These seven datasets are part of an ongoing data collection effort in which The New York Times and CBS News are equal partners. Each survey includes questions about President Ronald Reagan's performance in office, especially with respect to economic and foreign affairs. In addition, each survey provides information on respondents' views concerning other social and political issues, as well as respondents' personal backgrounds. The surveys were conducted in January, April, June, September (twice), and October (twice). The October surveys took place before and after President Reagan's speech about Grenada on October 27, 1983. The October samples are weighted separately, and two discrete datasets, which may be analyzed separately or combined, are available (Parts 6 and 7). Topics covered in Part 1, January Survey, include Reagan's handling of economic and foreign affairs, various proposals to reduce the federal deficit, unemployment, and Social Security. In Part 2, April Survey, individuals responded to questions about Reagan's handling of economic and foreign affairs, the environment, and defense policy, and were also asked about their willingness to vote for a Black candidate, candidates endorsed by labor unions, and candidates endorsed by homosexual organizations. Two versions of the questionnaire were used, to test alternative question wording. For Part 3, June Survey, questions were asked on Reagan's presidency, possible presidential candidates in 1984, foreign policy, economic policy, merit pay for public school teachers, federal spending on education, and tennis. Part 4, Plane Survey, queried respondents about the Korean passenger plane shot down by the Soviet Union in September 1983, including their opinions on the American response to the attack. The questionnaire also included questions about Reagan's handling of foreign and economic policy. Part 5, September S ... Cf. : <http://webapp.icpsr.umich.edu/cocoon/ICPSR-STUDY/08243.xml>.

Excerpt from The Government of the United States Many teachers entertain a conviction that most text-books for use in grammar and high-school grades, especially in the latter, require too much time for a thorough mastery of their contents. The number of subjects taught in schools Of all kinds and grades has greatly multiplied in recent years; but the school day is no longer than it was - in fact, it is shorter; nor has the school year been lengthened much, least of all in towns and cities. Consequently there is much complaint concerning overloaded courses Of study and crowded annual, weekly, and daily programs. There are those among educators, and others interested in educational improvement, who advocate a reduction in the number of subjects taught and a more intensive study Of the branches retained. It is not within the province Of this Preface to predict how the evil complained of will be remedied; but experience in the schoolroom has led many teachers to believe that less voluminous text-books would be at least a partial remedy. If the demands of the age require an increasingly greater number of subjects to be taught, it follows that less time must be given to each subject. But unless the text-books arc proportionately reduced in their scope, the attempt to get over them will result in skimming and Skipping, and consequently in an imperfect and evanescent knowledge of the contents. If you think the next election or president of the United States is going to solve our political problems, think again. The Republic is in decline. Democracy is faltering, privacy is perishing, and the Constitution is in extremis. So what can we do? Where do we begin? Welcome to Political Dawn. Written in broad prose and blunt, unapologetic language that favors no political party, persuasion, or power, other than the powers possessed by the American people and the states, Political Dawn: The Declaration of Reformation catalogues the government's long-standing political problems--which are legion; asserts our fundamental right to reform our own government; and declares the constitutional method and means by which we, the American people and the states, can directly exercise that right, resolve the resolvable errors and defects of government, and successfully achieve the declared goal. Distinct from other works narrower in scope and that speak to those ideologically aligned with a particular dimension of the political spectrum, this book is for all Americans. So who should read this book? You should read this book, especially if any of the following apply to you: You are an American citizen, or you are affected in any way by the United States government. You are interested in politics, bothered by politics, or dissatisfied with politics in the United States. You would like to learn evidenced-based answers to the following questions: In what ways does the United States government violate the Constitution and our rights and liberties? Are the traditional means by which we may attempt to influence government, such as by way of elections, adequate to achieve the type of reform that is needed? What other peaceful, political recourse do we (the American people) have? If you do not care about the answers to the above questions or about politics in the United States, if you think there is nothing we can lawfully do to resolve our political problems or that the traditional means of reform are sufficient for the task, or if you believe there is nothing wrong with the United States government--then you definitely should read this book.
