An antique map is both a slice of time - a glimpse of the sociopolitical climate of its age - and a work of art. The cartographer was both tradesman and artist, and each map reflects its creator's sensibility. This calendar reproduces twelve spectacular antique maps - of the world and various regions - drawn from three collections of The New York Public Library. Dating from the sixteenth to the eighteenth century, they transport us to a time when the world was still largely uncharted, cultures were discovering one another, and a global village was only just being born.

Explores geographic information available through several sources including the Internet and satellite technology, covering such topics as map basics, geographic information systems, and geographical standards.

In the Middle Ages, navigation relied upon a delicate balance between art and science. Whilst respecting the customs and the precautions of their forbearers, sailors had to count on their knowledge of the stars, the winds, the currents, and even of migratory flights. They also used hand-painted maps, which, although certainly summary, were marvellously well-drawn. In following the saga of old sailors, from Eric Le Rouge to Robert Peary, Donald Wigal leads us in discovering the New World. This magnificent overview of maps dating from the 10th to the 18th centuries, often 'primitive' and sometimes difficult to understand, retraces the progress of cartography and shows the incredible courage of men who endeavoured to conquer the seas with tools whose geographical accuracy often left much to be desired.

This 90 page 6x9 sepia tone antique style old world map Bucket List notebook is perfect to write down your memories, experiences, and thoughts from each activity you check off from your list whether it is from your favorite travel adventures or from trying a new experience! It is up to you how you will decide to complete it! Inside the journal, there is a personalization page followed by a blank checklist with 19 spaces to fill in and complete with accompanying pages to write about the experience saying what it was, where and when it happened, who was there, and would you do it again. After filling out those pages, there is a page dedicated to putting the souvenirs you have collected and a page to add photos. The last 30 pages are blank lined to complete as you desire. The cover features a hot air balloon, an old ship, a steam locomotive train, and a steam engine car scattered over North and South America with a compass rose at the bottom. The 6x9 size makes it a good portable size to carry while traveling so that you can write down all the important details about your bucket list experience! This would be a great gift for people who love to go traveling or are fans of historical antique maps and want to make a bucket list!

A selection of over 90 historically significant maps of Japan. The book tells the story of the encounter between the West and Japan through the gradual process of mapping the island empire.

Venture deep into the heart of finance's weird and wonderful paradoxes Dinosaur Derivatives and Other Trades is an entertaining and compelling tour de force highlighting the paradoxes inherent to the modern financial system. Presented as a series of striking

case studies, this book explores certain enigmatic or philosophical puzzles in the finance industry; some of these puzzles may seem slightly absurd at first glance, but all are very relevant to the way finance is conducted in the real world. Each story highlights specific hypocrisies or moral dilemmas that lie at the heart of the system, guiding readers through the challenges of finance by way of innovative and memorable paradigms. Written in clear, accessible language, this book doesn't claim to offer original financial theory or philosophy as such, but instead deepens the reader's understanding of the system and stimulates independent consideration of the current state of affairs. The financial world, so often viewed as a rather dull place, is secretly alive with possibilities of strange and sometimes wonderful conundrums. There is the possibility, for instance, of a Manhattan auction house selling derivatives to buy swift-swimming predators known as Megalodons (thought to be extinct for millions of years). This book explores this and other curious propositions to point out the paradoxes of finance. Explore the meaning of "value" in different contexts Learn what the Old Testament can teach us about risk and uncertainty Examine an alternative take on the 2007/2008 credit crisis Consider how the "financial innovation" trend impacts the industry To truly understand something, it is necessary to crawl deep into the metaphorical underbelly and have a look around. *Dinosaur Derivatives and Other Trades* provides the itinerary, and the insightful discussion that stimulates curiosity.

A standard reference work and collector's guide to old maps. *Antique Maps* is now firmly established as a definitive reference work. With extensive information on the general historical background, details of all the major map-makers and practical advice on collecting old maps, it provides an excellent introduction for the beginner as well as a mass of precise and clearly organized information for the expert and the serious collector. A beautiful edition in itself, this timeless volume evokes the elegance of maps from the past and the charm of all the distant places they suggest, to show them not only as historical artefacts but also as works of art.

This catalogue (the first in a series) offers collectors a comprehensive snapshot of the market for printed antique maps of the world, from 1472 to 1850. It gives the 2014 rated values of more than 750 different maps in fine condition. This enables collectors to compare, at a glance, the importance of all the available maps of the world. Please note that if condition was not standardized, such comparisons could not be made. More information about individual maps is also provided. The maps are listed in date order, many are illustrated in colour and prices of maps are continuously updated.

An exquisite large-format reprint of the remarkable 19th century atlas provides a detailed picture of the world in a century when growth and change were rapid and discoveries unprecedented. 86 color maps cover major geographical areas.

The *Phantom Atlas* is a guide to the world not as it is, but as it was imagined to be. It's a world of ghost islands, invisible mountain ranges, mythical civilizations, ship-wrecking beasts, and other fictitious features introduced on maps and atlases through mistakes, misunderstanding, fantasies, and outright lies. This richly illustrated book collects and explores the colorful histories behind a striking range of real antique maps that are all in some way a little too good to be true. Author Edward Brooke-Hitching investigates the places where exploration and mythology meet, using gorgeous atlas images as springboards for tales of the

deranged buccaneers, seafaring monks, heroes, swindlers, and other amazing stories behind cartography's greatest phantoms.
