AP Biology prep best seller! Guaranteed higher score or your money back! We've helped thousands of students improve their AP scores This AP Biology prep book contains over 1,500 Biology practice questions with detailed explanations and reflects the new AP Bio curriculum. This book will help you to: - master important biology concepts - assess your knowledge of different Biology topics - improve your test-taking skills - prepare for the AP Biology exam comprehensively and cost effectively AP Biology 1,500+ Practice Questions by Sterling Test Prep is comprised of all Biology topics tested on the AP Biology exam. Scoring well on the AP exam is important for your future placement credit for college biology and for admission into college of your choice. To achieve a high score, you need to develop skills to properly apply the knowledge you have and quickly choose the correct answer. You must solve numerous practice questions that represent the style and content of the AP Bio questions. Understanding key science concepts is more valuable than memorizing terms. The explanations discuss why the answer is correct and – more importantly – why another answer that may have seemed correct is the wrong choice. These explanations include the foundations and details of important science topics needed to answer related questions on the AP Biology exam. By reading these explanations carefully and understanding how they apply to solving the question, you will learn important biology concepts and the relationships between them. This will prepare you for the test and will significantly improve your score. All the questions are prepared by our science editors that possess extensive credentials, are educated in top colleges and universities. Our editors are experts on teaching sciences, preparing students for standardized science tests and have coached thousands of undergraduate and graduate school applicants on admission strategies. Topics covered in this book: eukaryotic cell: structure and function; molecular biology of eukaryotes; cellular metabolism and enzymes; specialized cells and tissues; photosynthesis; evolution, natural selection, classification, diversity; populations, communities, conservation biology; animal behavior & evolution; DNA and protein synthesis; genetics; microbiology; plants: structure, function, reproduction; endocrine, nervous, circulatory, lymphatic, immune, digestive, excretory, muscle, skeletal systems, respiratory, skin, reproductive systems; development.

The AP Biology course will cover several biology topics. Some topics in the course and on the exam will be covered more extensively than others. Topics covered in the course include, but are not limited to: Cells and Cellular Reactions Genetics and Heredity Molecular Biology Anatomy and Physiology Evolution Ecology
