories of perpetrator, victim, and bystander. It examines the agency of the Nazi leaders and killers and of those involved in resisting and surviving the assault. Part Three, Settings, concentrates on the particular places, sites, and physical circumstances where the actions of the Holocaust's protagonists and the forms of persecution were literally grounded. Part Four, Representations, engages complex questions about how the Holocaust can and should be grasped and what meaning or lack of meaning might be attributed to events through historical analysis, interpretation of texts, artistic creation and criticism, and philosophical and religious reflection. Part Five, Aftereffects, explores the Holocaust's impact on politics and ethics, education and religion, national identities and international relations, the prospects for genocide prevention, and the defense of human rights.
