

Arabic Medical Term Translation Guide Transliterated

In 1665, Sabbetai Zevi, a self-proclaimed Messiah with a mass following throughout the Ottoman Empire and Europe, announced that the redemption of the world was at hand. As Jews everywhere rejected the traditional laws of Judaism in favor of new norms established by Sabbetai Zevi, and abandoned reason for the ecstasy of messianic enthusiasm, one man watched in horror. Dissident Rabbi tells the story of Jacob Sasportas, the Sephardic rabbi who alone challenged Sabbetai Zevi's improbable claims and warned his fellow Jews that their Messiah was not the answer to their prayers. Yaacob Dweck's absorbing and richly detailed biography brings to life the tumultuous century in which Sasportas lived, an age torn apart by war, migration, and famine. He describes the messianic frenzy that gripped the Jewish Diaspora, and Sasportas's attempts to make sense of a world that Sabbetai Zevi claimed was ending. As Jews danced in the streets, Sasportas compiled *The Fading Flower of the Zevi*, a meticulous and eloquent record of Sabbatianism as it happened. In 1666, barely a year after Sabbetai Zevi heralded the redemption, the Messiah converted to Islam at the behest of the Ottoman sultan, and Sasportas's book slipped into obscurity. *Dissident Rabbi* is the revelatory account of a spiritual leader who dared to articulate the value of rabbinic doubt in the face of messianic certainty, and a revealing examination of how his life and legacy were rediscovered and appropriated by later generations of Jewish thinkers.

As the distinctive contribution of Islamic Spain to Arabic literature, the strophic *muwashshah* and *zajal* are still viewed by some as a development from putative Romance prototypes. No less than seven theories of origin of the Provençal lyrics have been proffered, foremost among them being the Arabic origins theory. This book lets the strophic *muwashshah* tell its own tale of a natural development in the context of classical Arabic literature.

This translation guide is based on sound theoretical and pedagogical principles. Unlike other translation manuals available, it transcends crude dichotomies of "literal" vs. "free" translation, "specialized" vs. "general," "communicative" vs. "semantic," etc. and concentrates instead on developing in the student a sensitivity to text-types and a deeper understanding of the demand which a given text-type makes on the translator. In addition, the student who closely follows this Guide will acquire the analytical tools necessary to make meaningful comments about translation and translations. A glossary of text-linguistic and translation terms is provided together with a select bibliography. This book deals with medieval Jewish authors who wrote in Arabic, such as Moses Maimonides, Judah Halevi, and Solomon Ibn Gabirol, as well as the Hebrew translations and commentaries of Judaeo-Arabic philosophy. It brings up to date a part of Moritz Steinschneider's monumental *Die hebraeischen Uebersetzungen des Mittelalters und die Juden als Dolmetscher* (The Hebrew Translations of the Middle Ages and the Jews as Transmitters), which was first published in 1893 and remains to this day the authoritative account of the transmission and development of Arabic and Latin, and, by way of those languages, Greek culture to medieval and renaissance Jews. In the work presented here, Steinschneider's bibliography has been updated, some of his scholarly judgments have been judiciously revised and an exhaustive listing of pertinent Hebrew manuscripts and their whereabouts has been provided. The volume opens with a long essay that describes the origin and genesis of *Die Hebraeischen Übersetzungen*, and with Steinschneider's prefaces to the French and German versions of his work. This publication is the first in a projected series that translates, updates and, where necessary, revises parts of Steinschneider's bio-bibliographical classic. Historians of medieval culture and philosophy, and also scholars of the transmission of classical culture to Muslims, Christians, and Jews, will find this volume indispensable.

After considering Maimonides' upbringing and education, Davidson expounds all of his voluminous writings in exhaustive detail, with separate chapters on rabbinic, philosophical, and medical texts. This long-awaited volume is destined to become the standard work on this towering figure of Western intellectual history.

All major dictionaries in English were surveyed, including new-word collections, and college dictionaries. The major sources of each entry are noted, along with the approximate degree of assimilation in English. A substantial part of the book is devoted to nontechnical analytical essays, which treat the forty-six semantic areas so as to embrace all disciplines and throw light on the individual subject. The practice of design thinking has become widespread over the last several years, and an increasing number of individuals and institutions have come to recognize its innovative power. However, its success story has also meant that the term has evolved into something of an overused, or even misused, buzzword. The demand for an in-depth, evidence-based understanding of the way design thinking works has grown accordingly. This challenge is addressed by the Hasso Plattner Design Thinking Research Program. Summarizing the outcomes of the research program's 12th year, this book presents a broad range of scientific insights gained by researchers at the Hasso Plattner Institutes in Potsdam, Germany and Stanford University in California, in the course of their investigations, experiments and studies. Special focus is placed on the impact, accessibility and measurability of design thinking. The contributing authors seek to establish common ground, conduct modelling, and develop essential toolkits. The expanding field of neurodesign is also addressed in contributions that explore the neural basis for creativity and nonverbal actions. The results of this rigorous academic research are not meant to be discussed exclusively within the scientific community: they will hopefully find their way to those who seek to promote innovation through collaboration, be it at businesses or in society.

This book explores the influence of translation on the Arabic language, with particular emphasis on the translation of English idioms by journalists working at Arabic satellite TV stations, using a mixed-method approach (quantitative and qualitative). It begins from a belief that the impact of broadcast media on Arabic speakers is more instant, wider and farther-reaching than that caused or triggered by any other branch of mass media, as not all features of television appear in other media. The book focuses on idioms because of the difficulties associated with translating them, and also because the literature review revealed inadequacy in understanding this intriguing part of the development of the Arabic language. In contrast to other similar titles, the book examines the possible factors causing journalists to resort to idiom literalisation, including those relating to demographic characteristics. The main significance of this book is that it has practical implications for its potential audience, both practitioners and professional peers. It provides information to enable media translators and lexicographers to become more sensitive towards the logico-semantic relationships

present in idiomatic expressions, and to improve their application of idiomatic expressions in their translations. Overall, the results presented here will serve to guide media translators and lexicographers' choice in the usage of idioms to produce better quality translations and dictionaries. This insight is important not only to translators and lexicographers, but also to language teachers and students of translation.

Pedagogically, the findings of the current book will encourage translation teachers to reconsider their strategies for teaching English idioms. Students of translation and English language learners in general will also benefit from the results of this book.

One of the main cultural consequences of the contacts between Islam and the West has been the borrowing of hundreds of words, mostly of Arabic but also of other important languages of the Islamic world, such as Persian, Turkish, Berber, etc. by Western languages. Such loanwords are particularly abundant and relevant in the case of the Iberian Peninsula because of the presence of Islamic states in it for many centuries; their study is very revealing when it comes to assess the impact of those states in the emergence and shaping of Western civilization. Some famous Arabic scholars, above all R. Dozy, have tackled this task in the past, followed by other attempts at increasing and improving his pioneering work; however, the progresses achieved during the last quarter of the 20th c., in such fields as Andalusí and Andalusí Romance dialectology and lexicology made it necessary to update all the available information on this topic and to offer it in English.
